## **Ego Psychology The Problem Of Adaptati:**

*Ego Psychology and the Problem of Adaptation* Heinz Hartmann, 1958 One becomes aware of the tremendous impact of his theories when one finds that it was in this essay that concepts such as the undifferentiated phase the conflict free ego sphere conflict free ego development and primary and secondary autonomy were developed for the first time Hartmann discusses the role of endowment and of the inborn ego apparatuses and their adaptive nature The idea that ego defenses may simultaneously serve the control of instinctual drives and the adaptation to the external world finds its expression in this essay Hartmann's concept of adaptation is in no way restricted to the cultural sense of the term It is a truly inclusive conception and he views it as an ongoing process which has its roots in the biological structure and with many of its manifestations reflecting the constant attempts of the ego to balance intrasystemic and intersystemic tensions

**Lacan to the Letter** Bruce Fink, 2004 To read Lacan closely is to follow him to the letter to take him literally making the wager that he comes right out and says what he means in many cases though much of his argument must be reconstructed through a line by line examination And this is precisely what Bruce Fink does in this ambitious book a fine analysis of Lacan s work on language and psychoanalytic treatment conducted on the basis of a very close reading of texts in his *ICrits A Selection* As a translator and renowned proponent of Lacan s works Fink is an especially adept and congenial guide through the complexities of Lacanian literature and concepts He devotes considerable space to notions that have been particularly prone to misunderstanding notions such as the sliding of the signified under the signifier or that have gone seemingly unnoticed such as the ego is the metonymy of desire Fink also pays special attention to psychoanalytic concepts like affect that Lacan is sometimes thought to neglect and to controversial concepts like the phallus From a parsing of Lacan s claim that commenting on a text is like doing an analysis to sustained readings of *The Instance of*

*Subject and Agency in Psychoanalysis* Frances Moran, 1993-05 Psychoanalysis works with words words spoken by a subject who asks that the analyst listen This is the belief that underlies Francis Moran's rewarding exploration of a central problem in psychoanalytic theory namely the separation of the concepts of subject and agency Subject and Agency in Psychoanalysis contends that Freud simultaneously employs two frameworks for explaining agency one clinical and one theoretical As a result Freud's exploration of agency proceeds from two logically incompatible assumptions The division between these assumptions is a part of Freud's psychoanalytic legacy Moran reads the Freudian inheritance in light of this division showing how Klein and Hartmann's theoretical concepts of subject are adrift from the subject who speaks in analysis Moran also shows that while Lacan's subject provides more focus on this issue Lacan reverts to the Freudian division in his use of logically contradictory assumptions concerning the location of agency Drawing on contemporary theory development from Lacanian innovations to the social theories of Anthony Giddens Moran proposes a new and fertile approach to a fundamental problem significantly narrowing the gap between psychoanalytic theory and practice The Evolution and
