Myths and Legends of Ancient Egypt Lewis Spence, 2013 *Myths and Legends of Ancient Egypt* The dead man was practically at the mercy of the living for subsistence in the otherworld Unless his kinsmen continued their offerings to him he was indeed in bad case for his ka would starve This ka was his double and came into the world at the same time as himself It must be sharply distinguished from the ba or soul which usually took the form of a bird after the death of its owner and indeed was capable of assuming such shape as it chose if the funeral ceremonies were carried out correctly Some Egyptologists consider the ka to be the special active force which imbues the human being with life and it may be equivalent to the Hebrew expression spirit as apart from soul In the book of Genesis we are informed that God breathed the breath of life into man and

he lived In like manner did He lay His arms behind the primeval gods and forthwith His ka went up over them and they lived When the man died his ka quitted the body but did not cease to take an interest in it and on occasion even reanimated it It was on behalf of the ka that Egyptian tombs were so well furnished with food and drink and the necessities not to say the luxuries of existence

majority of humankind worships a single God Although this God is said to be all loving and wanting peace for his worshippers there is very little peace among the three religions based on common theology Judaism Christianity and Islam all foster hatred for one another causing millions of deaths and untold suffering for hundreds of years This book explores the mythic historical and archaeological record to illustrate the history of these conflicts The Gods of Man also looks at how monotheism eventually dominated and destroyed the ancient and peaceful goddess traditions that had existed for thousands of years before Is the God of today simply used to enforce government edicts justify war and to control society Gary R Varner has written several articles and books on ancient religions folklore and mythology He is a member of the American Folklore Society and the Foundation for Mythological Studies

The Mythic Forest, the Green Man and the Spirit of Nature

Gary R. Varner, 2006 Mankind has given a recognizable face to the awesome and impalpable forces of nature in the image of the Green Man and the nature spirits that this book explores The ways in which different societies and different craftsmen have depicted these spirits display the wide creative range of the human imagination but the persistence of the theme suggests that in all their many facets these spirits represent a deep primordial sense that humans have shared since civilization began For the very origin and message of these images have remained the same even if somewhat altered over time Traditional customs from around the world from the rites that celebrate spring and egg on the forces of fertility to folk health remedies and the use of talismans to ward off illness and other evils show some surprising similarities and hint at the shared origins of human culture Even though the original significance of many customs has been lost or diluted they still hold an appeal and many towns even today are re introducing seasonal fairs to recreate the link between man and nature Varner presents examples ancient and new from Europe and Asia East Coast and West and identifies in particular the different guises of the Green Man who has figured in architecture since before the advent of Christianity and still makes his appearance today peering out from behind his leaves on California banks and New York brownstone houses *Bulletin*
