Shoup,Troy W. Hinrichs,Jacqueline N. Gustafson,2021-10-08 Wisdom considered the highest level of enlightenment has not had a foothold in our education since Plato s Academy and Aristotle s Lyceum Yet it is wisdom that ultimately promotes human flourishing and equips individuals with the sophistication to live life well Wisdom is especially urgent if leaders and followers are to lead and follow well Wisdom is more critical and urgent than ever in today s world Stories of lack of discernment and sound judgment abound in the news Comments such as what were they thinking and why did they do that reveal that wisdom is often painfully lacking when it comes to making decisions The world needs people who judiciously discern and courageously implement innovative decisions at the right time and in the right way But before wisdom can be adequately taught it needs to be properly understood Historically the study and acquisition of wisdom has been reserved to the philosophical and theological fields of study often making wisdom appear esoteric elusive and mysterious While relatively recent empirical attempts have led to certain quantifications and qualifications of wisdom a comprehensive and cohesive model for understanding teaching and implementing general wisdom has yet to emerge Unfortunately philosophical and theological treatises on wisdom have been overly convoluted or mystical making wisdom appear elusive for the lay person The empirical traditions have overanalyzed the concept to make it almost formulaic and uninspiring This primer merges insights from the philosophical theological and empirical traditions to provide a simple model for understanding acquiring practicing and teaching wisdom This primer is unique is that it uses clear language to walk the readers through representative classical philosophical and religious works and empirical studies in lieu of jargon filled meditations As a result the primer orients readers to think like philosophers theologians and social scientists by shepherding them through to the logic of previous works on wisdom What also sets this work apart is its brevity without compromise to substance This primer demonstrates that the complicated can be made relatively simple and that brevity and profound meaning often walk hand in hand Ideal for emerging and established leaders this book demonstrates that wisdom inspires confidence establishes credibility and helps us successfully navigate complex problems and promote human progress This

primer makes wisdom accessible and provides all soon to be novice and seasoned leaders with the understanding dispositions and skills to be discerning and virtuous people others will want to emulate and follow [Forthcoming Books](#) Rose Army,1998-06 *Yoga and the Sacred Fire* David Frawley,2004-08-24 Yoga and the Sacred Fire explores the evolution of life and consciousness according to the cosmology and psychology of Fire viewing Fire not only as a material but also as a spiritual principle It shows how Yoga s deeper fire wisdom can help us move forward to an enlightened planetary age where humanity and nature can again be one in a higher awareness *The Metaphysical Compass* Jonathan Torralba Torron,2024-08-12 An in depth analysis of the different worldviews available to us in today s world their underlying metaphysics and the symbolism they use to convey their doctrines The Metaphysical Compass is an exercise in both analysis and synthesis delving deeply into complex religious and philosophical issues while providing summarized access to vast amounts of information that is difficult for non specialists to access It is based on the incontrovertible premise that especially after the globalization of knowledge we find ourselves in a highly complex world in which different incompatible worldviews uneasily coexist To guide us in our search the book focuses on the metaphysical answers underlying the different worldviews available to us whether religious mystical esoteric philosophical or scientific It also stresses the importance of symbolism in transmitting these doctrines and its undeniable and growing prevalence in today s mass media and popular culture The Metaphysical Compass was designed as an enjoyable synthesis capable of conveying a large amount of information in a visual and summarized but not dumbed down way Furthermore the book contains plenty of hyperlinks digital editions and notes through which those interested can expand their knowledge on specific topics It is an ideal book for those with little time to investigate and confront the great questions of life Also for those interested in discovering all the possible solutions to the oldest philosophical question of all which lies at the core of each and every worldview the conflict between the One and the Many The Metaphysical Compass includes A massive repository of knowledge both ancient and modern highly structured and profusely illustrated designed to clear up all your metaphysical doubts and guide you in navigating the complexities of the modern world and its myriad worldviews A comparative table with the 41 main current worldviews in which their particularities are described their main symbols discussed and their central metaphysical beliefs defined compared and categorized 15 summary diagrams that explain the complete argument of the book in a clear and pleasant visual way Graphics highlighting the prevalence of certain recurrent metaphysical doctrines in modern popular culture

Encyclopaedia of Religion and Ethics James Hastings,John Alexander Selbie,Louis Herbert Gray,1928 [The Seat of Consciousness in Ancient Literature](#) Richard E. Lind,2015-01-09 For early civilizations consciousness and the sense of self were experienced as located in the center of the body most often near to or within the physical heart Enlightenment was understood as the illumination of a transformed spiritual heart Thus the mind of the body as a whole was represented by the heart soul In contrast modern culture places consciousness within the brain resulting in a mind body dualism This separation

of mind and body has recently been emphasized as characteristic of the psychopathologies of the modern self This volume explores the understanding and experience of consciousness in the earliest civilizations before about 500 BCE Beginning with a description of ancient Western and Eastern heart consciousness the psychological and spiritual manifestations of the ancient mature heart soul are summarized Ancestor worship lineage identity primitive consciousness and the ways in which the external world was mirrored by the inner world provide additional clues about the experience of heart consciousness Finally the work addresses the fundamental changes in the experience of consciousness that led to the mind body dualism of today
