Clarke,2011-07-28 Consciousness has been described as one of the most mysterious things in the universe Scientists philosophers and commentators from a whole range of disciplines can't seem to agree what it is or why it is that the whole rich panoply of human experience seems to emerge from a lump of squishy grey matter in our heads Most agree though that consciousness represents a Hard Problem and consciousness studies has emerged as a quasi discipline over recent years as a multidisciplinary discourse seeking to address these and other fascinating and perplexing questions While the arts and humanities have joined the sciences at the debating table music has been relatively under represented until now This book redresses this balance Its 20 essays offer different takes on issues around music and consciousness both addressing existing agendas and introducing new ones No single view emerges but what the collection as a whole makes clear is that to understand consciousness we need to do much more than look at brains Studying music makes it clear that consciousness is as much to do with minds bodies culture and history The book which includes several chapters drawing from Eastern philosophies also provides a corrective to any perception that the study of consciousness is a purely Western preoccupation In addition to what it says about consciousness the book also and perhaps primarily represents a new configuration of writings about music     *The New Guide to Dakini Land* Geshe Kelsang Gyatso,2012-01-01 Vajrayogini is a female enlightened Deity of Highest Yoga Tantra a manifestation of all Buddha's wisdom
