Homan,Thomas Reilly,1999-12-30 From the January 1958 launch of the first American satellite to the creation of the National Aeronautics and Space Administration by President Eisenhower just a few months later from the heated space race of the Cold War era to the heroes of shuttle launches the United States has been on the leading edge of space exploration and technology Initially developed from one of Adolph Hitler s most feared weapons the V2 rocket the space program has accomplished much in just a few short decades The first American manned space flight which put astronaut Alan Shepard into space was launched in 1961 in 1965 Edward White became the first American to walk in space for a total of 21 minutes In 1969 Neil Armstrong uttered those now famous words as he became the first human to walk on the Moon These and many other achievements once considered unimaginable have inspired and amazed the American people and engaged our brightest scientific minds The Mercury 13 Martha Ackmann,2004-07-13 For readers of *The Astronaut Wives Club* *The Mercury 13* reveals the little known true story of the remarkable women who trained for NASA space flight In 1961 just as NASA launched its first man into space a group of women underwent secret testing in the hopes of becoming America s first female astronauts They passed the same battery of tests at the legendary Lovelace Foundation as did the Mercury 7 astronauts but they were summarily dismissed by the boys club at NASA and on Capitol Hill The USSR sent its first woman into space in 1963 the United States did not follow suit for

another twenty years For the first time Martha Ackmann tells the story of the dramatic events surrounding these thirteen remarkable women all crackerjack pilots and patriots who sometimes sacrificed jobs and marriages for a chance to participate in America's space race against the Soviet Union In addition to talking extensively to these women Ackmann interviewed Chuck Yeager John Glenn Scott Carpenter and others at NASA and in the White House with firsthand knowledge of the program and includes here never before seen photographs of the Mercury 13 passing their Lovelace tests Despite the crushing disappointment of watching their dreams being derailed the Mercury 13 went on to extraordinary achievement in their lives Jerrie Cobb who began flying when she was so small she had to sit on pillows to see out of the cockpit dedicated her life to flying solo missions to the Amazon rain forest Wally Funk who talked her way into the Lovelace trials went on to become one of the first female FAA investigators Janey Hart mother of eight and at age forty the oldest astronaut candidate had the political savvy to steer the women through congressional hearings and later helped found the National Organization for Women A provocative tribute to these extraordinary women *The Mercury 13* is an unforgettable story of determination resilience and inextinguishable hope *Integrating Women Into the Astronaut Corps* Amy E. Foster, 2011-12 Why Amy E Foster asks did it take two decades after the Soviet Union launched its first female cosmonaut for the United States to send its first female astronaut into space In answering this question Foster recounts the complicated history of integrating women into NASA's astronaut corps NASA selected its first six female astronauts in 1978 Foster examines the political technological and cultural challenges that the agency had to overcome to usher in this new era in spaceflight She shows how NASA had long developed progressive hiring policies but was limited in executing them by a national agenda to beat the Soviets to the moon budget constraints and cultural ideas about women's roles in America Lively writing and compelling stories including personal interviews with America's first women astronauts propel Foster's account Through extensive archival research Foster also examines NASA's directives about sexual discrimination the technological issues in integrating women into the corps and the popular media's discussion of women in space Foster puts together a truly original study of the experiences not only of early women astronauts but also of the managers and engineers who helped launch them into space In documenting these events Foster offers a broader understanding of the difficulties in sexually integrating any workplace even when the organization approaches the situation with as positive an outlook and as strong a motivation as did NASA *Congressional Record* United States. Congress, 2005 ***The Complete Book of Spaceflight*** David Darling, 2008-04-21 A commanding encyclopedia of the history and principles of spaceflight from earliest conceptions to faster than light galaxy hopping Here is the first truly comprehensive guide to space exploration and propulsion from the first musings of the Greeks to current scientific speculation about interstellar travel using warp drives and wormholes Space buffs will delight in its in depth coverage of all key manned and unmanned missions and space vehicles past present and projected and its clear explanations of the technologies involved Over the course of more than 2 000 extensively cross referenced entries astronomer David

Darling also provides fascinating insights into the cultural development of spaceflight In vivid accounts of the major characters and historical events involved he provides fascinating tales of early innovators the cross pollination that has long existed between science fiction and science fact and the sometimes obscure links between geopolitics warfare and advances in rocketry
