The Southeast Asian Economic Miracle Young Kim, 2018-04-17 There is widespread agreement that the world s most successful developing countries in the 1980s were those in Southeast Asia Following in the footsteps of postwar Japan and more recently Korea the populations of Thailand Malaysia Indonesia Singapore Hong Kong and the Philippines have made enormous strides in income industrial and agricultural production exports education health nutrition consumption and other development indicators This book brings together political scientists economists officials of Asian governments the United States and representatives of the multilateral banks to analyze and explain Southeast Asia s extraordinary growth Chapters and contributors to *The Southeast Asian Economic Miracle* include Recent Developments and Future Prospects of Indonesia by Anwar Nasution The Economic Experience and Prospects of Thailand by Sukhumbhand Paribatra The Development of the Former Indochina States by Frederick Brown Trade and Investment in Southeast Asian Development by Stephen Parker and Managing Renewable Resources in Southeast Asia The Problem of Deforestation by Gareth Porter Among the critical questions that the contributors address are Is the success of the 1980s and early 1990s a permanent part of the world s economic landscape How will this region react to the growth of China s vast productive capacity and to the faltering of Japan s economy What will be the effect of U S military disengagement caused by domestic budgetary concerns and the end of the cold war The Southeast Asian Economic Miracle is an important study of the shifting winds of the political economy of growth in our time the movement away from a command to a free market environment It will be an essential resource for political

scientists Asia area scholars economists and policymakers The Transformation of Southeast Asian Economies Teofilo C. Daquila, 2007 This book analyses the growth development and crisis experiences of the Southeast Asian economies in particular Indonesia Malaysia the Philippines Singapore and Thailand also known as ASEAN 5 The proposition is developed that the robust economic performance of the Southeast Asian economies during the past four decades has been attributed to the various factors developments and independent national policies which have been pursued by the individual member countries rather than to any regional economic framework The book covers eleven topics which is suitable for a one semester course on the economics of Southeast Asia Also it has a narrower area coverage as it focuses only on the five economies namely Indonesia Malaysia the Philippines Singapore and Thailand The sectoral treatment of the crisis impact and the analytical treatment of policy responses to the crisis differentiate this book from other publications on the same topic Finally the book provides an analysis of national developments policies and factors which have contributed to the economic transformation of the respective Southeast Asian economies **Southeast Asia beyond Crises and Traps** Boo Teik Khoo, Keiichi Tsunekawa, Motoko Kawano, 2017-09-18 This book examines five countries in South East Asia that are

instructive case studies of how the region has had to negotiate pathways of development beyond crises and traps At two ends of just one decade 1997 2007 Indonesia Malaysia the Philippines Thailand and Vietnam all had to weather the shocks of an East Asian financial crisis and a global financial crisis Some economies might have buckled completely under those shocks and been condemned to long term stagnation Yet these five economies part of the larger Asian region emerged with continued if slower economic growth An important theme of this book is that their resilience has been partly derived from the pursuit of growth and competitiveness along less known or recommended pathways The chapters of this book take a novel approach to South East Asia's search for growth and improvement They do not begin by evaluating how far macro level performances would take a particular country towards high income status Instead they provide original insights into actual cases of intermediate ways of achieving growth upgrading and income improvement in non privileged sectors Such cases may hold more relevant lessons for the majority of developing countries than the experiences of highly developed economies

Daquila, 2005 This book analyses the growth development and crisis experiences of the Southeast Asian economies in

particular Indonesia Malaysia the Philippines Singapore and Thailand also known as ASEAN 5 The proposition is developed that the robust economic performance of the Southeast Asian economies during the past four decades has been attributed to the various factors developments and independent national policies which have been pursued by the individual member countries rather than to any regional economic framework The book covers eleven topics which is suitable for a one semester course on the economics of Southeast Asia Also it has a narrower area coverage as it focuses only on the five economies namely Indonesia Malaysia the Philippines Singapore and Thailand The sectoral treatment of the crisis impact and the analytical treatment of policy responses to the crisis differentiate this book from other publications on the same topic Finally this book provides an analysis of national developments policies and factors which have contributed to the economic transformation of the respective Southeast Asian economies

Southeast Asia's Misunderstood Miracle Jomo K.s.,1997-07-31
Southeast Asia's Misunderstood Miracle emphasizes the contribution of government intervention especially selective industrial policy to growth structural change and late industrialization in Thailand Malaysia and Indonesia Although government intervention has certainly been abused for private gain it has also been crucial for the sustained rapid growth and structural change experienced in the region Similarly Southeast Asian resource wealth may have weakened the imperative to industrialize in the region but inferior government intervention probably accounts for the relatively less impressive industrial achievements of the three countries The study also stresses the significant contribution of regional economic dynamics especially the increased role of direct foreign investment from Japan and the first tier newly industrializing economies of South Korea Taiwan Hong Kong and Singapore Thus the book qualifies contradicts and challenges some of the conclusions and policy recommendations of other works such as the World Bank's influential East Asian Miracle 1993 which suggested that other developing countries should seek to emulate the second tier Southeast Asian NICs rather than the first tier East Asian NIEs

Economic Factors in Southeast Asian Social Change Robert Van Niel,1968
Compilation of conference papers on the interrelationship of economic development and social change in South East Asia with particular reference to Indonesia Malaysia and the Philippines covers sociological aspects of marketing social integration in the urban area environment urbanization obstacles to investment rural development programmes transport cultivation techniques etc and includes case studies References Conference held in Los Angeles 1967 June 15 to 17

Economic change, social structure, and the political system in Southeast Asia Harold A. Crouch,1985 In this study the author compares the socio economic and political developments of the five original member states of ASEAN which have similar historical experiences and currently adopt strategies of economic development which have much in common The emphasis however is on the Philippines with comparisons being made between that country and the rest

Southeast Asia (Routledge Revivals) Richard Higgott,Richard Robison,2013-10-31 The articles in this edited collection first published in 1985 consider the competing theories of the nature of development and underdevelopment in Southeast Asia Each chapter challenges the academic orthodoxies and dominant traditions of Southeast Asian studies particularly in relation to orientalist history behaviourist political science and development economics Overall the contributions offer an alternative framework for analysis which considers the structural changes to the political economy of Southeast Asia as well as the relationship between the state economy and class at a domestic level This is a fascinating collection of value to students and academics

with an interest in Southeast Asian politics economics and history **Economic and Political Trends in Southeast Asia**, 1973 Papers and Proceedings of a Seminar organized by the Institute of Southeast Asian Studies in Singapore

Southeast Asian-centred Economies Or Economics? Mason C. Hoadley, 1999 This book is not a definitive research statement nor yet another account of Asia's financial crisis Rather it offers Southeast Asian perspectives quite at variance to orthodox Western economic thinking Topics range from macro perspectives of Indonesia's Ekonomi Pancasila and Thailand's Buddhist Economics through Malaysia's Islamic financial institutions to regional and international perspectives of the remaining ASEAN countries and the IMF World Bank all tied up by setting them within a diachronic historical framework In so doing this volume looks to open up challenging and provocative fields of research essential for a real understanding of Southeast Asia and its current economic situation
