Aspects of Independent Romania's Economic History with Particular Reference to Transition for EU Accession Professor David Turnock,2013-06-28 After fifteen years of transition in the former communist states of Central and Eastern Europe it has become clear that for a substantial number the objective of reform and restructuring process is a market system in line with membership of the EU In this study the long term economic transformation of Romania is studied offering a detailed narrative and thematic account of events from the nineteenth to the twenty first centuries From the first steps towards large scale industrialisation begun prior to the First World War through the accelerated pace set by the communist regime after 1945 and the uncertainty following its subsequent collapse in 1989 the book addresses a wide range of pertinent issues that have shaped Romania s economic development The study also offers an interpretation of a distinctive phase in the modernisation of post communist Romania supported by economic historical surveys of the proceeding century as a context for recent restructuring on the eve of EU accession This is linked with trends in the region as a whole so that a broad

perspective is maintained throughout the book By highlighting Romania's position as one of more backward accession states and considering in what ways its experience during transition differs from the more developed states of the region this study offers a valuable insight into both the history of Romania and its future prospects Furthermore it provides a valuable case study that can be compared and contrasted with other countries who are likewise still grappling with the legacy of a centralised economy and in the process of adopting a more market orientated approach in order to gain EU membership As such this study will be of interest not only to historians and economists but anyone with an interest in the expansion of the European Union

Romania In The 1980s Daniel N. Nelson, 2019-06-04 Among communist states Romania is in several respects a unique case Romania has been the only Warsaw Pact member to deviate consistently from Soviet foreign policy norms and alone within Eastern Europe to avoid oil imports from the USSR The leadership of Nicolae Ceausescu since 1965 has meanwhile governed through a studious commitment to socio economic centralization and control often reminiscent of Stalinist orthodoxy Intellectual freedom artistic liberty and workers rights have changed little relative to Poland Hungary or the transient Prague Spring Such international and domestic policy distinctions as well as a record of impressive industrial growth necessitate an effort to understand the dynamics of Romania's socio economic and political life This volume is meant to delineate trends in political social and economic life which will constitute dynamic elements for the Romanian system during the 1980s and beyond Contributors all scholars with lengthy research experience in Romania the Balkans and communist states generally have sought to identify factors likely to be influential during this and ensuing decades In that sense this is a predictive volume containing not crystal ball gazing but the careful identification and assessment of trends influencing Romanian foreign and domestic policies economic and political performance and societal transformations By suggesting elements crucial to socio economic and political change in Romania we hope to make observing this intriguing communist state somewhat less haphazard and more systematic
