Politics In An Age Of Economic Limits* Bruce Shefrin, 2019-07-18 This study of the future of U S politics begins with an in depth examination of the political social and economic dynamics of the present Dr Shefrin demonstrates that economic growth has been a key element in maintaining political stability by diverting the attention of materially deprived groups away from disruptive political activity Examining the interaction of technological and political forces in the physical and social environment he argues that an expectation of economic limits is reasonable and perhaps undeniable and focuses on the changes in the political system that can be anticipated in a no growth or slow growth

society Dr Shefrin employs a nondeterministic social choice approach to reach the conclusion that because the shape of the future is of major political significance it will be the focus of intense political conflict The four scenarios he presents reflect the major alternative directions possible for U S society according to current social theory Dr Shefrin feels that the conflict among supporters of these alternatives will constitute the politics of the future      **The President's New Economic**

believe a concrete bunker is the best idea Some people are planning for an aboveground bunker and some are interested in an underground bunker In this book we are going to be discussing both in great detail As I will explain this type of bunker will give you the best protection possible for the most scenarios One need not be a conspiracy theorist to be apprehensive People may think Doomsday preppers or What ifers as we are often called are Nut jobs However when TSHTF we will be the ones who others will come to since we will be the ones who are prepared
