The Spread of Economic Ideas David C. Colander, Alfred W. Coats, Alfred William Coats, 1993-01-29 This book first published in 1989 contains a spirited debate between eminent economists journalists and publishers about the spread of economic ideas The examination of the flow of ideas among economists and from economists to the public is followed by a discussion of the public policy use and abuse of these concepts

Economics and the Interpretation and Application of U.S. and E.U. Antitrust Law Richard S. Markovits, 2014-05-22 Volume 2 uses the economic and legal concepts theories of Volume 1 to 1 analyze the U S and E U antitrust legality of mergers joint ventures and the pricing technique and contractual sales policy distributor control surrogates for vertical integration and 2 assess related positions of scholars and U S and E U antitrust officials Its analysis of horizontal mergers 1 delineates non market oriented protocols for determining whether they manifest specific anticompetitive intent would lessen competition or are rendered lawful by the efficiencies they would generate 2 criticizes the U S courts traditional market share market concentration protocol the HHI oriented protocols of the 1992 U S DOJ FTC Guidelines and the European Commission EC Guidelines and the various non market oriented protocols the DOJ FTC have increasingly been using 3 argues that although the 2010 U S Guidelines and DOJ FTC officials discuss market definition as if it matters those Guidelines actually reject market oriented approaches and 4 reviews the relevant U S and E U case law Its

analysis of conglomerate mergers 1 shows that they can perform the same legitimate and competition increasing functions as horizontal mergers and can yield illegitimate profits and lessen competition by increasing contrived oligopolistic pricing and retaliation barriers to investment 2 analyzes the determinants of all these effects and 3 assesses limit price theory the toe hold merger doctrine and U S and E U case law Its analysis of vertical conduct 1 examines the legitimate functions of each type of such conduct 2 delineates the conditions under which each manifests specific anticompetitive intent and or lessens competition and 3 assesses related U S and E U case law and DOJ FTC and EC positions Its analysis of joint ventures 1 explains that they violate U S law only when they manifest specific anticompetitive intent while they violate E U law either for this reason or because they lessen competition 2 discusses the meaning of an ancillary restraint and demonstrates that whether a joint venture agreement would be illegal if it imposed no restraints and whether any restraints imposed are ancillary can be determined only through case by case analysis 3 explains why scholars and officials overestimate the economic efficiency of R D joint ventures and 4 discusses related U S and E U case law and DOJ FTC and EC positions The study s Conclusion 1 reviews how its analyses justify its innovative conceptual systems and 2 compares U S and E U antitrust law as written and as applied

[Economic Policy and the Financial Crisis](#) Łukasz Mamica, Pasquale Tridico, 2014-03-26 The consequences of the global economic crisis which started in the United States in 2007-08 are still being felt in most of the advanced economies and the mainstream tools of recovery are not having the required results It seems that many of the after effects of the crisis including the instability of the financial markets increasing public debts and limited economic growth require new solutions from both economic policy and theory Lower aggregate demand during the crisis increased the pressure on firms to be more competitive and at the same time the crisis in the banking system has had a negative impact on the willingness of financial institutions to give credit to companies for investment Therefore the key issue for current economic policy is to find a balance between the stabilisation of public finance and maintaining the momentum of long term growth This book offers an evolutionary developmental analysis combining elements of neo Schumpeterian economics

institutional economics and post Keynesian economics to show that selection processes within an economy and the institutional rules shaping those processes are substantially more important than usually recognised by evolutionary economic theory Two major challenges for economic theory and policy in particular have emerged during the crisis The first is the rise of unemployment coupled with growing public deficits The second is the financial instability which threatens the permanence of economic development This book examines the performance of the advanced economies since the crisis and explores why some of them have been more successful in tackling these challenges than others It is argued that the reasons for the varied performances of these economies lie in the economic policies which were introduced before and in the aftermath of the crisis and the differences in the regulation of their labour markets This volume will be of interest to students and academics in the areas of macroeconomics public economics and public management *Oswaal ICSE Question Bank SOLVED PAPERS | Class 10 | Economic Application | For Exam 2024-25* Oswaal Editorial Board,2024-04-01 Description of the Product 100% Updated with Latest Syllabus Questions Typologies We have got you covered with the latest and 100% updated curriculum Crisp Revision with Topic wise Revision Notes Smart Mind Maps Study smart not hard Extensive Practice with 700 Questions Self Assessment Papers To give you 700 chances to become a champ Concept Clarity with 500 Concepts Concept Videos For you to learn the cool way with videos and mind blowing concepts 100% Exam Readiness with Expert Answering Tips Suggestions for Students For you to be on the cutting edge of the coolest educational trends

Economics as Religion Robert H. Nelson,2015-06-13 Robert Nelson s Reaching for Heaven on Earth Economics as Religion and The New Holy Wars Economic Religion Versus Environmental Religion in Contemporary America read almost like a trilogy exploring and charting the boundaries of theology and economics from the Western foundations of ancient Greece through the traditions that Nelson identifies as Protestant and Roman and on into modern economic forms such as Marxism and capitalism as well as environmentalism Nelson argues that economics can be a genuine form of religion and that it should inform our understanding of the religious developments of our times This edition of Economics as Religion situates the influence of his work in the scholarly economic and theological conversations of today and reflects on the state of the economics profession and the potential implications for theology economics and other social sciences **United States Air Force Academy** United States Air Force Academy, Handbook of Research Methods and Applications in Experimental Economics Arthur Schram,Aljaž Ule,2019 This volume offers a comprehensive review of experimental methods in economics Its 21 chapters cover theoretical and practical issues such as incentives theory and policy development data analysis recruitment software and laboratory organization The Handbook includes separate parts on procedures field experiments and neuroeconomics and provides the first methodological overview of replication studies and a novel set valued equilibrium concept As a whole the combination of basic methods and current developments will aid both beginners and advanced experimental economists Law and Economics Margaret Oppenheimer,Nicholas Mercuro,2015-06-01 The economic

analysis of legal and regulatory issues need not be limited to the neoclassical economic approach. The expert contributors to this work employ a variety of heterodox legal economic theories to address a broad range of legal issues. They demonstrate how these various approaches can lead to very different conclusions concerning the role of the law and legal intervention in a wide array of contexts. The schools of thought and methodologies represented here include institutional economics, new institutional economics, socio economics, social economics, behavioral economics, game theory, feminist economics, Rawlsian economics, radical economics, Austrian economics, and personalist economics. The legal and regulatory issues examined include anti-trust and competition, corporate governance, the environment and natural resources, land use and property rights, unions and collective bargaining, welfare benefits, work time regulation and standards, sexual harassment in the workplace, obligations of employers and employees to each other, crime, torts, and even the structure of government. Each contributor brings a different emphasis and provides thoughtful, sometimes provocative analysis and conclusions. Together, these heterodox insights will provide valuable supplementary reading for courses in law and economics as well as public policy and business courses at both the graduate and undergraduate levels.

Handbook Of Tourism Economics: Analysis, New Applications And Case Studies Clement A Tisdell, 2013-03-08. Handbook of Tourism Economics Analysis New Applications and Case Studies provides an up to date concise and readable coverage of the most important topics in tourism economics. It pays attention to relevant traditional topics in tourism economics as well as exciting emerging topics in this field, topics which are expected to be of continuing importance. In doing this, it takes account of advances in economic thought, analysis, and applied methods. Contributions provide applications of economic analysis to tourism policy and constructive assessment of contemporary thought about tourism economics. The handbook includes several in-depth case studies such as the contribution of tourism to economic development in selected countries including China, India, Japan, and Australia, Portugal and Fiji. Coming from diverse countries, both industrialised and developing, and established in the field of tourism economics, travel and management, many of the contributors have been consultants to governments, private organisations, and international bodies including the UN World Tourism Organisation, the OECD, and UNEP. Experts contributing to this volume include the President of the International Association of Tourism Economics as well as its Secretary General, the Secretary General of the Tourism Research Centre Association, of Tourism Research Institutes, the Founder Fellow of the International Academy for the Study of Tourism, and the former Director of the UK's Centre for Social and Economic Research on the Global Environment, CSERGE.

Contemporary Economic Issues in Developing Countries John Baffoe-Bonnie, Mohammed Khayum, 2003-04-30 Important lessons for policy makers are provided here as contributors evaluate the effectiveness of domestic economic policies and the recommendations of international organizations such as the World Bank regarding the economic development of developing countries Challenges posed by debt problems corruption population dynamics poverty and the absence of adequate human and physical capital are highlighted Contributors cast doubts on the conclusions of the prevailing theories of economic development with patterns of

economic change over the course of the 20th century Their findings point out the issue of inadequate social capability as a critical factor in understanding the lack of economic development in many developing countries They suggest that contemporary theorizing tends to pinpoint necessary but insufficient conditions for the successful implementation of development strategies in these countries
