Economics And Social Interaction Accounting For Interpersonal Relations:

Economics and Social Interaction Benedetto Gui, Robert Sugden, 2014-05-14 An innovative 2005 study exploring what economics can tell us about interpersonal relationships *Interdisciplinary Economics* Wilfred Dolfsma, Stefan Kesting, 2013-07-18 Kenneth Boulding was a prolific writer across so many different fields that not only is he often much referred to and cited he is considered a core member of many of these fields Boulding is the quintessential interdisciplinary scholar He died in 1993 but he has left a legacy in economics conflict studies systems theory ecology biology communication studies and ethics As an economist proper he has tested and expanded the boundaries of that field without unduly invading and undermining the expertise and established knowledge of the other social sciences This proposed volume will allow scholars who have worked or are starting to work in areas that Boulding has initiated established and made a continued contribution to to understand the links between these fields and other related ones The volume will establish a source of inspiration for some time to come *Needs and Barriers of Prosumerism in the Energy Transition Era* Lucia Ruggeri, 2021-03-05 The effective enforcement of energy transition is one of the keys to the successful fight to climate change The interplay between the sustainable UN Agenda 2030 goals is a new interesting ground for the development of intersectorial and multidisciplinary studies Thanks to University of Camerino which is focused on the contamination between different scientific areas and really engaged in strengthening international research a group composed by more than forty researchers of ten different nationalities is studying the energy policies and the new phenomenon of energy prosumerism This book is the first direct result of the research activities granted by University of Camerino under the Programme FAR 2019 in the ECPE Project Enabling Consumer to become Prosumer in the Energy transition era more details about the project ECPE are available at <https://ecpe.unicam.it> The object of this book is to collect and analyze the main barriers to self consumption and prosumerism Difficult as it is to discuss all obstacles in a single volume the book focuses on selected barriers which impede the development of new types of fossil free energy production and consumption The energy communities could play a central role in the implementation of the energy transition strategies but legal social economic political and cultural barriers can hinder their spread To analyze the barriers and to find how to eliminate the obstacles to energy transition policies is pivotal to enhance research activities focused on the new EU Regulatory framework Most in general it is crucial a multidisciplinary approach focused on the fight to climate change and the implementation of sustainable development In this book are collected several articles which offer a different perspective on the energy transition barriers from different points of view and under different methodologies The book is composed of four parties The first one is dedicated to the analysis of the methodology and the results offered by questionnaires supplied online in two languages Italian English The survey is the basis of the Working Paper which is the deliverable of the ECPE Work Programme n 2 and which constitutes the ground for a discussion into the research group The second part of the volume

collects the contributions focused on the social and economic barriers to prosumerism while the third one is dedicated to a description of failure cases of self consumption Lesson learned by failure experiences in the world could favour a good implementation of the new EU Directive Renewable Energy Directive 2018 2001 RED II and Directive on common rules for the internal market for electricity 2019 944 IEM in Italy an European Country which is strategic in the Energy policy of the Foreword 1 Mediterranean area The last part of the book is composed of the visions and perspectives offered by Italian testimonials engaged as actors in the new energy market with different roles I am grateful for the generous support given by the editorial staff composed by Gopi Battinemi Roberto Garetto Federico Pascucci Giovanni Russo and Karina Zabrodina precious collaborators and valid researchers Thanks also to the Scientific Committee which honoured our work Marine Cornelis Francisco Lled Yag e and Luis E Quintero As editor I am sure you will appreciate the volume which would like to offer an insight on new issues and challenges offered by the energy transition era

Policies for Happiness

Stefano Bartolini,Ennio Bilancini,Luigino Bruni,Pier Luigi Porta,2016-03-11 In recent years debates on the economics of happiness have shown that over the long term well being is influenced more by social and personal relationships than by income This evidence challenges the traditional economic policy paradigm that has emphasized income as the primary determinant of well being This volume brings together contributions from leading scholars to ask What should be done to improve the quality of people s lives Can economic and social changes be made which enhance well being What policies are required How do policies for well being differ from traditional ones targeted on redistribution the correction of market inefficiencies and growth Are there dimensions of well being that have been neglected by traditional policies Is happiness a meaningful policy target The volume presents reflections and proposals which constitute a first step towards answering these questions

Cooperatives in the Global Economy

Tapas R. Dash,2021-05-19 Cooperatives in the Global Economy presents a unique collection of research based chapters contributed by leading social and economic thinkers that provide critical insights into how the cooperative business model

meets the challenges of the complex global problems in today's competitive economy. Apart from theoretical arguments in favor of the value-based cooperative business model, this book presents the performance indicators of various forms of cooperatives, their potentialities and challenges they face across borders. The contributors reexamine how cooperatives empower the marginalized population of the world by bringing them into the mainstream of socio-economic activities through creating employment opportunities, working towards alleviation of poverty, ensuring for more equitable distribution of scarce resources and providing the basis for a sustainable economy and its meaningful growth. Today in the global competitive economy, the challenges for cooperatives are enormous due to their particular value commitments, forms of incorporation and organizational structures. In spite of the presence of several challenges, cooperatives promote economic growth and social justice. In this context, this book also presents the critical roles of cooperatives in balancing economic, social and environmental concerns to build a better equitable and sustainable world.

The Nonprofit Human Resource Management Handbook Jessica Word, Jessica Sowa, 2017-06-26. As an increasing number of individuals go to work in the nonprofit sector, nonprofit managers need support on how best to build their human resource management capacity. They need to know what systems to examine, what questions to ask, and how to ensure they are managing people in a legal manner and as effectively as possible given their particular resource constraints. Important questions include: Do we have a clear philosophy, one that aligns with our nonprofit mission and values and allows us to treat our employees as the professionals they are? How do we select, develop, and retain the best people who will produce high value, high performance work, and how do we do so with limited resources? How do we effectively manage our mix of volunteers and paid staff? What do we need to consider to ensure diverse people work together in a harmonious fashion? With all new chapters written by the top scholars in the field of nonprofit HRM, these are but a few of the many questions that are addressed in this timely volume. These scholars delve into their particular areas of expertise, offering a comprehensive look at theories and trends, legal and ethical issues, how to build HRM from recruitment management, labor relations to training and appraisal, as well as topics in diversity, technology, and paid versus volunteer workforce management. This essential handbook offers all core topic coverage as well as countless insider insights, additional resource lists, and tool sets for practical application. With chapters grounded in existing research but also connecting research to practice for those in the field, *The Nonprofit Human Resource Management Handbook* will be required reading for a generation of scholars, students, and practitioners of nonprofit human resource management.

Territorial Water Cooperation in the Central Plateau of Iran Majid Labbaf Khaneiki, 2018-11-09. This book tries to answer the question: how different communities in such an arid area as the Iranian central plateau could have shared their limited water resources in a perfect harmony and peace over the course of history? Garnett Jr., Paul Lewis, Lenore T. Ealy, 2014-11-27 Since the end of the Cold War the human face of economics has gained renewed visibility and generated new conversations among economists and other social theorists The monistic mechanical economic systems that characterized the capitalism vs socialism debates of the mid twentieth century have given way to pluralistic ecologies of economic provisioning in which complexly constituted agents cooperate via heterogeneous forms of production and exchange Through the lenses of multiple disciplines this book examines how this pluralistic turn in economic thinking bears upon the venerable social theoretical division of cooperative activity into separate spheres of impersonal Gesellschaft commerce and ethically thick Gemeinschaft community Drawing resources from diverse disciplinary and philosophical traditions these essays offer fresh critical appraisals of the Gemeinschaft Gesellschaft segregation of face to face community from impersonal commerce Some authors issue urgent calls to transcend this dualism whilst others propose to recast it in more nuanced ways or affirm the importance of treating impersonal and personal cooperation as ethically epistemically and economically separate worlds Yet even in their disagreements our contributors paint the process of voluntary cooperation the space commerce and community with uncommon color and nuance by traversing the boundaries that once separated the thin sociality of economics as science of commerce from the thick sociality of sociology and anthropology as sciences of community This book facilitates critical exchange among economists philosophers sociologists anthropologists and other social theorists by exploring the overlapping notions of cooperation rationality identity reciprocity trust and exchange that emerge from multiple analytic traditions within and across their respective disciplines
