Ecosystem Function In Heterogeneous Landscapes:

Ecosystem Function in Heterogeneous Landscapes, 2005-12-15 This groundbreaking work connects the knowledge of system function developed in ecosystem ecology with landscape ecology's knowledge of spatial structure. The book elucidates the challenges faced by ecosystem scientists working in spatially heterogeneous systems, relevant conceptual approaches used in other disciplines, and in different ecosystem types, and the importance of spatial heterogeneity in conservation resource management. *Ecosystem Function in Heterogeneous Landscapes* Gary M. Lovett, Clive Jones, Monica G. Turner, Kathleen C. Weathers, 2008-11-01 This groundbreaking work connects the knowledge of system function developed in ecosystem ecology with landscape ecology's knowledge of spatial structure. The book elucidates the challenges faced by ecosystem scientists working in spatially heterogeneous systems, relevant conceptual approaches used in other disciplines, and in different ecosystem types, and the importance of spatial heterogeneity in conservation resource management. **Fundamentals of Ecosystem Science** Kathleen C. Weathers, David L. Strayer, Gene E. Likens, 2021-07-26 *Fundamentals of Ecosystem Science* Second Edition provides a comprehensive introduction to modern ecosystem science covering land, freshwater, and marine ecosystems. Featuring full color images to support learning and written by a group of experts, this updated edition covers major concepts of ecosystem science, biogeochemistry, and energetics. Case studies of important environmental problems offer personal insights into how adopting an ecosystem approach has helped solve important intellectual and practical problems. For those choosing to use the book in a classroom environment or who want to enrich further their reading experience, teaching and learning assets are available at Elsevier.com. Covers both aquatic, freshwater, and marine and terrestrial ecosystems with updated information. Includes a new chapter on microbial biogeochemistry. Features vignettes throughout the book with real examples of how an ecosystem approach has led to important change in policy, management, and ecological understanding. Demonstrates the application of an ecosystem approach in synthesis chapters and case studies. Contains new coverage of human-environment interactions. **Landscape Ecology in Theory and Practice** Monica G. Turner, Robert H. Gardner, 2015-10-29 This work provides an in-depth analysis of the origins of landscape ecology and its close alignment with the understanding of scale, the causes of landscape pattern, and the interactions of spatial pattern with a variety of ecological processes. The text covers the quantitative approaches that are applied widely in landscape studies, with emphasis on their appropriate use and interpretation. The field of landscape ecology has grown rapidly during this period; its concepts and methods have matured, and the published literature has increased exponentially. Landscape research has enhanced understanding of the causes and consequences of spatial heterogeneity and how these vary with scale, and they have influenced the management of natural and human-dominated landscapes. Landscape ecology is now considered mainstream, and the approaches are widely used in many branches of ecology and are applied not only in terrestrial settings but also in aquatic and marine systems. In response to these rapid developments, an updated

edition of *Landscape Ecology in Theory and Practice* provides a synthetic overview of landscape ecology including its development the methods and techniques that are employed the major questions addressed and the insights that have been gained

Headway in Spatial Data Handling Anne Ruas, Christopher Gold, 2008-08-09 Geographic information is a key element for our modern society Put simply it is information whose spatial and often temporal location is fundamental to its value and this distinguishes it from many other types of data and analysis For sustainable development climate change or more simply resource sharing and economic development this information helps to facilitate human activities and to foresee the impact of these activities in space as well as inversely the impact of space on our lives The International Symposium on Spatial Data Handling SDH is a primary research forum where questions related to spatial and temporal modelling and analysis data integration visual representation or semantics are raised The first symposium commenced in 1984 in Zurich and has since been organised every two years under the umbrella of the International Geographical Union Commission on Geographical Information Science <http://www.igugis.org> Over the last 28 years the Symposium has been held in st 1 Zurich 1984 nd 2 Seattle 1986 rd 3 Sydney 1988 th 4 Zurich 1990 th 5 Charleston 1992 th 6 Edinburgh 1994 th 7 Delft 1996 th 8 Vancouver 1998 th 9 Beijing 2000 th 10 Ottawa 2002 th 11 Leicester 2004 th 12 Vienna 2006 th This book is the proceedings of the 13 International Symposium on Spatial Data Handling

Landscape Function and Disturbance in Arctic Tundra James F. Reynolds, John D. Tenhunen, 2013-04-17 Following the discovery of large petroleum reserves in northern Alaska the US Department of Energy implemented an integrated field and modeling study to help define potential impacts of energy related disturbances on tundra ecosystems This volume presents major findings from this study A broad range of basic and applied research topics are examined ranging from ecosystem physiology and biogeochemistry to landscape models that quantify the impact of road building on tundra hydrology and ecosystem structure It is an important resource for researchers and students interested in arctic ecology as well as for environmental managers concerned with practical issues of disturbances

Plant Microbiome: Stress Response Dilmaza Egamberdieva, Parvaiz Ahmad, 2018-02-06 This book presents state of the art research on the many facets of the plant microbiome including diversity ecology physiology and genomics as well as molecular mechanisms of plant

microbe interactions Topics considered include the importance of microbial secondary metabolites in stimulating plant growth induced systemic resistance tolerance to abiotic stress and biological control of plant pathogens The respective contributions show how microbes help plants to cope with abiotic stresses and represent significant progress toward understanding the complex regulatory networks critical to host microbe interaction and plant adaptation in extreme environments New insights into the mechanisms of microbial actions in inducing plant stress tolerance open new doors for improving the efficacy of microbial strategies and could produce new ways of economically increasing crop yields without harming the environment As such this book offers an essential resource for students and researchers with an interest in plant microbe interaction as well as several possibilities for employing the plant microbiome in the enhancement of crop productivity under future climate change scenarios

Satellite Remote Sensing and the Management of Natural Resources Nathalie Pettorelli, 2019-05-16 The ability to anticipate the impacts of global environmental changes on natural resources is fundamental to designing appropriate and optimised adaptation and mitigation strategies However this requires the scientific community to have access to reliable large scale information on spatio temporal changes in the distribution of abiotic conditions and on the distribution structure composition and functioning of ecosystems Satellite remote sensing can provide access to some of this fundamental data by offering repeatable standardised and verifiable information that is directly relevant to the monitoring and management of our natural capital This book demonstrates how ecological knowledge and satellite based information can be effectively combined to address a wide array of current natural resource management needs By focusing on concrete applied examples in both the marine and terrestrial realms it will help pave the way for developing enhanced levels of collaboration between the ecological and remote sensing communities as well as shaping their future research directions Satellite Remote Sensing and the Management of Natural Resources is primarily aimed at ecologists and remote sensing specialists as well as policy makers and practitioners in the fields of conservation biology biodiversity monitoring and natural resource management

Ecology Research Progress Sebastián I. Muñoz, 2007 The new book presents important recent research on ecology which is the study of the interrelationships between organisms and their environment including the biotic and abiotic components There are at least six kinds of ecology ecosystem physiological behavioural population and community specific topics include Acid Deposition Acid Rain Revisited Biodiversity Biocomplexity Carbon Sequestration in Soils Coral Reefs Ecosystem Services Environmental Justice Fire Ecology Floods Global Climate Change Hypoxia and Invasion

Linking Ecology and Ethics for a Changing World Ricardo Rozzi, S.T.A. Pickett, Clare Palmer, Juan J. Armesto, J. Baird Callicott, 2014-02-06 To comprehensively address the complexities of current socio ecological problems involved in global environmental change it is indispensible to achieve an integration of ecological understanding and ethical values Contemporary science proposes an inclusive ecosystem concept that recognizes humans as components Contemporary environmental ethics includes eco social justice and the realization that as important as biodiversity is cultural

diversity inter cultural inter institutional and international collaboration requiring a novel approach known as biocultural conservation Right action in confronting the challenges of the 21st century requires science and ethics to be seamlessly integrated This book resulted from the 14th Cary Conference that brought together leading scholars and practitioners in ecology and environmental philosophy to discuss core terminologies methods questions and practical frameworks for long term socio ecological research education and decision making
