Essays in Transportation Economics and Policy Jose A. Gomez-Ibanez, William B. Tye, Clifford Winston, 2011-01-01 This comprehensive survey of transportation economic policy pays homage to a classic work *Techniques of Transportation Planning* by renowned transportation scholar John R Meyer With contributions from leading economists in the field it includes added emphasis on policy developments and analysis The book covers the basic analytic methods used in transportation economics and policy analysis focuses on the automobile as both the mainstay of American transportation and the source of some of its most serious difficulties covers key issues of urban public transportation and analyzes the impact of regulation and deregulation on the U S airline railroad and trucking industries In addition to the editors the contributors are Alan A Altshuler Harvard University Ronald R Braeutigam Northwestern University Robert E Gallamore Union Pacific Railroad Arnold M Howitt Harvard University Gregory K Ingram The Wold Bank John F Kain University of Texas at Dallas Charles Lave University of California Irvine Lester Lave Carnegie Mellon University Robert A Leone Boston University Zhi Liu The World Bank Herbert Mohring University of Minnesota

Steven A Morrison Northeastern University Katherine M O Regan Yale University Don Pickrell U S Department of Transportation John M Quigley University of California Berkeley Ian Savage Northwestern University and Kenneth A Small University of California Irvine *National Transportation Planning* Adib Kanafani, Daniel Sperling, 2012-12-06 Soon after starting work on the development of a methodology for national transportation planning in Venezuela we realized the importance of an integrated management process for such an effort We also realized the absence in the literature of specific guidelines on how to manage and conduct a transportation planning effort The literature on the subject of national transportation planning is predominantly theoretical and technical in nature To a large extent the absence of literature on management and broad based methodological approaches reflects the limited and ad hoc nature of the experience in national transportation planning This book is an attempt to fill that gap The main objective of the book is to show one way by which a methodology for national transportation planning can be integrated into a process management framework It reports on the experience that the authors had in the Venezuelan case as well as in earlier national planning efforts The book is not intended as a theoretical discussion of planning Instead it adopts a particular theoretical stand and proceeds on that basis to develop a program for applying a specific methodology The intention is to leave as much of the details and elaborations of that methodology to the user This is motivated by two considerations The first is a pragmatic attempt to limit the scope of the book
