Economic Development In Southeast Asia:

The Economic Development of South-East Asia C. D. Cowan, 2012 First published in 1964 The Economic Development of South East Asia Studies in economic history and political economy contains eight papers originally written for a study group at the School of Oriental and African Studies in London The papers edited by Professor C D Cowan are written against a background of economic underdevelopment in large parts of Asia Economic problems increasingly plagued the governments of Asia after the Second World War and while Western governments were willing to help foster economic development relations with Asian governments were somewhat hindered by the heritage of their colonial past Problems also related to the growth of traditional trading ports and export crops and to the importation of colonial regimes western funds and skills in the nineteenth century Such developments come under the loosely generalised concept of imperialism with its strongly emotional overtones whose use impedes the objective assessment and analysis of facts While we understand a good deal about conditions of economic growth in the West much of what has fostered or retarded growth in other parts of the world remains less clear

Development and Challenge Tai-Chee Wong, Mohan Singh, 1999 As Southeast Asia sheds its colonial vest its development and transformation into young nation states pick up momentum as globalization and technology become the backdrop of the new millennium Some of the most crucial issues confronting Southeast Asia today are addressed in this volume as ASEAN takes stock of its achievements after three decades and recaptures its vision for the new millennium The post colonial era in the region signaled a reconceptualization of geographical space as Southeast Asian countries established themselves territorially and harnessed their energies to work collectively in the new global equation This led to formation of organizations such as ASEAN AFTA and the economic growth triangles which represent a clear Southeast Asian voice internationally Paradoxically development in Southeast Asia brings new challenges as globalization and new economic trends lead to intensive intra regional population movements the rise of megacities the search to resolve

Southeast Asia's Misunderstood Miracle Jomo K.S., 2019-06-04 The debate on the major factors contributing to Southeast Asian industrialization continues unabated As might be expected there is much at stake in this debate The debate is largely ideological in nature and partly centers on the role and contribution of state interventions and other institutions in market processes in the context of late industrialization At the risk of caricaturing the debate on the one hand one finds the dominant and more influential position held by those who blame the state for all that has gone wrong and credit the market for all that has turned out right on the other hand the minority statist extreme position basically credits most major economic achievements in East Asia to appropriate interventions by developmentalist states While very few people would actually fully identify with either of these caricatured extremes much of the discussion actually gravitates around either of these poles

Southeast Asia beyond Crises and Traps Boo Teik Khoo, Keiichi Tsunekawa, Motoko Kawano, 2017-09-18 This book examines five countries in South East Asia that are instructive case studies of how the region has had to negotiate pathways of development beyond crises and traps At two ends of just one decade 1997 2007 Indonesia Malaysia the Philippines Thailand and Vietnam all had to weather the shocks of an East Asian financial crisis and a global financial crisis Some economies might have buckled completely under those shocks and been condemned to long term stagnation Yet these five economies part of the larger Asian region emerged with continued if slower economic growth An important theme of this book is that their resilience has been partly derived from the pursuit of growth and competitiveness along less known or recommended pathways The chapters of this book take a novel approach to South East Asia's search for growth and improvement They do not begin by evaluating how far macro level performances would take a particular country towards high income status Instead they provide original insights into actual cases of intermediate ways of achieving growth upgrading and income improvement in non privileged sectors Such cases may hold more relevant lessons for the majority of developing countries than the experiences of highly developed economies

State Structure, Policy Formation, and Economic Development in Southeast Asia Antoinette R. Raquiza,2013-06-17 Why do some small developing countries industrialize and others don t What factors account for different economic performance among states that are vulnerable to external shocks crony capitalism and political instability This book argues that the answer lies in the structuring of state power specifically the way different sets of governing elites political leaders and economic technocrats are embedded in political organisations and state institutions and the way these elites relate to each other in the economic development policy process Conducting a comparative historical analysis of Thailand and the Philippines the book argues that the institutional settings of governing elites influence economic outcomes In Thailand political power traditionally connects to state institutions in ways that has limited the impact of political turnovers and global downturns conducive to long term industrial activities In contrast Philippine state power derives from family networks that merge social and political power suited to fast moving short term commercial interests In focusing on this political and institutional story the author analyses the current development dilemmas of countries weighed down by historical legacies of unstable regimes dependency and social conflict and how they are likely to develop in the future

The Transformation of Southeast Asian Economies

Teofilo C. Daquila,2007 This book analyses the growth development and crisis experiences of the Southeast Asian economies in particular Indonesia Malaysia the Philippines Singapore and Thailand also known as ASEAN 5 The proposition is developed that the robust economic performance of the Southeast Asian economies during the past four decades has been attributed to the various factors developments and independent national policies which have been pursued by the individual member countries rather than to any regional economic framework The book covers eleven topics which is suitable for a one semester course on the economics of Southeast Asia Also it has a narrower area coverage as it focuses only on the five economies namely Indonesia Malaysia the Philippines Singapore and Thailand The sectoral treatment of the crisis impact and the analytical treatment of policy responses to the crisis differentiate this book from other publications on the same topic Finally the book provides an analysis of national developments policies and factors which have contributed to the economic transformation of the respective Southeast Asian economies Economic Development in South Asia M Kidrond,2015-12-30

Systemic Vulnerability and Sustainable Economic Growth Bryan K. Ritchie,2010-01-01 For many developing countries economic growth is an elusive quest Both economists and policy makers have long known that issues such as education investment and infrastructure are necessary ingredients for development and yet only a very small number of countries seem to be able to come up with the right mix of these ingredients Bryan Ritchie demonstrates how political relationships among government business academic and labor leaders create different incentives for economic actors to make key decisions to promote economic upgrading and sustainable development He reveals how these decisions affect matters such as bureaucratic structures the language of education a focus on technology and innovation and the inclusion of labor in business strategy These shape the institutional structures that in turn create the foundation of government policy The policies and the political relationships that form around them can be beneficial or detrimental to the economic development of the country This insightful study shows how the level of systemic vulnerability which is a combination of resource endowments domestic conflict and external military security determines which forms they take Systemic Vulnerability and Sustainable Economic Growth will be warmly welcomed by academics and researchers of political science economics development economics particularly and Asian studies Policy makers will find invaluable insights such as how government bodies can successfully incorporate actors from the private sector The book will also appeal to business leaders wishing to know why policy makers act the way they do
