Economic Divergence In The European Community:

Economic Divergence in the European Community Michael Hodges, William Wallace, 2025-12-29 Economic Divergence in the European Community 1981 looks at the widening differences between the economies of the members of the EC The designers of the common market had assumed that the removal of trade barriers would bring about a natural convergence among national economies This book closely examines these assumptions **Economic Divergence in the European Community**, 1981 **Europe Under Stress** Yao-su Hu, 2013-10-22 Europe Under Stress Convergence and Divergence in the European Community is the second of two volumes which flow from a Chatham House project on the political implications of economic divergence in the European Community funded by the Social Science Research Council This second volume offers an interpretation of the problems that divergence poses for the European Community in a number of key sectors from the perspective of a political economist This book begins with a discussion of the concepts of convergence and divergence followed by an explanation of the methodology adopted in this book The remaining chapters are organized into two parts The chapters in Part I examine the attitudes of the major EEC member states to the convergence divergence issue and what the terms mean for each of them This part also attempts to relate these positions to the concerns and interests of the countries involved The chapters in Part II analyze the impact of economic divergence on community policies

Decision-making in the European Community Emil Joseph Kirchner, 1992 In this first major assessment of EC decision making at the highest levels for ten years Emil Kirchner examines the Council Presidency's role in European integration The author demonstrates how the EC Council Presidency plays a crucial role in the integration process enhanced by the Single European Act and the two Intergovernmental Conferences on EMU and Political Union He evaluates the balance and distribution of power between national and Community actors and asks whether the Council Presidency is primarily an instrument to maintain national control of EC decision making rather than a device for promoting integration He sheds light on the negotiations which led to the SEA and the two Intergovernmental Conferences and argues for a new interpretation of the relationship between the EC and its constituent states EC decision making is not characterised by a transfer of powers from the national to the EC level but by a sharing of competences between national and Community institutions and a pooling of sovereignties among member governments that is analogous to co operative federalism Decision making in the European Community will be vital reading for political scientists and students interested in the EC and for all those seeking to understand European integration potentially the 1990s most important political development

Convergence, Cohesion and Integration in the European Union R. Leonardi, 1995-01-09 Convergence Cohesion and Integration in the European Union tackles the fundamental theoretical and empirical issues underlying the process of European integration Two basic arguments underlie the book The first is that economic convergence in postwar Europe has reduced the disparities between regions and that this has been an important accelerator of the drive for integration The

second is that in contrast to the situation before 1985 when nation states dominated the move to integration grass roots pressure has been the dominant force since the Single European Act and the preparation for the single market

European Communities John Paxton,1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community s target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992

Economic Citizenship in the European Union Paul Teague,2005-10-25 Paul Teague explores the macro economic productive and institutional pressures faced by Europe s social model and assesses a number of economic and political programmes aimed at resolving the crisis It also considers the role of the European Union building a social dimension to the European economy The findings suggest that the future of traditional institutions of Social Europe is under threat However they also stress that we are not on the threshold of the Americanisation of European life This study finds that the influential political forces that reject the dismantling of Europe s social model should not be preoccupied with defending inherited institutions Instead this book argues that they should encourage the construction of new forms of social solidarity compatible with the complexities of modern economic life

Conflict and Change in EU Budgetary Politics Johannes Lindner, 2006-02-27 Why did the European Union experience a stark variation in the levels of conflict between the late 1970s when budgetary disputes dominated European politics and the 1990s when political actors were able to settle upon budgetary agreements without major conflicts This book responds to this key question with a two step argument Its first part shows that decision making rules can be regarded as a key determinant of the level of conflict in EU budgetary politics It details far reaching reform in 1988 reduced conflict because it introduced an institutional setting for multiannual budget planning that corrected the deficiencies of the original budget treaty Having identified institutional change as the trigger for the reduction of conflict the second part of this study focuses on the 1988 reform It shows how a number of reproduction mechanisms prevented major institutional change in the 1970s and early 1980s When these reproduction mechanisms lost force a reform became possible and a new institutional setting emerged in 1988 These findings deliver a sharp insight into the interplay between rules and conflict in the still evolving political system of the EU Moreover by identifying precise conditions for the occurrence of institutional change and by linking political performance of institutions to their stability this is a significant contribution to institutionalist research in social science This book is an excellent resource for students and scholars of the European Union Political Science International Relations Public Policy and Public Finance
