Economic Progress and Economic Crises ... Translated by Elizabeth Sprigge and Claude Napier Johan Henrik ÅKERMAN, Claude NAPIER, Elizabeth SPRIGGE, 1932 Financial Development, Economic Crises and Emerging Market Economies Faruk Ülgen, 2016-08-12 Recurrent crises in emerging markets and in advanced economies in the last decades cast doubt about the ability of financial liberalization to meet the aims of sustainable economic growth and development The increasing importance of financial markets and financial efficiency criterion over economic decisions and policies since the 1980s laid down the conditions of the development process of emerging market economies Numerous crises experienced thereafter gave rise to flourishing work on the links between financialization and economic development Several decades of observations and lessons can now be integrated into economic and econometric models to give more sophisticated and multivariable approaches to financial development with respect to growth and development issues In the markets based and private enterprise dominated world economy two conditions for a successful growth enhancing financial evolution can at least be brought fore macroeconomic stability and consistent supervision But even after the 2007 2008 global crisis economists do not agree on the meaning of those conditions For liberal and equilibrium market economists good finance and supervision mean market friendly structures while for institutionalists post Keynesian and Marxist economists good finance and supervision must lie in collectively designed and managed public structures Drawing heavily on the tumultuous crises of the 1990s 2000s this book argues that those experiences can shed light on such a crucial issue and lead economic theory and policy to go beyond the blindness of efficient free markets doctrine to economic catastrophes It also points to new challenges to global stability in the wake of reconfiguration of international financial arena under the weight of major emerging market economies
