Economic Modernization Of Spain 1830 1930 Pb:

The Foundations of Civil War Francisco J. Romero Salvado, 2016-04-29 This book analyzes the decay of Liberal politics in Spain as the regional version of the general crisis that engulfed most of Europe between 1916 and 1923 Romero enriches the important wider debate about this watershed period of European history when in the face of unprecedented mass social protest and political mobilization incumbent governing elites struggled to find a valid formula of social containment in the dawning of mass politics which also saw the spread of the radical new doctrines of Bolshevism and Fascism Above all this book examines Spain's crisis of modernization a process marked by complex social and political realignments through which the nature of civil society was profoundly altered It resulted in an unprecedented spiral of violence and a polarization that firstly led to an authoritarian formula of social control in 1923 and ultimately to the outbreak of civil war in 1936

The Economic Modernization of Spain, 1830-1930 Nicolás Sánchez-Albornoz, 1987-01-01 [The Economic Modernization of Spain, 1830-1930](#) Nicolás Sánchez-Albornoz, 1987 Those readers with some understanding of how the world economy has radically changed since the Industrial Revolution will probably find that a great deal of their information will most likely be based on how the leading economies performed during the process of change In the tightening network of global economic interdependence it can also be important to be aware of the steps taken by smaller and initially less successful nations as they moved toward modernization even when their arrival at full industrial transformation has been somewhat late book that was first presented by historians meeting to discuss the structural transformation of the Spanish economy during the past two centuries The approach is twofold first along lines of major economic sectors and then according to major regions

Historical Turning Points in Spanish Economic Growth and Development, 1808-2008 Concha Betrán, Maria A. Pons, 2020-06-27 This book analyses the main historical turning points in the Spanish economy and the related challenges it faced It focuses on six turning points that changed the direction of the Spanish economy and identifies the economic social or political origin of these watersheds It also compares the Spanish trajectory with the international one exploring the macroeconomic context in which these turning points happened as well as the external and internal constraints on domestic political choices for a small country like Spain The book focuses on how Spain faced up to each turning point the reforms that were implemented the differences between the Spanish response and that of other countries the results of the policies enacted and what problems were not tackled This is an interesting and unique perspective as most of the turning points in economic history are generally studied from the viewpoint of core countries such as the UK US or Germany The ultimate objective is to learn useful lessons from Spanish economic history in order to better face future turning points **Between**

Empire and Globalization Albert Carreras,Xavier Tafunell,2021-02-22 This book provides a rigorously chronological journey through the economic history of modern Spain always with an eye opened to what happens in the international economy and a focus on economic policy making and institutional change It shows the central theme of the Spanish economy from the late 18th century to the early 21st century is the painful transformation from being a major imperial power to a small nation and later a member of the European Community and a player in a globalized economy It looks in detail at two major issues economic growth and convergence or divergence to the Western European pattern and the permanent tension between the two when assessing historical experience since the industrial revolution This book proposes new visions of the economic past of Spain and provides comparisons over time and space which will be of interest to academics and students of economic history European economic history and more specifically Spanish economic history

Beltrán Tapia,2022 Focusing on the years between 1900 and 1930 a period characterised by significant structural transformations and rapid economic growth this article shows that Spain exhibited abnormally high sex ratios at birth SRB at least until the 1920s Apart from ruling out the possibility that female under registration and different mortality environments solely explain the results reported here the analysis of regional information indicates that SRB were higher in those provinces whose economic structure was dominated by agriculture and manufacturing relative to the service sector In addition during the First World War period which arguably subjected the Spanish economy to an exogenous demand shock increased wages resulted in decreases in SRB in those province years that reported male and female wages Importantly the protective role of female wages was twice as large as that of males Likewise in those provinces that published male but not female wages increases in male wages had the opposite effect and increased the SRB thus further supporting the link between relative labour returns and female neglect around birth As expected the relationship between wages and SRB vanished during the 20s along with the bias in SRB These results stress that gender

discrimination around birth does not necessarily vanishes with economic growth unless this process is not accompanied by expanding labour opportunities for women
