business in this book the author argues that coal is far from dead Some of my key messages are contrary to popular beliefs The importance of coal will further increase in absolute and likely even in relative terms for decades to come Man made CO₂ has no effect on global temperatures and combustion of fossil fuels does not influence the weather We cannot stop the advance of coal we can only make this process as environmentally sustainable as humanly possible Therefore mankind needs to embrace coal as the bridge from the Oil Age to the Solar Age through the New Energy Revolution 4 Industrialized nations have to invest in coal and in all means to more efficiently burn coal in order to truly help the global environment and reduce global dust SOX and NOX emissions **Economic Conditions in Italy** Great Britain.
