

THE ECONOMICS OF DISCRIMINATION

By Gary Becker

*Second Edition – University of Chicago Press
Chicago and London, 1971*

Gary Becker's classical work, *The Economics of Discrimination*, has recently been issued in a second edition. The original edition of this work was published in 1957. It gained its reputation primarily because it was the first serious attempt to deal with the problems of discrimination in an analytically rigorous fashion and to try to reconcile the phenomenon of discrimination with neo-classical economic theory. The second edition includes only minor alterations in the original presentation in the addenda to chapters 4, 8, and 9. Otherwise, Mr. Becker has chosen not to alter his analysis. This procedure may be justified by considerations of the literary propriety of the work. However, Mr. Becker apparently feels that the work stands on the merit of its economic analysis as well.

The Economics of Discrimination defines discrimination with reference to individual taste and coefficients of discrimination defined to measure the psychic cost of dealing with a non preferred group. Mr. Becker then tries to utilize this definition and neo-classical analysis to demonstrate that it is these tastes, and these tastes alone, operating through the market place which lead to observed real world discrimination and the resultant black/white welfare disparities. Whereas it is fruitless to argue with any particular definition of discrimination, one can differ with the analysis if it does not demonstrate what was intended.

Mr. Becker's analysis fails to demonstrate his primary hypothesis. Namely, that it is the taste for discrimination operating through a competitive market that determines the black condition. The analysis is confused, incomplete, and sometimes contradictory. For instance, in Chapter 2, Mr. Becker, argues that Blacks cannot profit from counter discrimination and separation, but in the addenda to Chapter 8, he maintains that black professionals have gained in the South, precisely because of separation. But the major shortcoming of the work is its failure to recognize that there is a basic inconsistency between the tenets of the neo-classical doctrine of competitive markets and the phenomenon of discrimination. For one thing, the assumption that employers can pay workers less than the value of the marginal product (i.e., the wage rate times the discrimination coefficient) is inconsistent with the competitive theory of price determination. For it employers have the "power" to lower the wage rate when they have taste for discrimination, why do they not have the power to

Economics Of Discrimination:

The Economics of Discrimination Gary S. Becker, 2010-08-15 This second edition of Gary S. Becker's *The Economics of Discrimination* has been expanded to include three further discussions of the problem and an entirely new introduction which considers the contributions made by others in recent years and some of the more important problems remaining. Mr. Becker's work confronts the economic effects of discrimination in the market place because of race, religion, sex, color, social class, personality or other non-pecuniary considerations. He demonstrates that discrimination in the market place by any group reduces their own real incomes as well as those of the minority. The original edition of *The Economics of Discrimination* was warmly received by economists, sociologists and psychologists alike for focusing the discerning eye of economic analysis upon a vital social problem: discrimination in the market place. This is an unusual book not only is it filled with ingenious theorizing but the implications of the theory are boldly confronted with facts. The intimate relation of the theory and observation has resulted in a book of great vitality on a subject whose interest and importance are obvious. M. W. Reder, *American Economic Review*. The author's solution to the problem of measuring the motive behind actual discrimination is something of a tour de force. Sociologists in the field of race relations will wish to read this book. Karl Schuessler, *American Sociological Review*.

Handbook on the Economics of Discrimination William M. Rodgers, 2009-01-01 The papers contained in the first part of the book are particularly valuable as a primer for researchers interested in economic discrimination. On this basis alone this book is recommended for researchers seeking an overview of current techniques for assessing economic discrimination. The final section nicely highlights both the importance in understanding the interaction of policy and economic discrimination and the difficulties in isolating policy effects. Education Economics Editor Rodgers has compiled a very useful book that summarizes the current state of the literature on economic discrimination. This reviewer learned something new and interesting in every chapter and particularly appreciated the clear survey of the age discrimination literature. This book will be of value to academics and to those in the legal arena. Highly recommended. J. P. Jacobsen, *Choice*. Discrimination's dynamic nature means that no single theory, method, data or study should be relied upon to assess its magnitude, causes or remedies. Despite some gains in our understanding, these remain active areas of debate among researchers, practitioners and policymakers. The specially commissioned papers in this volume, all by distinguished contributors, present the full range of issues related to this complex and challenging problem. Part 1 explores innovations in methods and data collection that help to provide richer descriptions of inequality. Part 2 reviews empirical evidence on discrimination that people with disabilities, older workers and gay, lesbian and bisexual individuals face. Although discrimination among these groups is not new, this Handbook shows that economists are beginning to more fully document their experiences. Part 3 presents a balanced discussion of anti-discrimination policies and the impact of affirmative action. The methods and data chapters are particularly designed to encourage researchers to utilize the new approaches and develop new data sources. Accessible and

Charles,Jonathan Guryan,2007 This paper tests the predictions about the relationship between racial prejudice and racial wage gaps from Becker s 1957 seminal work on employer discrimination something which has not previously been done in the large economics discrimination literature Using rich data on racial prejudice from the General Social Survey we find strong support for all of the key predictions from Becker about the relationship between prejudice and racial wage gaps In particular we show that relative to white wages black wages a vary negatively with a measure of the prejudice of the marginal white in a state b vary negatively with the prejudice in the lower tail of the prejudice distribution but are unaffected by the prejudice of the most prejudiced persons in a state and c vary negatively with the fraction of a state that is black We show that these results are robust to a variety of extensions including directly controlling for racial skill quality differences

and instrumental variables estimates We present some initial evidence to show that racial wage gaps are larger the more racially integrated is a state's workforce also as Becker's model predicts The paper also briefly discusses familiar criticisms and extensions of the standard Becker model including an argument of our own which like some recent work shows that the model's main predictions can be shown theoretically to survive the effects of long run competition

Law and Economics of Discrimination John J. Donohue (III), 2013 This important volume introduces the reader to the key theoretical and empirical issues concerning the topical field of law and economics of discrimination The book begins with readings from Gary Becker's seminal work on the economics of discrimination followed by a series of papers that try to evaluate the degree of discrimination in labour markets and the extent to which government intervention has reduced this discrimination In addition to examining discrimination on the basis of race gender and sexual orientation in the labour market Professor Donohue explores the problem of discrimination in various consumer markets in the criminal justice sphere in education and in health care Along with an original introduction this valuable collection will be of immense use to both scholars and practitioners with an interest in the law and economics of discrimination

Poverty and Discrimination Kevin Lang, 2011-02-11 Many ideas about poverty and discrimination are nothing more than politically driven assertions unsupported by evidence And even politically neutral studies that do try to assess evidence are often simply unreliable In Poverty and Discrimination economist Kevin Lang cuts through the vast literature on poverty and discrimination to determine what we actually know and how we know it Using rigorous statistical analysis and economic thinking to judge what the best research is and which theories match the evidence

this book clears the ground for students social scientists and policymakers who want to understand and help reduce poverty and discrimination It evaluates how well antipoverty and antidiscrimination policies and programs have worked and whether they have sometimes actually made the problems worse And it provides new insights about the causes of and possible solutions to poverty and discrimination The book begins by asking Who is poor and by giving a brief history of poverty and poverty policy in the United States in the twentieth century including the Welfare Reform Act of 1996 Among the topics covered are the changing definition of poverty the relation between economic growth and poverty and the effects of labor markets education family composition and concentrated poverty The book then evaluates the evidence on racial discrimination in areas such as education employment and criminal justice as well as sex discrimination in the labor market and assesses the effectiveness of antidiscrimination policies Throughout the book is grounded in the conviction that we must have much better empirical knowledge of poverty and discrimination if we hope to reduce them Race & Economics
