Eubanks,Ashley A. Dumas,Heather McKillop,Marius Alexianu,2025-09-26 This book explores the relationship between salt sodium chloride and the development of human societies from a cross cultural and global perspective Although it is not possible to discuss the importance of salt to all ancient and modern societies the geographically and temporally diverse examples highlighted here are used to examine a series of related topics critical to understanding the economic political social and religious impacts of salt through space and time These topics include among others the techniques used to produce salt the individuals responsible for its production its cultural uses and applications its role in cross cultural exchange

and the impact of its circumscribed distribution on settlement patterns and developing complexity In exploring these topics the chapter authors rely on archaeological data to craft their interpretations however as salt itself is largely invisible in the archaeological record other avenues of investigation such as ethnoarchaeology ethnohistory and experimental archaeology are necessary to gain a more complete understanding of this mineral s influence on the development of human cultures Each chapter includes a summary of seminal research within a particular geographic region along with a discussion of recent or on going projects from that area This volume is intended for a professional audience but university students and graduates and readers with an interest in anthropology archaeology ethnoarchaeology or history will find the chapters comprehensible and informative

Handbook of Caribbean Economies Robert E. Looney,2020-11-10 This volume aims to illustrate the uniqueness of the economies of the countries and territories of the Caribbean as well as the similarities they share with other regions While most countries in the region share many of the characteristics of middle income countries theirs is a matter of extremes Their generally small size suggests a fragility not found elsewhere While much of the world is beginning to feel some effects of climate change the Caribbean is ground zero These factors suggest a difficult road ahead but the chapters presented in this volume aim to help to spur the search for creative solutions to the region s problems The chapters written by expert contributors examine the Caribbean economies from several perspectives Many break new ground in questioning past policy mindsets while developing new approaches to many of the traditional constraints limiting growth in the region The volume is organized in four sections Part I examines commonalities including issues surrounding small economies tourism climate change and energy security Part II looks at obstacles to sustained progress for example debt natural disasters and crime In Part III chapters consider the specific role of external influences including the USA and the European Union the People s Republic of China as well as regional co operation The volume concludes in Part IV with country case studies intended to provide a sense of the diversity that runs through the region
