Economy And Society In Prehistoric Europe Changing Perspectives:

Economy and Society in Prehistoric Europe Andrew Sherratt, 1997 This book brings together a classic collection of Andrew Sherratt's work on the economic foundations of prehistoric Europe which have put forward important new ideas about the development of farming pastoralism early technology and trade In a series of contributions that have included wide ranging syntheses and detailed local studies he discusses their implications for the understanding of settlement patterns social structures material culture and less tangible aspects of prehistoric life such as the spread of languages and the use of narcotics

The Oxford Handbook of Neolithic Europe Chris Fowler, Jan Harding, Daniela Hofmann, 2015-03-26 The Neolithic a period in which the first sedentary agrarian communities were established across much of Europe has been a key topic of archaeological research for over a century However the variety of evidence across Europe the range of languages in which research is carried out and the way research traditions in different countries have developed makes it very difficult for both students and specialists to gain an overview of continent wide trends The Oxford Handbook of Neolithic Europe provides the first comprehensive geographically extensive thematic overview of the European Neolithic from Iberia to Russia and from Norway to Malta offering both a general introduction and a clear exploration of key issues and current debates surrounding evidence and interpretation Chapters written by leading experts in the field examine topics such as the movement of plants animals ideas and people including recent trends in the application of genetics and isotope analyses cultural change from the first appearance of farming to the first metal artefacts domestic architecture subsistence material culture monuments and burial and other treatments of the dead In doing so the volume also considers the history of research and sets out agendas and themes for future work in the field

The Poverty of Clio Francesco Boldizzoni, 2011-07-05 The Poverty of Clio challenges the hold that cliometrics an approach to economic history that employs the analytical tools of economists has exerted on the study of our economic past In this provocative book Francesco Boldizzoni calls for the reconstruction of economic history one in which history and the social sciences are brought to bear on economics and not the other way around Boldizzoni questions the appeal of economics over history which he identifies as a distinctly American attitude exposing its errors and hidden ideologies and revealing how it fails to explain economic behavior itself He shows how the misguided reliance on economic reasoning to interpret history has come at the expense of insights from the humanities and has led to a rejection of valuable past historical research Developing a better alternative to new institutional economics and the rational choice approach Boldizzoni builds on the extraordinary accomplishments of twentieth century European historians and social thinkers to offer fresh ideas for the renewal of the field Economic history needs to rediscover the true relationship between economy and culture and promote an authentic alliance with the social

sciences starting with sociology and anthropology It must resume its dialogue with the humanities but without shrinking away from theory when constructing its models The Poverty of Clio demonstrates why history must exert its own creative power on economics

Beastly Questions Naomi Sykes, 2014-08-28 Zooarchaeology or the study of ancient animals is a frequently side lined subject in archaeology This is bizarre given that the archaeological record is composed largely of debris from human animal relationships be they in the form of animal bones individual artifacts or entire landscapes and that many disciplines including anthropology sociology and geography recognise human animal interactions as a key source of information for understanding cultural ideology By integrating knowledge from archaeological remains with evidence from texts iconography social anthropology and cultural geography *Beastly Questions Animal Answers to Archaeological Issues* seeks to encourage archaeological students researchers and those working in the commercial sector to offer more engaging interpretations of the evidence at their disposal Going beyond the simple confines of what people ate this accessible but in depth study covers a variety of high profile topics in European archaeology and provides novel interpretations of mainstream archaeological questions This includes cultural responses to wild animals the domestication of animals and its implications on human daily practice experience and ideology the transportation of species and the value of incorporating animals into landscape research the importance of the study of foodways for understanding past societies and how animal studies can help us to comprehend issues of human identity and ideology past present and future

A Companion to Archaeology John Bintliff, 2008-04-15 A Companion to Archaeology features essays from 27 of the world's leading authorities on different types of archaeology that aim to define the field and describe what it means to be an archaeologist Shows that contemporary archaeology is an astonishingly broad activity with many

contrasting specializations and ways of approaching the material record of past societies Includes essays by experts in reading the past through art linguistics or the built environment and by professionals who present the past through heritage management and museums Introduces the reader to a range of archaeologists those who devote themselves to the philosophy of archaeology those who see archaeology as politics or anthropology and those who contend that the essence of the discipline is a hard science Economic Anthropology Chris Hann, Keith Hart, 2018-06-11 This book is a new introduction to the history and practice of economic anthropology by two leading authors in the field They show that anthropologists have contributed to understanding the three great questions of modern economic history development socialism and one world capitalism In doing so they connect economic anthropology to its roots in Western philosophy social theory and world history Up to the Second World War anthropologists tried and failed to interest economists in their exotic findings They then launched a vigorous debate over whether an approach taken from economics was appropriate to the study of non industrial economies Since the 1970s they have developed a critique of capitalism based on studying it at home as well as abroad The authors aim to rejuvenate economic anthropology as a humanistic project at a time when the global financial crisis has undermined confidence in free market economics They argue for the continued relevance of predecessors such as Marcel Mauss and Karl Polanyi while offering an incisive review of recent work in this field Economic Anthropology is an excellent introduction for social science students at all levels and it presents general readers with a challenging perspective on the world economy today Selected by Choice as a 2013 Outstanding Academic Title **Ancient Warfare** John Carman, Anthony Harding, 2009-11-16 This ambitious and innovative book sets out to establish a new understanding of human aggression and conflict in the distant past Examining the evidence of warfare in prehistoric times and in the early historical period John Carman and Anthony Harding throw fresh light on the motives and methods of the combatants This study marks a significant new step in this fascinating and neglected subject and sets the agenda for many years to come By integrating archaeological and documentary research the contributors seek to explain why some sides gained and others lost in battle and examine the impact of warfare on the social and political developments of early chiefdoms and states Their conclusions suggest a new interpretation of the evolution of warfare from the Stone Age and the Bronze Age through the military practice of the Ancient Greeks and the Romans to the conflicts of the Anglo Saxons and of medieval Europe *Early Riders* Robert Drews, 2004-08-02 In this wide ranging and often controversial book Robert Drews examines the question of the origins of man's relations with the horse He questions the belief that on the Eurasian steppes men were riding in battle as early as 4000 BC and suggests that it was not until around 900 BC that men anywhere whether in the Near East and the Aegean or on the steppes of Asia were proficient enough to handle a bow sword or spear while on horseback After establishing when where and most importantly why good riding began Drews goes on to show how riding raiders terrorized the civilized world in the seventh century BC and how central cavalry was to the success of the Median and Persian empires Drawing on
