Sovereignty, Space and Civil War in Sri Lanka Anoma Pieris, 2018-10-25 Analyses of the Sri Lankan civil war 1983 2009 overwhelmingly represent it as an ethnonationalist contest prolonging postcolonial arguments on the creation and dissolution of the incipient nation state since independence in 1948 While colonial divide and rule policies the rise of ethnonationalist lobbies structural discrimination and majoritarian democracy have been established as grounds for inter ethnic hostility there are other significant transformative forces that remain largely unacknowledged in postcolonial analyses This ambitious multiscalar spatial study of civil war in Sri Lanka offers an intersectional de ethnicised analysis of political sovereignty drawn out by the struggle for territory Based on vital retrospective findings from the five year postwar period when wartime hostilities were still festering it convincingly links ethnonationalism to postnational border politics marketisation militarised securitisation and illiberal democracy This book argues that internecine conflict exposes the implicit violence within nation state formations mass human displacements heighten collective and individual ontological insecurity and neoliberalism makes the nation porous in unforeseen ways Based around three themes normative spaces human mobilities and exilic states it is organised into ten comprehensive chapter based explorations of a range of spatial units including homes cities routes camps and experiences of ruin that were irrevocably politicised by protracted conflict Focusing on their material transformations over a thirty seven year period the book explores what can be known of the war if we look beyond ethnicity to other salient shared geographical features of this embattled history The book uncovers how fealty to exclusionary cultures of political sovereignty aligns us with their violence limiting our capacity for empathy a boundary seemingly exacerbated by neoliberal opportunities Making use of Sri Lanka as

a case study to test geographic architectural and urban methodologies for understanding violence this book acts as a provocation to rethink current readings of the particular case study while reflecting on the more general impact of marketisation and militarisation in Asia It will be of interest to an interdisciplinary audience including those scholars interested in South Asian history politics and civil war South Asian studies border studies geography and architecture and urban studies

Sri Lanka's Remittance Economy Matt Withers, 2019-05-16 Employing a multiscale approach to migration outcomes spanning individual households local communities the macroeconomy and global patterns of capital accumulation this book demonstrates how cumulatively causal processes at structural institutional and agency levels have forged a precariously remittance dependent economy in Sri Lanka This book combines historical structural analysis with qualitative research to contend that remittance inflows have reinforced patterns of uneven development in Sri Lanka At the heart of this argument is a bold critique of remittance capital that inverts the migration development nexus which has come to dominate international policymaking with implications for Sri Lanka and other remittance economies throughout the Global South The author contends that temporary labour migration from Sri Lanka is a process of migration underdevelopment in which remittance inflows ubiquitously considered a key source of capital for developing economies are reinforcing of uneven development at multiple scales and produce unsustainable development outcomes Offering a uniquely systematic critique of remittances as a source of developmental capital for countries of origin such as Sri Lanka this book will be of interest to academics in the field of development studies migration studies and Asian studies

the national securities of a number of South Asian countries in order to discuss a range of issues related to South Asian security The book makes a distinction between traditional and non traditional security While state centric approaches such as bilateral relations between India and Pakistan are considered to be traditional realist approaches to security the promotion of economic environmental and human security reflect global concerns liberal theories and cosmopolitan values The book goes beyond traditional security issues to reflect the changing security agenda in South Asia in the twenty first century and is a useful contribution to studies on South Asian Politics and Security Studies *Including the Excluded in South Asia*

Madhushree Sekher,Radu Carciumaru,2019-10-19 This book analyses and discusses the multiple dimensions of social exclusion inclusion seen in South Asia It not only captures how social exclusion is intrinsic to deprivation or deprivation in itself but also the processes of political engagement and social interactions that the socially excluded develop as strategies and networks for their advancement Consequently the book goes beyond structures or agency and examines the question of a more dynamic approach to provide spaces for the socially excluded to self manage exclusion thereby raising discussions around the contested positions that underlie development discourse on social inequality While social exclusion linked to identities is studied the book argues that hierarchies and inequalities based on social identities cut across and affect various groups of excluded Consequently these phenomena create or lead to various processes of exclusion The book illustrates that social exclusion should not be limited to privileging the differences that characterize the exclusionary processes but should also comprise underpinning strategies of inclusion emphasizing the need to focus on imperatives to include As a result the book acknowledges that social exclusion is not limited to analyzing the different identities that face exclusion but also understanding the systems and processes that create social exclusion or create opportunities for inclusion of the excluded The book addresses readership across academic disciplines including in the growing field of state capacity and governance and practitioners administrators and policy making communities Conclusively the book provides a platform to intensively exchange the multifaceted and critical issue of social exclusion inclusion and thus contributes to inclusive sustainable development discourse **Decolonising Peacebuilding**

New Philanthropy and Social Justice Behrooz Morvaridi, 2016-07-20 Over the past twenty years wealthy individuals and private corporations have become increasingly involved in philanthropy often by establishing foundations targeted at helping to reduce poverty disease and other social problems But as the essays in this interdisciplinary volume show this new philanthropy does not provide a long term solution because it fails to tackle social injustice or the structural reasons for inequality Placing this discussion in a global context this far reaching book questions the political and ideological reasons why rich individuals and companies engage in poverty reduction through philanthropy and suggests that the new philanthropy and social justice debate extends far beyond national boundaries

The Separatist Conflict in Sri Lanka Asoka Bandarage, 2008-11-19 The book provides a detailed historically based analysis of the origin evolution and potential resolution of the civil conflict in Sri Lanka over the struggle to establish a separate state in its Northern and Eastern provinces This conflict between the Sri Lankan government and the secessionist LTTE Liberation Tigers of Tamil Eelam is one of the world s most intractable contemporary armed struggles The internationally banned LTTE is considered the prototype of modern terrorism It is known to have introduced suicide bombing to the world and recently became the first terrorist organization ever to acquire an air force The iron law of ethnicity the assumption that cultural difference inevitably

leads to conflict has been reinforced by the 9 11 attacks and conflicts like the one in Sri Lanka. However, the connections among ethnic difference, conflict, and terrorism are not automatic. This book broadens the discourse on the separatist conflict in Sri Lanka by moving beyond the familiar bipolar Sinhala versus Tamil ethnic antagonism to show how the form and content of ethnicity are shaped by historical social forces. It develops a multipolar analysis which takes into account diverse ethnic groups, intra-ethnic social class, caste, and other variables at the local, regional, and international levels. Overall, this book presents a conceptual framework useful for comparative global conflict analysis and resolution, shedding light on a host of complex issues such as terrorism, civil society, diasporas, international intervention, and secessionism. **The Tyranny of**

Writing Constanze Weth, Kasper Juffermans, 2018-01-25. This book examines the powerful role of writing in society. The invention of writing independently at various places and times in history always stood at the cradle of powerful civilizations. It is impossible to imagine modern life without writing. As individuals and social groups, we hold high expectations of its potential for societal and personal development. Globally, huge resources have been and are being invested in promoting literacy worldwide. So what could possibly be tyrannical about writing? The title is inspired by Ferdinand de Saussure's argument against writing as an object of linguistic research and what he called *la tyrannie de la lettre*. His critique denounced writing as an imperfect, distorted image of speech that obscures our view of language and its structure. The chapters of the book, written by experts in language and literacy studies, go beyond this and explore tyrannical aspects of writing in society through history and around the world, from Medieval Novgorod, the European Renaissance, and 19th-century France and Germany, over colonial Sudan, to postcolonial Sri Lanka and Senegal, and present-day Hong Kong and Central China, to the Netherlands and Spain. The metaphor of tyranny of writing serves as a heuristic for exploring ideologies of language and literacy in culture and society, and tensions and contradictions between the written and the spoken word.

Apostles of Development David C. Engerman, 2025-05-30. The battle against global poverty that began after World War II was a major undertaking engaging economists, engineers, and organizations. Featuring front and centre were six remarkable economists: Amartya Sen, Manmohan Singh, Mahbub ul Haq, Jagdish Bhagwati, Rehman Sobhan, and Lal Jayawardena, all born as colonial subjects in the British Empire and studied at Cambridge University. They represented a new figure on the world scene, the Third World development expert, and played a crucial role in global debates about poverty and development. *Apostles of Development* examines their different economic doctrines and the ongoing debate surrounding economic theory in poor countries compared to rich ones. The lives of these apostles reveal how development did not begin with textbooks but with real-world attempts to solve very specific and pressing problems. Finally, the book emphasizes that development was a Global South project, first and foremost aiming to improve the conditions of the world's poorest countries. It challenges the conventional wisdom that sees development only as a tool of rich countries to dominate or as proof of their humanitarian spirit. It argues that development succeeds not when it follows ideological prescriptions but when it looks for what works. The

fading of grand visions shaped by ideological concerns has been one of the lasting effects of the end of the Cold War The book argues that the best way forward is determined modesty focusing on practical matters such as addressing gross inequality and insisting that development means more than just economic growth Given the salience of questions of economic inequality and the constant visibility of the promises and problems of economic development in the world today this is a timely and important read

Elusive Adulthoods Deborah Durham, Jacqueline Solway, 2017-10-12 Essays on the changing meanings of adulthood in places around the world An important collection that furthers anthropological work on life stages Susan Reynolds Whyte author of *Generations in Africa* Connections and Conflicts *Elusive Adulthoods* examines why in recent years complaints about an inability to achieve adulthood have been heard in societies around the world By exploring the changing meaning of adulthood in Botswana China Sudan Papua New Guinea Russia Sri Lanka Uganda and the United States contributors to this volume pose the problem of What is adulthood and examine how the field of anthropology has come to overlook this meaningful stage in its studies Through these case studies we discover different means of recognizing the achievement of adulthood such as through negotiated relationships with others including grown children and as a form of upward class mobility We also encounter the difficulties that come from a sense of having missed full adulthood instead jumping directly into old age in the course of rapid social change or a reluctance to embrace the stability of adulthood and necessary subordination to job and family In all cases the contributors demonstrate how changing political and economic factors form the background for generational experience and understanding of adulthood which is a major focus of concern for people around the globe as they negotiate changing ways of living

Corruption and Post-Conflict Peacebuilding Dominik Zaum, Christine Cheng, 2012-02-20 This edited volume explores and evaluates the roles of corruption in post conflict peacebuilding The problem of corruption has become increasingly important in war to peace transitions eroding confidence in new democratic institutions undermining economic development diverting scarce public resources and reducing the delivery of vital social services Conflict affected countries offer an ideal environment for pervasive corruption Their weak administrative institutions and fragile legal and judicial systems mean that they lack the capacity to effectively investigate and punish corrupt behaviour In addition the sudden inflow of donor aid into post conflict countries and the desire of peacebuilding actors including the UN the international financial institutions aid agencies and non governmental organisations to disburse these funds quickly create incentives and opportunities for corruption While corruption imposes costs and compromises on peacebuilding efforts opportunities for exploiting public office can also be used to entice armed groups into signing peace agreements thus stabilising post war environments This book explores the different functions of corruption both conceptually and through the lens of a wide range of case studies It also examines the impact of key anti corruption policies on peacebuilding environments The dynamics that shape the relationship between corruption and the political and economic developments in post conflict countries are complex This analysis highlights that fighting corruption is

only one of several important peacebuilding objectives and that due consideration must be given to the specific social and political context in considering how a sustainable peace can be achieved This book will be of great interest to students of peacekeeping and peacebuilding criminology political economy war and conflict studies international security and IR
