The Economy of Europe in an Age of Crisis, 1600-1750 Jan de Vries, 1976-10-29 By relating economic changes to the political backdrop *The Economy of Europe in an Age of Crisis 1600 1750* describes and analyzes the economic civilisation of Europe in the last epoch before the Industrial Revolution The author makes a special effort to apply economic reasoning to the economic forces of the period and challenges some longstanding opinions about what was and was not important in explaining economic performance The significance of this study rests in its identification of the ways a traditional society developed its economy despite the absence of the obvious growth factors of the nineteenth century The approach is consciously comparative problems of interpretation are identified research not yet available elsewhere is incorporated into the text and examples are drawn from minor as well as major countries in western and central Europe Topics dealt with include the development of agriculture and industry foreign and regional trade urbanization a study of demand in explaining economic growth the bourgeoisie and the state

The Age of Wars of

Religion, 1000-1650 Cathal J. Nolan, 2006-04-30 The Age of Wars of Religion saw navies armies armed merchant companies and mercenaries battle one another and local potentates in many lands and along numerous shores Wars of religion were fought in and between all the major religions and civilizations from Europe to China in Africa and in the isolated Americas mixing motives of knightly idealism mercenary greed and competing claims of divine sanction This unparalleled work traces the extraordinary upheavals of the period in military technology competing theologies and civilizational change that were brought about by or impinged upon military conflict It offers nearly 2 000 discrete but cross referenced entries on cultural military religious and political history as well as geography biography and military literature Close to 2 000 entries offer detailed information on the major events places battles figures technologies and ideas one must know to begin to make sense of the past six centuries of global conflicts Though especially ferocious and intense the Wars of Reformation and Counter Reformation fought by Europeans from the 15th through 17th centuries were hardly unique in world or military history The Byzantine Empire bastion of Christian Orthodoxy staggered to the tortuous end of its long conflict with the Ottoman Empire the Great Power of the Sunni Muslim world The Ottomans in turn were still engaged in an equally ancient intra Muslim war between Sunnis and Shi ites In India the Hindu Rajputs and Marathas and also the Sikhs organized armies around religious communities to throw off the Muslim Yoke Mughul Empire and also fought against Christian invaders from Europe As for the isolated Americas ideas of divine kingship sustained by powerful priesthoods and religious warfare also prevailed as exemplified by the Inca and Aztec empires

The Shadow of a Dream Peter A. Coclanis, 1991 Coclanis here charts the economic and social rise and fall of a small but intriguing part of the American South Charleston and the surrounding South Carolina low country Spanning 250 years his study analyzes the interaction of both external and internal forces on the city and countryside examining the effect of various factors on the region s economy from its colonial beginnings to its collapse in the 19th and early 20th centuries

Canada in the European Age, 1453-1919 R.T. Naylor, 2006-07-10 When Canada in the European Age 1453 1919 was first published it reversed traditional methodology by placing Canada s evolution in the context of the rise and fall of empires around the world not just in the Americas R T Naylor contends that the struggle for property and political rights in early nineteenth century Newfoundland is incomprehensible without an understanding of events as distinct as the Afro American slave trade or the Napoleonic Wars the opening of the natural resource frontier of British Columbia makes sense only if seen as another manifestation of the same historical forces that fired the opening shots in the Opium wars in China and the fate of Canada s native peoples may have been different in form but not in essence from that of the aboriginal inhabitants on almost every continent

Peasants and Soldiers Giulio Ongaro, 2016-11-03 This book analyzes the organization of the Venetian military structure in the Mainland Dominion in the Early Modern Period particularly from the point of view of the everyday management of the army by rural communities It explains the evolution of

the Venetian military structure using an economic perspective underlining that the military needs of the Republic had to be constantly moderated by the economic effects of the military requests on the local rural economy but also considering the economic opportunities coming from military contracts

Forging Modernity Martin Hutchinson, 2023-03-20 The Industrial Revolution provided the greatest increase in living standards the world has ever known while propelling Britain to dominance on the global stage In *Forging Modernity* Martin Hutchinson looks at how and why Britain gained this prize ahead of its European competitors After comparing their endowments and political structures as far back as 1600 he then traces how Britain through better policies primarily from the political Tory party diverged from other European countries Hutchinson's Harvard MBA allows a unique perspective on the early industrial enterprises many successes resulted from marketing control systems and logistics rather than from production technology alone while on a national scale the scientific method and commercial competition were as important as physical infrastructure By 1830 through ever improving policies Britain had built a staggering industrial lead half a century ahead of its rivals Then the Tories lost power and policy changed forever In his conclusion Hutchinson shows how changes welcomed by conventional historians caused the decline of Industrial Britain Nevertheless the policies that drove growth ingenuity and rising living standards are still available for those bold enough to adopt them

Civic Politics in the Rome of Urban VIII Laurie Nussdorfer, 2019-04-23 In this colorful depiction of daily political life in Baroque Rome Laurie Nussdorfer argues that the lay persons managed to sustain a civic government under the increased papal absolutism of Urban VIII 1623-1644 who oversaw both sacred and secular life Focusing on the S P Q R the Senate and the Roman People which was ministered from the capitoline Hill she shows that it provided political representation for lay members of the urban elite carried out the work of local government and served as a symbol of the Roman voice in public life Through a detailed study of how civic authorities derived their sense of legitimacy and how lay subjects maneuvered in informal and disguised ways to block or criticize the papal regime the author advances a new way of conceiving politics under an absolute ruler As Nussdorfer analyzes the complex interactions between the lay administration and Urban VIII and his family the papal administration and Romans of the upper and lower classes she also provides fresh insights into the actual practice of early modern government She takes the plague threat of the early 1630s the War of Castro 1641-1644 and the interregnum following the pope's death as important test cases of the state's power in times of crisis Laurie Nussdorfer is Assistant Professor of History and Letters at Wesleyan University Originally published in 1992 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Irregular Armed Forces and their Role in Politics and State Formation Diane E. Davis, Anthony

W. Pereira,2003-01-13 Existing models of state formation are derived primarily from early Western European experience and are misleading when applied to nation states struggling to consolidate their dominion in the present period In this volume scholars suggest that the Western European model of armies waging war on behalf of sovereign states does not hold universally The importance of irregular armed forces militias guerrillas paramilitaries mercenaries bandits vigilantes police and so on has been seriously neglected in the literature on this subject The case studies in this book suggest among other things that the creation of the nation state as a secure political entity rests as much on irregular as regular armed forces For most of the developing world the state s legitimacy has been difficult to achieve constantly eroding or challenged by irregular armed forces within a country s borders No account of modern state formation can be considered complete without attending to irregular forces The Individual Vs. The Public Interest Richard M. Alston,2019-07-11 Central to the controversy surrounding U S natural resources policy is the conflict between environmentalists and proponents of development

Examining the evolution of the philosophies underlying that conflict Dr Alston traces the failure to achieve a unified resources policy to the seemingly incompatible ideological positions held by resource specialists interest groups policymakers economists and foresters His analysis goes beyond his case study of national forest policy to focus on an ancient question basic to policy making in a democratic society How can government provide a sociopolitical framework that accommodates both individual interests and the need for unity in a collective existence Only within this broader framework he argues is it possible to determine the proper division between private and public resource management or the proper role of government in natural resources planning Incorporating a critical evaluation of the development of classical and neoclassical economic theory this work makes clear the need to strike a balance between a strictly individualistic and an ecological point of view Dr Alston illustrates the ideological conflicts that complicate resources planning and explores the possibility of a new ideology capable of accommodating and integrating differences to meet the complex needs of society **The**

Undevelopment of Capitalism Rebecca Jean Emigh,2009 In *The Undevelopment of Capitalism* Emigh argues that the expansion of the Florentine economic market in the fifteenth century helped to undo the development of markets of other economies especially the rural economy of Tuscany As this highly developed urban market penetrated rural regions it actually erased rural market institutions that rural inhabitants had used to organize agricultural production and family life Thus an advanced economy at the time of the late Middle Ages and early Renaissance undeveloped over time The economic development of this region in Italy was delayed as it failed to keep pace with the rest of Europe Using a negative case methodology to show how urban and rural markets change Emigh employs methods of historical sociology and sectoral theories to examine how markets can prosper and suffer at the same time She shows how sectoral relations are crucial to transitions to capitalism and how capitalist development can also contract markets The Social Life of Coffee Brian

Cowan,2008-10-01 What induced the British to adopt foreign coffee drinking customs in the seventeenth century Why did an

entirely new social institution the coffeehouse emerge as the primary place for consumption of this new drink In this lively book Brian Cowan locates the answers to these questions in the particularly British combination of curiosity commerce and civil society Cowan provides the definitive account of the origins of coffee drinking and coffeehouse society and in so doing he reshapes our understanding of the commercial and consumer revolutions in Britain during the long Stuart century Britain's virtuosi gentlemanly patrons of the arts and sciences were profoundly interested in things strange and exotic Cowan explores how such virtuosi spurred initial consumer interest in coffee and invented the social template for the first coffeehouses As the coffeehouse evolved rising to take a central role in British commercial and civil society the virtuosi were also transformed by their own invention

The Rise of Western Power Jonathan Daly, 2013-12-19 The West's history is one of extraordinary success no other region empire culture or civilization has left so powerful a mark upon the world The Rise of Western Power charts the West's achievements representative government the free enterprise system modern science and the rule of law as well as its misdeeds two frighteningly destructive World Wars the Holocaust imperialistic domination and the Atlantic slave trade Adopting a global perspective Jonathan Daly explores the contributions of other cultures and civilizations to the West's emergence Historical geographical and cultural factors all unfold in the narrative Adopting a thematic structure the book traces the rise of Western power through a series of revolutions social political technological military commercial and industrial among others The result is a clear and engaging introduction to the history of Western civilization

Consumption and the World of Goods John Brewer, Roy Porter, 2013-06-17 The study of past society in terms of what it consumes rather than what it produces is relatively speaking a new development The focus on consumption changes the whole emphasis and structure of historical enquiry While human beings usually work within a single trade or industry as producers as say farmers or industrial workers as consumers they are active in many different markets or networks And while history written from a production viewpoint has by chance or design largely been centred on the work of men consumption history helps to restore women to the mainstream The history of consumption demands a wide range of skills It calls upon the methods and techniques of many other disciplines including archaeology sociology social and economic history anthropology and art criticism But it is not simply a melting pot of techniques and skills brought to bear on a past epoch Its objectives amount to a new description of a past culture in its totality as perceived through its patterns of consumption in goods and services Consumption and the World of Goods is the first of three volumes to examine history from this perspective and is a unique collaboration between twenty six leading subject specialists from Europe and North America The outcome is a new interpretation of the seventeenth and eighteenth centuries one that shapes a new historical landscape based on the consumption of goods and services
