Mathematical Works Printed in the Americas, 1554-1700 Bruce Stanley Burdick, 2009-01-22 Burdick's exhaustive research has unearthed numerous examples of books not previously cataloged as mathematical. While it was thought that no mathematical writings in English were printed in the Americas before 1703, Burdick gives scholars one of their first chances to discover Jacob Taylor's 1697 *Tenebrae*, a treatise on solving triangles and other figures using basic trigonometry. He also goes beyond the English language to discuss works in Spanish and Latin such as Alonso de la Vera Cruz's 1554 logic text *the Recognitio Summularum*, a book on astrology by Enrico Martínez, books on the nature of comets by Carlos de Sigüenza y Góngora and Eusebio Francisco Kino, and a 1676 almanac by Feliciano Ruiz, the first woman to produce a mathematical work in the Americas.

Introducción a las Ciencias Sociales Juan Manuel Piña Osorio, María Eugenia Chávez Arellano, 2000 Este libro distingue los conceptos básicos para el estudio del conocimiento social y humano del que se emplea en las ciencias experimentales y los utiliza para explicar su vida cotidiana. Esta obra pertenece a la Serie Integral por Competencias y está completamente apegado a los contenidos correspondientes a la asignatura.

Introducción a Las Ciencias Sociales un Enfoque Constructivista Macario Schettino, 2006 This text combines the theoretical and practical elements that will help the student interpret and understand the problems of their social environment which in turn will allow them to value their place in society to develop their identity and social responsibility. It is prepared with a base rooted in constructive focus and is an invaluable asset that will serve as a platform for the building of knowledge. It includes a classroom planning guide.

It examines the establishment of the first Latin American community in the History of Science and its connections with the international community and various international institutions such as the International Union of History and Philosophy of Science and Technology Division of History of Science and Technology IUHPST DHST. The authors are the same scholars who have been involved in several activities and strategies to professionalize and institutionalize this field in Latin America. They explore the impact of Western educational institutions and theoretical and methodological perspectives on the introduction of the History of Science in several Latin American nations. The book examines the two-way movement of European scholars to Latin America and Latin American students mainly to France. At that time, the organization of congresses in France, Spain, the United States, and other European countries encouraged the participation of Latin American historians of science. Notable events include the Science and Empires congress in Paris 1990, the Ciencia descubrimiento y mundo colonial conference in Madrid 1991, and the International Congresses of History of Science and Technology ICHST. The authors refer to seven Latin Americans who signed the Declaration of Bucharest 1981 to promote the history of sciences in their countries. This initiative led to the establishment of the Latin American Society for the History of Science and Technology LASHST in 1982 under the leadership of Juan José Saldaña, a director of Quipu and Cuadernos de Quipu. With his leadership, existing national societies were reactivated and new ones were created up to ten in four years: Argentina, Brazil, Colombia, Mexico, Chile, Peru, Venezuela, Costa Rica, Ecuador, and Cuba. This effort internationally legitimized Latin American scientific practice, culminating in celebrating the XXI ICHST in Mexico City in 2001. He founded the International Association for Scientific Cultural Diversity IASCUD and became the first Latin American to serve as Secretary General of IUHPST DHS from 2001 to 2005. Through his various actions and activities, Saldaña and the LASHST community were able to promote the institutionalization of the History of Science in Latin America. This book pays a well-deserved tribute to his efforts. **Las glorias de los señores D.J. Aranibar y D.E. Althaus** Dreyfus Hermanos y Cia, 1880 Revista de Ciencias, 1904
