Parliament. House of Commons. Scottish Affairs Committee,2008 On 3 May 2007 combined elections were held in Scotland electing members to the Scottish Parliament and all 32 of Scotland's local councils The number of spoilt ballots cast in these elections was unusually high and difficulties with the electronic counting machines led to the count being suspended in some

constituencies The Electoral Commission engaged Ron Gould CM to conduct an independent assessment of the elections This report examines the findings of the Gould Report and its recommendations some of which have already been accepted in principle by the Scotland Office and by the Scottish Executive including holding the Scottish Parliament and local government elections at different times and producing separate regional and constituency ballot papers for the Scottish Parliament elections Evidence strongly suggests that there are deep problems with the way elections are administered both in Scotland and across the UK which if left unaddressed could again create difficulties in the future Any changes to the way in which elections are carried out must be accompanied by rigorous research and testing the absence of such research and testing was a major failing that led to the problems of 3 May There were failings on the part of the Scotland Office where lengthy delays disrupted election planning and led to weak contingency arrangements The Electoral Commission did not do enough to warn of potential problems with the ballot The use of e counting has been subject to particular criticism Although electronic counting may have the potential to produce results more quickly in these elections it did not operate efficiently or transparently Any future proposals must place the needs of the voter and the interests of transparency far above the limitations of any given technology *The Politicos Guide to the 2015 General Election* Iain Dale,2014-09-30 As the 2015 general election looms on the horizon the only thing anyone can seem to agree on is that it will be unpredictable not least because for the first time in our history we are experiencing the brave new world of four party politics Here in one volume is everything you need to know about what is shaping up to be one of the most exciting general elections of the last twenty years In this unique guide to the state of the parties policies and polls you ll find expert predictions and commentary from political pundits as well as all the facts and figures you need to make an informed decision at the ballot box This essential guide includes Analysis of key marginal seats Information about demographics voting intentions and past electoral behaviour Examples of historical precedent Lists of prospective candidates Profiles of the main party leaders Articles on the role of social media and the traditional media Breakdowns of regional and constituency data A book that will appeal to enthusiastic politicos and inquisitive voters alike this is the essential guide to the most eagerly awaited general election in recent history
