Ownership Unbundling and Related Measures in the EU Energy Sector Tilman Michael Dralle,2018-04-24 This book provides the first comprehensive analysis of unbundling and in particular ownership unbundling policies from the perspective of international economic law It does so by focusing on the prominent example of the EU s energy sector and its Third Energy Package Unbundling has become an increasingly crucial competition instrument in network bound industries worldwide It is designed to ensure access to bottleneck infrastructures on fair and non discriminatory terms and thus to suppress the anti competitive potential deriving from vertical integration in natural monopoly situations While promoting important public policy objectives unbundling policies have also raised a number of legal issues This book analyzes how international economic law limits the adoption and maintenance of unbundling and related measures and also outlines how international trade law can play a positive role in this field As a result it provides a valuable reference for academics practitioners and policy makers

Electricity Reform in Europe Jean-Michel Glachant,2009-01-01 this volume comes across as one of the most profound sources on the specifics of European electricity market restructuring Competition and Regulation in Network Industries The SESSA study on the Internal Energy Market was an important and influential contribution towards the Commission s proposal for a third package of proposals intending to bring more effective competition and better security of supply to Europe s energy markets This volume based on the results of the study is an important and welcome contribution to the ongoing debate on these proposals Andris Piebalgs Commissioner for Energy at the European Commission The chapters in this book are written by the leading European scholars who have studied the structure behavior and performance of liberalised electricity markets in many European countries as well as in other regions of the world Both the analyses and the policy recommendations contained in this volume are well worth careful consideration by policymakers in Europe as well as by policymakers in other countries that are seeking to adopt successful electricity sector liberalisation programs From the foreword by Paul L Joskow Massachusetts Institute of Technology US Dynamism or dissipation Competition or national champions Will enlargement promote or delay reform Energy economists contemplate the challenges posed by the restless and discontent European Commission Stephen Littlechild University of Birmingham and Judge Institute for Management Studies University of Cambridge UK The challenge of European electricity reform is being met although gradually delays notwithstanding This book provides precious help in spotting where the necessary further efforts should be directed In the US mistakes and delays have occurred no less than in Europe but an aggressive federal regulator absent in Europe is working to overcome them Electricity markets do not happen they have to be built Here are suggestions for a workable European market design No ideology just competence and wisdom from both theory and experience Will Europe learn Pippo Ranci Universit Cattolica del Sacro Cuore Italy The realisation of a European internal market for energy is still a work in progress Written by leading European scholars and discussed with

major energy stakeholders this book presents a thorough analysis of the motives and methods needed to achieve a single European energy market. The authors discuss the critical issues surrounding an internal European energy market including market design, competition and market power, sustainable energy versus the market, regulation and harmonisation, benchmarking and indicators, modelling of competition, market prices and energy forecasts. They provide a multi-disciplinary assessment of the best way to build the market base of a future European energy policy. Electricity Reform in Europe will be of great interest to decision makers and managers in the energy industry or business sector as they will be able to see the whole European energy policy picture beyond their own corporate interests. The book will also appeal to national and European energy administrations, regulatory bodies and policy makers providing a synthesis of all relevant policy issues.

Privatization Experiences in the European Union Marko Köthenbürger, 2006. Experts evaluate the varied outcomes of privatization experiences in Austria, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Spain and the UK. The trend toward privatization which began with privatization experiments in the UK under Margaret Thatcher and the deregulation of the telecommunications sector in the United States has attracted the attention of policymakers over the past two decades. Privatization is broadly supported by most academic economists but the results of actual privatization efforts seem mixed. In the UK, for example, telecom rates fell sharply after privatization but privatized rail service was widely perceived to have declined dramatically in quality. In this CESifo volume, international experts examine the experiences of 10 EU countries evaluating the real outcomes of privatization policies in Austria, Denmark, Finland, France, Germany, Ireland, Italy, the Netherlands, Spain and the UK. The effects of privatization which includes not only changes in ownership of public activities and entities but also liberalization of markets and deregulation are difficult to distinguish from the effects of other economy-wide influences. The studies in this volume meet this methodological challenge by using a well-defined set of criteria including reducing consumer prices, increasing quantity and improving quality by which to make their assessments. Background chapters provide a conceptual framework for considering the issues. Contributors: Pablo Arocena, Sean D. Barrett, Ansgar Belke, Michel Berne, Henrik Christoffersen, Andrea Goldstein, G. nter Knieps, David Newbery, Martin Paldam, David Parker, G. rard Pogorel, Friedrich Schneider, Eric van Damme, Ingo Vogelsang, Johan Willner. Climate Change and the Private Sector Craig Hart, 2013-07-24. Climate Change and the Private Sector explores the challenges of transforming our energy infrastructure to become carbon neutral and adapting to climate change in the twenty-first century. It examines the critical role that the private sector must play in these challenges. To transform the global energy complex to be carbon neutral within a time frame designed to prevent irreparable damage to the environment presents unprecedented challenges. The private sector must deploy financial, material and engineering resources on a scale never before undertaken with government providing leadership, removing barriers and supporting industry efforts through policies that mobilize markets to achieve environmental objectives. A key element of supporting private sector initiative to address climate change is policies

that help form and sustain markets that supply finance and generate demand for the technologies necessary to transform our energy infrastructure The characteristics and examples of these policies are explored in detail Companies that respond to these challenges both by mitigating greenhouse gases and adapting to climate change will enhance their own competitiveness and contribute to society in the process Companies that embrace the challenge to decarbonize their manufacturing operations whether in response to regulation or the threat of regulation or market opportunities invariably discover ways to improve their operations in the process that could potentially enhance their ability to produce better products more efficiently The book explores examples of companies that have redesigned their products and manufacturing processes and in doing so transformed themselves and reshaped their industries As in the case of companies mitigating greenhouse gas emissions companies that lead their industries in adapting their own operations to a changing physical environment are more likely to ensure their resilience in a changing business environment This book provides business policy and academic audiences with an in depth exploration of the subject and a practical guide to action
