Measuring Inequality of Opportunities in Latin America and the Caribbean Ricardo Paes de Barros,Francisco H. G. Ferreira,Jose R Molinas Vega,Jaime Saavedra Chanduvi,2008-11-12 Equality of opportunity is about leveling the playing field so that circumstances such as gender ethnicity place of birth or family background do not influence a person s life chances Success in life should depend on people s choices effort and talents not to their circumstances at birth Measuring Inequality of Opportunities in Latin America and the Caribbean introduces new methods for measuring inequality of opportunities and makes an assessment of its evolution in Latin America over a decade An innovative Human Opportunity Index and other parametric and non parametric techniques are presented for quantifying inequality based on circumstances exogenous to individual efforts These methods are applied to gauge inequality of opportunities in access to basic services for children learning achievement for youth and income and consumption for adults *Making Citizenship Work* Rodolfo Rosales,2022-08-24 Making Citizenship Work seeks to address questions of how a community reaches a place where it can actually make citizenship work A second question addressed is What does citizenship represent to different communities Across thirteen chapters a collection of experts traverse multiple disciplines in analyzing citizenship from different points of

access Each chapter revolves around the premise that empowerment of communities and individuals within the community comes in different forms and is governed by multiple needs and visions Authors utilize case studies to demonstrate the different roles that communities from a broad sector of our society adopt to accomplish constructing democratic processes that reflect their goals needs and cultures Concurrently authors address the structural obstacles to the empowerment of communities arguing that the democratic process does not and cannot accommodate the diverse communities of society within a single universalistic model of citizenship They conclude that fundamentally citizenship is not simply a legal right an obligation a state of rights but a practice an action on the behalf of community Making Citizenship Work challenges conventional thinking about politics while also encouraging readers to go beyond the box that deters us from visualizing a human society It is an ideal book for undergraduate and graduate courses in political science sociology history social work and Ethnic Studies **Country Reports on Economic Policy and Trade Practices** United States.
