have given complete satisfaction since their installation in 1931.

No other synchronous clock has the same record.

• • •

The success of the Synclocks is due to the scientific design of the system which possesses the following advantages—

- Satisfactory—does not stop when a momentary interruption occurs.
- Growing more by a varied and much increasing efficient lubrication and long life.
- Simple in principle—easy, cheap and rapid to repair.
- No batteries or accumulators or gears.

These features and the large reserve of power under the Synclock mechanism for special clock driving under normal and abnormal stresses are positive proofs of success.
