## **Electrical Induction From Distant Current Surges:**

Electrical Induction from Distant Current Surges William E. Waters,1983      *Electromagnetic Computation Methods for Lightning Surge Protection Studies* Yoshihiro Baba,Vladimir A. Rakov,2016-02-02 Presents current research into electromagnetic computation theories with particular emphasis on Finite Difference Time Domain Method This book is the first to consolidate current research and to examine the theories of electromagnetic computation methods in relation to lightning surge protection The authors introduce and compare existing electromagnetic computation methods such as the method of moments MOM the partial element equivalent circuit PEEC the finite element method FEM the transmission line modeling TLM method and the finite difference time domain FDTD method The application of FDTD method to lightning protection studies is a topic that has matured through many practical applications in the past decade and the authors explain the derivation of Maxwell s equations required by the FDTD and modeling of various electrical components needed in computing lightning electromagnetic fields and surges with the FDTD method The book describes the application of FDTD method to current and emerging problems of lightning surge protection of continuously more complex installations particularly in critical infrastructures of energy and information such as overhead power lines air insulated sub stations wind turbine generator towers and telecommunication towers Both authors are internationally recognized experts in the area of lightning study and this is the first book to present current research in lightning surge protection Examines in detail why lightning surges occur and what can be done to protect against them Includes theories of electromagnetic computation methods and many examples of their application Accompanied by a sample printed program based on the finite difference time domain FDTD method written in C program      **Lightning** Vladimir A. Rakov,Martin A. Uman,2007-01-08 *Lightning Physics and Effects* is the first book that covers essentially all aspects of lightning including lightning physics lightning protection and the interaction of lightning with a variety of objects and systems as well as with the environment It is written in a style that will be accessible to the technical non expert and is addressed to anyone interested in lightning and its effects This will include physicists engineers working in the power communications computer and aviation industries meteorologists atmospheric chemists foresters ecologists physicians working in the area of electrical trauma and architects This comprehensive reference volume contains over 300 illustrations 70 tables containing quantitative information and a bibliography of more than 6000 references      **500 Kv.
