Oldham Smith,1990-01-01      **Fire Safety Law** V. Charles Ward,2022-09-21 Fire Safety Law provides building owners managers individual leaseholders mortgage lenders landlords and anyone involved in the purchase or sale of a flat situated within a multi occupied block with practical yet comprehensive and well researched information regarding the subject of fire safety and the associated responsibilities obligations and rights V Charles Ward addresses in practical legal terms the responsibilities on building owners to ensure that buildings are fire safe for people who are living working or visiting those buildings and explains what protections are available to leaseholders faced with the costs of making their buildings fire safe The book begins with a summary of the lessons which have come from the Grenfell Inquiry before providing a practical overview of current fire safety legislation relating to residential and commercial buildings This legislative overview will include not only the 2005 Fire Safety Order as updated by the 2021 Fire Safety Act and the Fire Safety England Regulations 2022 but will also include associated and emerging legislation and official guidance in relation to fire safety including gas and electrical safety regulation as well as the Building Safety Act 2022 The book will then pull apart a typical long residential lease within a high rise block to identify who is directly responsible for fire safety and explain how the costs of making good the fire risk from defective cladding might be shared out between the ground landlord and individual residential leaseholders Having assessed the legal situation as regards existing high rise leaseholders the book then addresses the additional due diligence required by prospective purchasers of individual high rise flats as well as estate agents mortgage lenders landlords and conveyancing lawyers to ensure that what they will be buying or lending money on is fire safe and that any associated costs are fully accounted for      Improving the disposal of public sector information, communication and technology equipment Great Britain: National Audit Office,2007-07-31 The procurement of public ICT equipment is forecast to increase from 2.7 billion in 2005/06 to 4.1 billion by 2010/11 an increase in volume from 1.7 to 2.6 million units It is therefore important that public bodies understand how they can generate value from disposals whilst being clear about their statutory and ethical responsibilities However best practice in this area is unclear This report is the first attempt to identify the potential for getting value from ICT disposal whilst considering the wider environmental costs One of the findings is that on average the public sector keeps equipment for just under 5 years old when disposal becomes a net cost The commercial sector typically disposes of equipment after 3 years when there is still some residual value If this had been done by public bodies the estimated saving in 2005/06 would have been 70 million      The Outdoor Lighting Guide Institution of Lighting Engineers,2005 As concern grows over environmental issues and light pollution this book satisfies a need for a straightforward and accessible guide to the use design and installation of outdoor lighting This all inclusive guide to exterior lighting from the Institution of Lighting Engineers recognized as the pre eminent professional source in the UK for authoritative guidance on exterior lighting provides a comprehensive source of information and advice on all forms of exterior lighting from floodlighting buildings and road lighting to elaborate Christmas decorations Useful to practitioners and
