

Steering System

- A steering system is one of the major automotive subsystems required for operation of the car.
- It provides the driver control of the path of the car over the ground.
- Steering functions by rotating the plane of the front wheels in the desired direction of the turn.
- The angle between the front wheel plane and the longitudinal axis of the car is known as the *steering angle*. This angle is proportional to the rotation angle of the steering wheel.

Electricity Elcetronics 5ed
