Conference on Energy and Environment in European Economies in Transition International Energy Agency, Centre for Co-operation with European Economies in Transition, 1992 **The European Dimension of Germany's Energy Transition** Erik Gawel, Sebastian Strunz, Paul Lehmann, Alexandra Purkus, 2019-02-07 This book addresses the interactions between Germany's energy transition and the EU's energy policy framework. It seeks to analyze the manifold connections between the prospects of the proclaimed Energy Union and the future of Germany's energy transition and identifies relevant lessons for the transformation at the EU level that can be learned from the case of Germany as a first mover of transforming energy systems towards renewables. The various repercussions political, economic and systemic from the national transition are explored within the EU context as it responds to the German transition taking into account both existing frictions and potential synergies between predominantly national sustainability policies and the EU's push towards harmonized policies within a common market. The book's overall aim is to identify the most critical issues in order to avoid pitfalls and capitalize on opportunities.

Structural Transitions to Electric Vehicle Production Stephen Ayerst, Neree C.G.M. Noumon, 2023-02-28 Sustaining the impressive convergence gains allowed by the Czech automotive sector has become challenging due to its comparatively lower value added, lower investments in research and development and lower skills in the labor market. Using a structural model of global value chains, the paper examines policies to smooth the transition to the production of electric vehicles in Czechia. The analysis explores the impacts of increasing labor productivity, boosting production capabilities and moving up the global value chain. These policies were found to have a relatively lower impact when they shift specialization towards lower value added stages of production.

Economic Dynamics in Transitional Economies Bruno Sergi, 2020-07-24 Learn more about the transitional economies of Central and Eastern Europe. This book examines the economic dynamics of Central and Eastern European post-Communist countries. It illuminates the paths these countries are taking toward restructuring their markets, increasing international trade and bettering their connections with the European Union and other countries. Beginning with a comparative analysis of the three P governments (Pigouvian, Partisan and Paternalistic) and continuing with a discussion of the interrelated political and economic difficulties of transition, author Bruno Sergi proposes a surprising solution. Inspired by the Bruxelles consensus, he proposes that the European Commission should become a fourth P government replacing the role formerly played by the Washington consensus in the restructuring of post-Communist economies. *Economic Dynamics in Transitional Economies* also explores regional comparative macroeconomics, the aftereffects of the Washington Consensus, integration of Eastern and Western European economies, interrelations between national and regional monetary activity, political and economic policy reform, involvement of European Union member countries. We are living in historic times and *Economic Dynamics in Transitional Economies* will be a welcome guide to the rough roads ahead. This thorough assessment of current political and economic realities will

stimulate debate about new European paradigms the role of the European Union and the difficulties of post Communist transition These issues promise to be vital to the region s success in the new century The Political Economy of Clean Energy Transitions Douglas Arent,Channing Arndt,Mackay Miller,Finn Tarp,Owen Zinaman,2017 A volume on the political economy of clean energy transition in developed and developing regions with a focus on the issues that different countries face as they transition from fossil fuels to lower carbon technologies The Green Economy Transition in Europe Çagatay Basarir,Altug Günar,2024-05-29 The Green Economy Transition in Europe Strategies Regulations and Instruments aims to investigate the current green economic and financial practices strategies and regulations in Europe the European Union and its member states In this context the EU s current green economic policies instruments and practices will be discussed and analyzed The study seeks to answer the question Did climate change and the unsustainability of fossil resources initiate the green transformation in Europe in the area of finance and economy and how were the tools policies and regulations used for this shape in the green economy This study differs from previous studies with an interdisciplinary approach focusing in detail on green economic transition and transformation issues in Europe and the EU The Role of the Electric Vehicle in the Energy Transition Angel Arcos-Vargas,2020-09-23 This book explores the part that electric vehicles can play in reducing carbon dioxide emissions Further it explains the impact of public support technological advances lower costs and better battery performance in making electric vehicles a viable alternative The book begins by analyzing the international context of electric vehicles and how they are being developed in different countries and by offering a forecast of the electricity demand they may create It then discusses technological innovations in electric vehicle recharging systems The book is concerned not only with the economic potential of electric vehicles but also with environmental aspects consequently it examines the raw materials supply chain and performs a lifecycle assessment The book concludes with a chapter on alternative energies in transport which may also help to facilitate the energy transition Given its scope the book offers a valuable resource for researchers graduate students policymakers and industry professionals interested in the energy transition and transport

Handbook of the Economics and Political Economy of Transition Paul Hare,Gerard Turley,2013-05-02 Transition from central planning to a market economy involving large scale institutional change and reforms at all levels is often described as the greatest social science experiment in modern times As more than two decades have passed since the fall of the Berlin Wall and the collapse of the Soviet Union it is now an excellent time to take stock of how the transition process has turned out for the economies that have moved on from socialism and the command economy This new handbook assembles a team of leading experts many of whom were closely involved in the transition process as policymakers and policy advisors to explore the major themes that have characterized the transition process After identifying the nature of initial conditions and the strengths and weaknesses of institutions the varying paths and reforms countries have taken are fully analyzed from the shock therapy privatization or gradualism of the early years to the burning issues of the present including global integration

and sustainable growth Topics covered include the socialist system pre transition economic reforms institutions the political economy of transition performance and growth enterprise restructuring and people and transition The country coverage is also extensive from the former socialist countries of the USSR and the satellite states of Central and Eastern Europe to the Asian countries of China Vietnam and others The rise of China as a key actor in the drama is chronicled along with the emergence of a new more confident oil rich Russia The comparative prosperity of the Central European countries such as Poland and the Czech Republic is contrasted with the mixed fortunes of the former USSR where some countries are stagnating while others boom This Handbook of the Economics and Political Economy of Transition is the definitive guide to this new order of things in the former Communist world
