Electronic Brains Mike Hally, 2005 Account of the birth of the modern computer from 1930 1960 *Drone* Adam Rothstein, 2015-02-03 Drones are in the newspaper on the TV screen swarming through the networks and soon we re told they ll be delivering our shopping But what are drones The word encompasses everything from toys to weapons And yet as broadly defined as they are the word drone fills many of us with a sense of technological dread Adam Rothstein cuts through the mystery the unknown and the political posturing and talks about what drones really are what technologies are out there and what s coming next how drones are talked about and how they are represented in popular culture It turns out that drones are not as scary as they appear but they are more complicated than you might expect Drones reveal the strange relationships that humans are forming with their new technologies Publisher **The Life Informatic** Dominic Boyer, 2013-04-26 News journalism is in the midst of radical transformation brought about by the spread of digital information and communication technology and the rise of neoliberalism What does it look like however from the inside of a news organization In *The Life Informatic* Dominic Boyer offers the first anthropological ethnography of contemporary office based news journalism The result is a fascinating account of journalists struggling to maintain their expertise and authority even as they find their principles and skills profoundly challenged by ever more complex and fast moving streams of information Boyer conducted his fieldwork inside three news organizations in Germany a world leader in digital journalism supplemented by extensive interviews in the United States His findings challenge popular and scholarly images of journalists as roving truth seekers showing instead the extent to which sedentary office based screenwork such as gathering and processing information online has come to dominate news journalism To explain this phenomenon Boyer puts forth the notion of digital liberalism a powerful convergence of technological and ideological forces over the past two decades that has rebalanced electronic mediation from the radial or broadcast tendencies of the mid twentieth century to the lateral or peer to peer tendencies that dominate in the era of the Internet and social media Under digital liberalism an entire regime of media knowledge and authority has become integrated around liberal principles of individuality and publicity both unmaking and remaking news institutions of the broadcast era Finally Boyer offers some scenarios for how news journalism will develop in the future and discusses how other intellectual professionals such as ethnographers have also become more screenworkers than fieldworkers **Economics** David A.
