**Electronic Discourse Liguistic Individuals In Virtual Space:**

**Electronic Discourse** Boyd H. Davis,Jeutonne Brewer,Jeutonne Patten Brewer,1997-01-01 Investigates the new world of computer conferencing and details how writers use language when their social interaction is exclusively enacted through text on screens **Electronic Discourse** Boyd H. Davis,Jeutonne P. Brewer,1997-10-02 This book examines interactive electronic discourse exposing use of language that has the immediacy characteristic of speech and the permanence characteristic of writing The authors created an asynchronous mainframe conference for language and linguistics classes in which they presented students with the task of analyzing the language used in original newspaper reports of the 1960s Civil Rights Sit Ins The authors observed how students wrote to each other across a wide range of social and virtual settings how they built a real if short lived community within and across campus boundaries and how they handled conflict while avoiding confrontation on sensitive issues of race and power The result is a study that details how people use language when their social interaction is exclusively enacted through text on screens and how their exchange is affected by computer conferencing The students who wrote in the electronic conferences faced two interrelated tasks participating in a multiparty conversation and negotiating the individual identities they presented to one another in their virtual space Individual writers used their own idiolects to influence the form and content of electronic discourse adapting their own tacit knowledge of conversational strategies and written discourse to the new medium as they created a real although temporary community In the electronic universe writers adapt conventions of oral and written discourse to their own individual communicative ends Electronic discourse sometimes called computer mediated communication presents us with texts in contact and through those texts their writers Intertextuality in electronic conferences replaced a variety of conversational conventions This book examines evidence for change some trace of being and human interaction in virtual space a domain where footprints are not in moondust but in ether **The Theory and Criticism of Virtual Texts** Lory Hawkes,Joe Law,Christina Murphy,2000-11-30 Virtual texts have emerged within the realm of the Internet as the predominant means of global communication As both technological and cultural artifacts they embody and challenge cultural assumptions and invite new ways of conceptualizing knowledge community identity and meaning But despite the pervasiveness of the Internet in nearly all aspects of contemporary life no single resource has cataloged the ways in which numerous disciplines have investigated and critiqued virtual texts This bibliography includes more than 1500 annotated entries for books articles dissertations and electronic resources on virtual texts published between 1988 and 1999 Because of the multiple contexts in which virtual texts are studied the bibliography addresses virtual communication across a broad range of disciplines and philosophies It encompasses studies of the historical development of virtual texts investigations of the many interdisciplinary applications of virtual texts and discussions of such legal issues as privacy and intellectual property Entries are arranged alphabetically within topical chapters and extensive indexes facilitate easy access **Introduction to Discourse Studies** Jan
