Good News For Animals Christian Approaches To Animal Wellbeing Ecology And Justice:

Good News for Animals? Charles R. Pinches, Jay B. McDaniel, 2008-05-01 In *Good News for Animals* fifteen men and women debate the ambiguous legacy of Christian approaches to animals and their well being The book is structured by four questions What has been said about animals in the past What is being said about animals today How should Christians respond to current concerns about animals Contributors Carol Adams John Berkman Richard M Clugston John B Cobb Jr Gary Comstock George Frear William French Stanley Hauerwas L Shannon Jung Andrew Linzey Theodore Walker Tom Regan Rosemary Radford Ruether *The Ethics of Animal Experimentation* Donna Yarri, 2005-08-18 Donna Yarri presents an overview of the current discussion on the ethics of animal experimentation from a Christian standpoint **God is Green** Bob Shore-Goss, 2016-10-28 At this time of climate crisis here is a practical Christian ecospirituality It emerges from the pastoral and theological experience of Reverend Robert Shore Goss who worked with his congregation by making the earth a member of the church by greening worship and by helping the church building and operations attain a carbon neutral footprint Shore Goss explores an ecospirituality grounded in incarnational compassion Practicing incarnational compassion means following the lived praxis of Jesus and the commission of the risen Christ as Gardener Jesus becomes the green face of God Restrictive Christian spiritualities that exclude the earth as an original blessing of God must expand This expansion leads to the realization that the incarnation of Christ has deep roots in the earth and the fleshly or biological tissue of life This book aims to foster ecological conversation in churches and outlines the following practices for congregations meditating on nature inviting sermons on green topics covenanting with the earth and retrieving the natural elements of the sacraments These practices help us recover ourselves as fleshly members of the earth and the network of life If we fall in love with God's creation says Shore Goss we will fight against climate change [A Primer on Critical Thinking and Business Ethics](#) Oswald A. J. Mascarenhas, SJ, Munish Thakur, Payal Kumar, 2024-07-16 The authors encapsulate new developments in Critical Thinking skills for MBA students in the form of a broad based cross disciplinary primer in business management with a special focus on business ethics [The Ethics of Nature](#) Celia Deane-Drummond, 2008-04-15 This accessible and timely book uses a Christian perspective to explore ethical debates about nature A detailed exploration of humanity's treatment of the natural world from a Christian perspective Covers a range of ethical debates including current controversies about the environment animal rights biotechnology consciousness and cloning Sets the immediate issues in the context of underlying theological and philosophical assumptions Complex scientific issues are explained in clear student friendly language The author develops her own distinctive ethical approach centred on the practice of wisdom Discusses key figures in the field including Peter Singer Aldo Leopold Tom Regan Andrew Linzey James Lovelock Anne Primavesi Rosemary Radford Ruether and Michael Northcott The author has held academic posts in both theology and plant science **Woven Together** James S. Mastaler, 2019-04-17 Now more than ever it's critical that religious stories encompass a call to moral responsibility for the

earth and to the global poor But the divorce between religious faith and science has left many people feeling unmoored and adrift at a time when we ought to be drawing closer to nature and each other It is a theological activity to see the world as it really is to look its suffering squarely in the face and tend to a wounded world The global poor especially women among them are some of the world's most disenfranchised people Their realities must inform the conversations about God and the world that people of faith are having in the church There is no salvation from the world only salvation with the world This means learning to live as a member of a community of mutual responsibility to look inward and ask ourselves how we might turn outward and live differently Concern for nature and social justice must become a central part of Christian moral life

Ecowomanism Harris, Melanie L., 2017-09-14 Melanie Harris argues that African American women make unique contributions to the environmental justice movement in the ways that they theologize theorize practice spiritual activism and come into religious understandings about their relationship with the earth This unique text stands at the intersection of several academic disciplines womanist theology eco theology spirituality and theological aesthetics

A Communion of Subjects Paul Waldau, Kimberley Patton, 2009-05-22 A Communion of Subjects is the first comparative and interdisciplinary study of the conceptualization of animals in world religions Scholars from a wide range of disciplines including Thomas Berry cultural history Wendy Doniger study of myth Elizabeth Lawrence veterinary medicine ritual studies Marc Bekoff cognitive ethology Marc Hauser behavioral science Steven Wise animals and law Peter Singer animals and ethics and Jane Goodall primatology consider how major religious traditions have incorporated animals into their belief systems myths rituals and art Their findings offer profound insights into the relationship between human beings and animals and a deeper understanding of the social and ecological web in which we all live

Christianity and Ecology Dieter T. Hessel, Rosemary Radford Ruether, 2000 What can Christianity as a tradition contribute to the struggle to secure the future well being of the earth community This collaborative volume the third in the series on religions of the world and the environment announces that an ecological reformation an eco justice reorientation of Christian theology and ethics is prominent on the ecumenical agenda The authors explore problematic themes that contribute to ecological neglect or abuse and offer constructive insight into and responsive imperatives for ecologically just and socially responsible living

Religion and the Environment Roger S. Gottlieb, 2010 In the last two decades a new form of religiously motivated social action and a virtually new field of academic study each based in recognition of the connections between religion and humanity's treatment of the environment have developed Interactions between religion and environmental concern have been manifest in the explosive growth of ecotheological writings institutional commitment by organized religions and environmental activism explicitly oriented to religious ideals Clergy throughout the world in virtually every denomination have received word from leaders of their religion that the environment no less than sexuality poverty or war and peace is now a basic and compelling religious matter Out of this confrontation have been born vital new theologies based in the recovery of marginalized elements of tradition profound

criticisms of the past and ecologically oriented visions of God the Sacred the Earth and human beings Theologians from every religious tradition along with dozens of non denominational spiritual writers have confronted world religions past attitudes towards nature In the realm of institutional commitment public statements and actions by organized religions have grown dramatically In the context of political action throughout the U S and the world religiously oriented groups take part in environmentally oriented political action from lobbying and consciousness raising to activist demonstrations and civil disobedience This collection serves as a comprehensive introduction overview and in depth account of these exciting new developments The four volumes cover virtually every aspect of the field from theological change and institutional commitment to innovation in liturgy from new ecumenical connections among different religions and between religion science and environmental movements from religious participation in environmental politics to an account of the global social and political contexts in which religious environmentalism has unfolded American Book Publishing Record ,1999
