the next best thing By using this book your Funk R B keyboard playing will definitely improve What is Funk Music Funk is an Afro American musical style originated by James Brown and later Sly and the Family Stone emphasizing the rhythm and putting melody and harmony in the background Funk often consists of a complex groove where every instrument is playing a different rhythmic part fitting together like a jigsaw puzzle Entire songs are written without any or minimal chord changes where one or two riffs form the basis of the song as represented by the examples in this book One of the most distinctive features of funk music is the role of the bass line as a foundation with melodic bass lines at the centerpiece of a funk tune The left hand parts in this book capture both the rhythmic and melodic essence of funk bass while the right hand parts capture the percussive syncopated rhythms of funk music similar to what a guitarist may play Funk music uses the same type of extended chords as in jazz including minor chords with added sevenths ninths and elevenths or dominant seventh ninth eleventh and thirteenth chords Each of the 55 examples has been recorded three times 1 The left and right hand parts are played through twice with drums percussion guitars and keyboards at the regular tempo 2 Rhythm tracks at the regular tempo of guitar bass drums percussion to practice the keyboard parts along with 3 Slowed down track of the left right keyboard parts with the drums so that you can precisely hear what the keyboard parts are playing For musicians students who would like extended 2 minute Play A Long tracks for each of the 55 examples ADG Productions offer downloadable mp3 files or MIDI files   *Country Riffs for Piano & Keyboards* Andrew D. Gordon,1900 Blues Piano Practice Session Volume 1 In All 12 Keys Catalog Number ADG232 Author Andrew D Gordon Publisher ADG Productions I have created various Blues riffs and has transposed them into all 12 keys along with backing tracks to practice with giving you the student a fun way of learning how to play in all keys We all learned how to play our scales in all 12 keys so I have taken that concept and applied it to learning to play the Blues so that you can try to become equally adept at playing in as many keys as possible I have heard from teachers who have used my 100 Ultimate Blues Riffs book who will only allow a student to move on to the next riff once they have mastered playing the riff they are working on in all 12 keys certainly a great but challenging musical exercise Each of the riffs are either 2 or 4 measures in length that are notated and recorded around the cycle of 4th s Also there is a notation page whereby the riff is being used in a 12 bar blues progression so that you can see how to apply the riff to a real world situation Each riff has been recorded 4 times 1 Piano with rhythm tracks recorded around the cycle of 4th s 2 Rhythm tracks recorded around the cycle of 4th s to practice with 3 Piano with rhythm tracks recorded in a 12 bar blues progression in a designated key 4 Rhythm tracks recorded in a 12 bar blues progression in the same key Reasons for practicing in all 12 keys Often a singer cannot reach certain notes in the key that you have learned the song in therefore you will probably be asked to change the key of the song which you can do with confidence knowing all 12 keys Having the knowledge of playing in all 12 keys it will then become easier to learn new songs whatever key they are in Blues often use the keys of C F G Bb Eb Guitar music often uses the keys of E A D by learning as many keys as possible will enable you to adapt to the musical situation you are playing in Taking riffs chord progressions etc through all 12 keys is a great ear training tool relying on your ears to play

in keys that you are not used to before the muscle memory sets in Practicing in all 12 keys is a great exercise for the brain it is obviously hard work but the more you do it the benefits will become apparent By practicing in all 12 keys you will start to see various musical patterns evolve that will help you speed up the process of learning music It is my hope that as you practice playing in the various keys you will eventually not need the music and be able to transpose in your head *100 Ultimate Blues Riffs Volume 2* Andrew D.
