Sustaining the Comprehensive Ideal Trevor Male, Ioanna Palaiologou, 2019-11-14 This book explores the development of educational leadership within difficult contexts via the lens of a previously failing English secondary school in an area of urban poverty Based on extensive interview data from 2012-2016 the authors demonstrate that the fundamental ethos underpinning the school's improvement is a desire to meet the needs of young people in disadvantaged communities in order to equip them with the skills to allow them to transcend their situation The authors posit that this school embodies the comprehensive ideal of secondary education in England that education should not be disadvantaged by background and that the state should provide free and high quality education for all This book will appeal to students and scholars of comprehensive education and schools in difficult contexts

Norsundrians Those in power are not the only individuals working to subvert the plans of Norsunder Liere a young shopkeeper's daughter battles her own debilitating insecurities to live up to her reputation as a former savior of the realm Hibern a mage's apprentice must act as a liaison between national leaders negotiating politics still foreign to her Rel a traveling warrior stirs powerful allies to action encourages common folk to take up arms These leaders soon realize that any significant victory against Norsunder will require an alliance between their nations Yet good intentions may fracture in the face of personal grudges secrets and inexperience As the Norsundrian attacks become bolder the members of this tenuous alliance must find ways to trust one another and bind themselves together lest they fail to defend against a host that has crushed entire worlds The Scholarship of Teaching and Learning In and Across the Disciplines Kathleen

McKinney, 2013-01-21 The scholarship of teaching and learning SoTL began primarily as a discipline based movement committed to exploring the signature pedagogical and learning styles of each discipline within higher education with little exchange across disciplines As the field has developed new questions have arisen concerning cross disciplinary comparison and learning in multidisciplinary settings This volume by a stellar group of experts provides a state of the field review of recent SoTL scholarship within a range of disciplines and offers a stimulating discussion of critical issues related to interdisciplinarity in teaching learning and SoTL research Changing Education Joyce Antler, Sari Knopp

Biklen, 1990-07-05 By combining history theory philosophy case studies and monographs with broader issues Changing Education shows how educational experience and knowledge are deeply gendered One of its strengths indeed the excitement of women's studies in general is its breadth and interdisciplinary nature It pays attention to such issues in feminist theory and women's studies as women's culture and the sameness versus difference debate at the same time it provides a wealth of information and new material that is not available elsewhere Susan Ware New York University It highlights gender as a cultural phenomenon showing that women's experience in education has been shaped by gender specific stereotypes and concepts At the same time the essays show how women used gender categories to their own advantage to create new lines of work such as kindergarten teaching and child study activity or to overcome societal prejudice by way of collective action such as the Boston Women's Health Collective It makes an important contribution to the debate about women's culture versus women's politics showing the significance of each e.g. the women's page of the Jewish Daily Foreword as a vehicle for women's traditional culture and contemporary committed feminism I think you have a winner here Ann J Lane Colgate University
