Red Army Order of Battle in WWII, October to December 1942 Maximino Argüelles Martínez, 2020-01-17
FRONTOVIK was the name that the veterans who served in the Soviet Armed Forces across the Great Patriotic War between 1941 and 1945 were known. The purpose of this FRONTOVIK is to reflect the structure and deployment of the Red Army throughout the year 1942. This work is part of a global monthly study from June 1941 to September 1945. The main sources for this study were the documents published by the Department of Military History of the Ministry of Defence of the Soviet Union in 1966 containing data from January 1 to December 1 1942 and the works of Colonel David M Glantz along with numerous secondary sources. All the images, illustrations, tactical symbols and maps were made by the author as a personal tribute to the veterans that served in those units. **Hatchery Production** United States. Planetary Astrobiology Victoria Meadows, Giada Arney, Britney Schmidt, David J. Des Marais, 2020-07-07 Are we alone in the universe? How did life arise on our planet? How do we search for life beyond Earth? These profound questions excite and intrigue broad cross sections of science and society. Answering these questions is the province of the emerging, strongly interdisciplinary field of astrobiology. Life is inextricably tied to the formation, chemistry and evolution of its host world, and multidisciplinary studies of solar system worlds can provide key insights into processes that govern planetary habitability, informing the search for life in our solar system and beyond. Planetary Astrobiology brings together current knowledge across astronomy, biology, geology, physics, chemistry and related fields and considers the synergies between studies of solar systems and exoplanets to identify the path needed to advance the exploration of these profound questions. Planetary Astrobiology represents the combined efforts of more than seventy-five international experts consolidated into twenty chapters and provides an accessible interdisciplinary gateway for new students and seasoned researchers who wish to learn more about this expanding field. Readers are brought to the frontiers of knowledge in astrobiology via results from the exploration of our own solar system and exoplanetary systems. The overarching goal of Planetary Astrobiology is to enhance and broaden the

development of an interdisciplinary approach across the astrobiology planetary science and exoplanet communities enabling a new era of comparative planetology that encompasses conditions and processes for the emergence evolution and detection of life
