Hedge Funds In Emerging Markets:

Hedge Funds in Emerging Markets Gordon de Brouwer, 2001-09-06 Hedge funds are among the most innovative and controversial of financial market institutions. Largely exempt from regulation and shrouded in secrecy they are credited as having improved efficiency and added liquidity to financial markets but also having severely destabilised markets following the Asian financial crisis and the near collapse of long term capital management. De Brouwer presents a nuanced and balanced account to what is becoming an increasingly politicised and hysterical discussion of the subject. Part I explains the workings of hedge funds. Part II focuses on the activities of macro hedge funds and proprietary trading desks in East Asia in 1997 and 1998 with case study material from Hong Kong, Indonesia, Malaysia, Singapore, Australia and New Zealand. Part III of the book looks at the future of hedge funds, their role for institutional investors and policy proposals to limit their destabilising effects.

Should You Invest in Emerging Market Hedge Funds? Maria Strömqvist, 2007 Hedge funds should be well equipped to take advantage of opportunities in emerging markets due to their flexibility in investment strategy and lockup periods. However, the findings in this paper show that at the strategy level emerging market hedge funds have only been able to generate risk-adjusted returns in the most recent period when analyzing data between 1994 and 2004. Also, the strategy in question does not present the investor with any benefits that would be valuable in a hedge fund portfolio. There is weak evidence of persistence in risk-adjusted returns at the fund level. However, good performance is not rewarded with capital inflows. This reduces incentives for managers to exert effort and may even deter skillful managers from entering the strategy. Consistent with these results, investors have reallocated their money to other hedge fund strategies. Although emerging market hedge funds have performed poorly in the past, an important finding is the upward trend over time in performance. Given that other hedge fund strategies have a declining trend in alpha, Fung et al. (2007) perhaps emerging market funds are where future alphas can be found.

Hedge Funds and Financial Market Dynamics Mrs. Anne Jansen, Mr. Bankim Chadha, Ms. Laura E. Kodres, Mr. Donald J. Mathieson, Mr. Sunil Sharma, Mr. Barry J. Eichengreen, 1998-05-15 Hedge funds are collective investment vehicles often organized as private partnerships and resident offshore for tax and regulatory purposes. Their legal status places few restrictions on their portfolios and transactions, leaving their managers free to use short sales, derivative securities, and leverage to raise returns and cushion risk. This paper considers the role of hedge funds in financial market dynamics with particular reference to the Asian crisis.
