Civil Democracy Protection Uwe Backes, Thomas Lindenberger, 2023-12-20 Civil Democracy Protection is an overview of attempts by organisations to oppose groups that are perceived to threaten democracy. The book traces the history of civil democracy protection actors from the establishment of democratic constitutional states up to the present day and develops a set of systematic and comparative approaches. The central question it explores is What significance do civil actors have for the establishment and consolidation of democratic constitutional states especially in relation to the protection of democracy by state institutions? The volume includes contributions from historians and social scientists who combine idiographic approaches that focus on the specifics of individual cases with nomothetic approaches that aim to provide generalisable insights incorporating historical experiences from various European countries and the USA in the 20th and early 21st century. This book will be of interest to scholars of democracy protection, civil society consolidation of democracy and anti-extremism.

Wings for the Rising Sun Jürgen P. Melzer, 2021-02-01 The history of Japanese aviation offers countless stories of heroic achievements and dismal failures, passionate enthusiasm and sheer terror, brilliant ideas and fatally flawed strategies. In *Wings for the Rising Sun*, scholar and former airline pilot Jürgen Melzer connects the intense drama of flight with a global history of international cooperation, competition and conflict. He details how Japanese strategists, diplomats and industrialists skillfully exploited a series of major geopolitical changes to expand Japanese airpower and develop a domestic aviation industry. At the same time, the military and media orchestrated air shows, transcontinental goodwill flights and press campaigns to stir popular interest in the national aviation project. Melzer analyzes the French, British, German and American influence on Japan's aviation, revealing in unprecedented detail how Japanese aeronautical experts absorbed foreign technologies at breathtaking speed. Yet they also designed and built boldly original flying machines that in many respects surpassed those of their mentors. *Wings for the Rising Sun* compellingly links Japan's aeronautical advancement with public mobilization, international relations and the transnational flow of people and ideas, offering a fresh perspective on modern Japanese history.

The Confessionalist Homiletics of Lucas Osiander

(1534-1604) Sivert Angel, 2014-11-26 Lucas Osiander (1534-1604) was an influential preacher of the Lutheran orthodoxy. As a Württemberg court preacher and superintendent he played a central role when the country was established as one of the leading Lutheran forces in the Empire. Osiander preached to a wide audience in a time when sermons were a privileged form of communication and when preachers could address and negotiate the central interests in society. Using confessionalization theory, Sivert Angel studies Osiander's preaching in its political and theological context and shows how Osiander as a preacher could exert political influence. By analyzing Osiander's sermons in light of his own homiletic, the author describes how Osiander's role as a preacher may be traced in his sermons' rhetoric structures and in his use of theological concepts.

The discussion of Osiander's theory and practice of preaching documents the ways that Osiander's sermons reinforced the existing political and social order and portrays central aspects of theology and piety in the later sixteenth century
