Heimat Babylon Daniel Cohn-Bendit, Thomas Schmid, 1992 *The Cambridge Companion to Modern German Culture* Eva Kolinsky, Wilfried van der Will, 1999-01-28 One of the most intriguing questions of our time is how some of the masterpieces of modernity originated in a country in which personal liberty and democracy were slow to emerge This Companion provides an authoritative account of modern German culture since the onset of industrialisation the rise of mass society and the nation state Newly written and researched by experts in their respective fields individual chapters trace developments in German culture including national identity class Jews in German society minorities and women the functions of folk and mass culture poetry drama theatre dance music art architecture cinema and mass media from the nineteenth century to the present Guidance is given for further reading and a chronology is provided In its totality the Companion shows how the political and social processes that shaped modern Germany are intertwined with cultural genres and their agendas of creative expression **Turkish Culture in German Society Today** David Horrocks, Eva Kolinsky, 1996 A literary and cultural study combining social and political analysis along with a close reading of Turkish born writer Emine Sevgi Zdamar in order to present the current situation of the Turkish minority living in modern Germany The ten essays and conclusion include an interview and work sample from Zdamar's critically acclaimed over followed Citizenship and Ethnic Conflict Haldun Glalp, 2006-07-13 Making a new case for separating citizenship from nationality this book comparatively examines a key selection of nation states in terms of their definitions of nationality and citizenship and the ways in which the association of some with the European Union has transformed these definitions In a combination of case studies from Europe and the Middle East this book's comparative framework addresses the question of citizenship and ethnic conflict from the foundation of the nation state to the current challenges raised by globalization This edited volume examines six different countries and looks at the way that ethnic or religious identity lies at the core of the national community ultimately determining the state's definition and treatment of its citizens The selected contributors to this new volume investigate this common ambiguity in the construction of nations and look at the contrasting ways in which the issues of citizenship and identity are handled by different nation states This book will be of great interest to students and scholars studying in the areas of citizenship and the nation state ethnic conflict globalization and Middle Eastern and European Politics The Internationality of National Literatures in Either America Armin Paul Frank, Helga Essmann, 1999 **Incorporating Diversity** Peter Kivisto, 2015-12-03 As the best single source collection of classic and contemporary readings on the subject this anthology will be a valuable reference to scholars of immigration race and ethnicity national identity and the history of ideas and indispensable for courses in history and the social sciences dealing with these topics Ruben G Rumbaut co author of *Immigrant America A Portrait and Legacies The Story of the Immigrant Second Generation* Societies today are increasingly characterized by their ethnic racial and religious diversity One key question raised by the global migration of people is how they do or do not come

to be incorporated into their new social environments For over a century assimilation has been the concept used in explaining the processes of immigrant incorporation into a new society It has also been applied to indigenous peoples to refugees and to involuntary migrants caught up in the slave trade Assimilation has confronted many scholarly challenges which were often intermeshed with particular political agendas This book allows readers to obtain a clearer sense of the canonical formulation of assimilation theory and an understanding of the key themes and issues contained in current efforts to rethink and revise the classical perspective for today's changing world The Political Ideology of Green Parties G. Talshir, 2002-10-31 Has a new political ideology emerged in the aftermath of the Sixties Gayil Talshir examines the ideological evolution of green parties in Britain and Germany and traces the formation and transformations of a new type of ideology a modular ideology In the 1980s the extraordinary opposition New Left and ecology movements developed a distinct and social vision that paved the political road for the transformation of democracy Talshir explores this journey from the politics of nature to changing the nature of politics *Temporary Workers or Future Citizens?* Tadashi Hanami, Myron Weiner, 1997-11-19 Japan and the United States are under global and domestic pressures to simultaneously expand and to restrict immigration In both countries migration refugee and citizenship policies have become highly contentious political issues Myron Weiner and Tadashi Hanami have brought together a distinguished group of American and Japanese experts to examine the very different approaches of these two societies in dealing with employer demand for labour control over illegal migration the challenge of incorporating immigrants the legal rights and social benefits of foreign residents and illegal migrants and the claims of refugees and asylum seekers *The German Greens* Margit Mayer, John Ely, 1998 The Greens have been not only a political force and social conscience for Germany before reunification and after but also an inspiration to political groups and movements in many other countries The Greens have raised the issues of ecology gender and grassroots democracy in protest against government They have also had the rare opportunity to try converting themselves into a political party that works within the system This is a book about their paradoxical situation and about the dilemmas all advocates of change face when they become powerful enough to negotiate with the status quo The critical essays by German social scientists and activists also provide a detailed picture of the dynamics of the German Greens where their support has come from The nature of the competing factions And The place of feminism The editors provide a substantial introduction The flavor and texture of the Greens including their raucous public arguments and their innovative campaign tactics are suggested by the political posters included in the book and by a whole section of primary documents The documents And The essays except for one originally written in English have been translated from German The result is to make available to English speaking readers a view of a complex movement whose very name and color have become synonymous with social action in favor of the environment And The empowerment of people Author note Margit Mayer is Professor of Politics at the Free University of Berlin She has also taught at the New School for Social Research And The University of California Santa

Can We Live Together? Alain Touraine, David Macey, 2000 In this book a leading French social thinker grapples with the gap between the tendency toward globalization of economic relations and mass culture and the increasingly sectarian nature of our social identities as members of ethnic religious or national groups Though at first glance it might seem as if the answer to the question Can we live together is that we already do live together watching the same television programs buying the same clothes and even using the same language to communicate from one country to another the author argues that in important ways we are farther than ever from belonging to the same society or the same culture Our small societies are not gradually merging into one vast global society instead the simultaneously political territorial and cultural entities that we once called societies or countries are breaking up before our eyes in the wake of ethnic political and religious conflict The result is that we live together only to the extent that we make the same gestures and use the same objects we do not communicate with one another in a meaningful way or govern ourselves together What power can now reconcile a transnational economy with the disturbing reality of introverted communities The author argues against the idea that all we can do is agree on some social rules of mutual tolerance and respect for personal freedom and forgo the attempt to forge deeper bonds He argues instead that we can use a focus on the personal life project the construction of an active self or subject ultimately to form meaningful social and political institutions The book concludes by exploring how social institutions might be retooled to safeguard the development of the personal subject and communication between subjects and by sketching out what these new social institutions might look like in terms of social relations politics and education

Jews and Other Germans Till van Rahden, 2008 Examines the integration of Jews into German society between 1860 1925 taking as an example the city of Breslau then Germany now Wrocław Poland Questions whether there was a continuous line from the German treatment of Jews before World War I to Nazi antisemitism During and after World War I relations between Jews and non Jews worsened and the high level of Jewish integration eroded between 1916 25 Although the constitution of the Weimar Republic accorded Jews equality they experienced acts of violence and discrimination Argues that antisemitism became stronger as the economic situation of the Jews deteriorated due to inflation and the emigration to Germany of 4 273 impoverished Jews from Poland and Russia between 1919 23 Concludes nevertheless that no direct line can be drawn between the antisemitism in Imperial Germany and that of the Nazi period

Turkish Culture in German Society David Horrocks, Eva Kolinsky, 1996-05-01 For many decades Germany has had a sizeable Turkish minority that lives in an uneasy co existence with the Germans around them and as such has attracted considerable interest abroad where it tends to be seen as a measure of German tolerance However little is known about the actual situation of the Turks This volume provides valuable information presented in a most original manner in that it combines literary and cultural studies with social and political analysis It focuses on the Turkish born writer Emine Sevgi Zaimar who writes in German and whose work especially her highly

acclaimed novel *Das ist eine Karawanserei* is examined critically and situated in the context of German migrant literature

and nationalism have become hotly debated issues in the Western world This highly original and controversial work focuses on the language used by the vast majority who regard themselves as being open to a multi cultural society Using Belgium as a case study and drawing parallels with the UK US Europe and the former Yugoslavia the authors analyse this language and reveal a remarkable consistency between these liberal voices such as in news reporting and the language used by radical racist and nationalist groups Rethinking Migration Alejandro Portes, Josh DeWind, 2008-03 Includes statistical tables

Recasting East Germany Chris Flockton, Eva Kolinsky, 2012-11-12 The transformation of east Germany since unification has wrought vast changes in the economy and in society and left deep scars as the types of social protection offered by the centralised socialism of the previous regime gave way to uncertainties and individualised life chances Social Transformation in Eastern Germany investigates the deep economic and social processes which east Germany has undergone highlighting the restructuring the social impacts and the stresses of adjustment experienced by key social groups whose workplace and

social context has been recast almost out of recognition since 1990 Crimmigrant Nations Robert Koulish, Maartje van der Woude, 2020-03-03 As the distinction between domestic and international is increasingly blurred along with the line between internal and external borders migrants particularly people of color have become emblematic of the hybrid threat both to national security and sovereignty and to safety and order inside the state From building walls and fences overcrowding detention facilities and beefing up border policing and border controls a new narrative has arrived that has migrants assume the risk for government sponsored degradation misery and death Crimmigrant Nations examines the parallel rise of anti immigrant sentiment and right wing populism in both the United States and Europe to offer an unprecedented look at this issue on an international level Beginning with the fears and concerns of immigration that predate the election of Trump the Brexit vote and the signing and implementation of the Schengen Agreement Crimmigrant Nations critically analyzes nationalist state policies in countries that have criminalized migrants and categorized them as threats to national security Highlighting a pressing and perplexing problem facing the Western world in 2020 and beyond this collection of essays illustrates not only how anti immigrant sentiments and nationalist discourse are on the rise in various Western liberal democracies but also how these sentiments are being translated into punitive and cruel policies and practices that contribute to a merger of crime control and migration control with devastating effects for those falling under its reach Mapping out how these measures are taken the rationale behind these policies and who is subjected to exclusion as a result of these measures Crimmigrant Nations looks beyond the level of the local or the national to the relational dynamics between different actors on different levels and among different institutions **Multi-Ethnic Metropolis: Patterns and Policies** S. Musterd, W.

Ostendorf, M. Breebaart, 2013-04-17 Multi Ethnic Metropolis is based on international comparative research on ethnic segregation patterns and policy reactions at local and national level The objective was to achieve a broader European perspective For the acquisition of the information on which this book is based we relied heavily on our colleagues abroad and their network of relations since a great deal of factual data and information on the policies pursued is usually not available in a freely accessible form and can only be obtained through persons who know their way around Eventually information was provided by about seventy people data administrators policymakers at local and state level politicians academic researchers representatives of interest groups etc The names of all people that contributed to this study are mentioned in the list of persons who were interviewed Without wishing to wrong all these people we especially want to thank the key informants who acted as intermediaries for following contacts In alphabetical order these are the following persons Dr Lars Erik Borgegard Stockholm Prof Chris Hamnett London Dr Herve Vieillard Baron Paris Prof dr Chris Kesteloot Brussels Prof dr Bob Murdie Toronto Prof Ceri Peach London Prof Phil Rees London and Manchester Prof Brian Robson Manchester and Prof Gunther Glebe Dusseldorf and Frankfurt Furthermore we owe thanks to Prof Herman van der Wusten who took care of the interviews in Paris which was an unruly case
