Heinkel He162 Volksjaeger:

Heinkel He162 Robert Forsyth, Eddie J. Creek, 2009-05-21 If it can be said that adversity generates creativity then the story of the Heinkel He 162 jet fighter is testimony to such a precept From the summer of 1944 the adversity facing the leadership of the Third Reich was formidable Ironically however the very existence of such adversity prompted many inventive designs for the air defence of the Reich on a determined and even manic scale The pinnacle of these accomplishments was the so called Volksjäger the People's Fighter project which was and still is regarded as a miracle of production Created in desperation by the Nazi leadership in mid 1944 and powered by a BMW turbojet the He 162 was known to its pilots as the Spatz the Sparrow It represented an unprecedented aeronautical and engineering achievement with the aircraft going from drawing board to prototype flight in just three months often at considerable human cost In this book aviation historians Robert Forsyth and Eddie J Creek draw for the first time on hundreds of previously unused Heinkel company papers to offer a unique insight into the workings of the Nazi production system in the late war period as well as other German and Allied documents Their work is supported by many rare photographs and accompanied by line drawings and facsimile documents as well as highly detailed colour artwork by He 162 specialist Simon Schatz Heinkel He 162 Spatz offers the whole history of the Volksjäger project and is the first major history of this fascinating aircraft to be published in the English language A natural accompaniment to the other detailed German aircraft monographs published by Classic Publications it is certain to find a ready audience and will form an essential reference work to all those interested in the airpower of World War 2

Heinkel He 162 Dan Sharp, 2020-04-19 The history of the Luftwaffe's last minute single jet fighter the Heinkel He 162 is neither standard nor straightforward Originally conceived as the jet fighter anyone could fly into combat the He 162 was designed and built in under five months an astonishing and unparalleled feat of engineering But what emerged was not a simple jet fighter but a tricky widow maker which killed far more of its own pilots than it ever did those of the enemy Going back to the original wartime documentation author Dan Sharp examines the story of this remarkable aircraft in detail

He 162 Volksjäger Units Robert Forsyth, 2016-11-17 With the Third Reich on the brink of defeat Hitler's instructions to his designers were clear He wanted a Volksjäger a People's Fighter that was quick to produce and used minimal quantities of strategic materials Heinkel rose to the challenge with the He 162 a fighter constructed of wood and metal that was designed built and flown in the staggeringly short time of ten weeks Professional pilots were in short supply and so the Luftwaffe was ordered to man the He 162 with hastily trained members of the Hitler Youth a flawed plan that fortunately never came to fruition Detailed aircraft profiles and never before seen photographs perfectly complement the analysis of the revolutionary Heinkel He 162 as author Robert Forsyth traces its entire history from the early design and production through to its limited combat experience

technical history of Germany's World War II jet fighter aircraft **Thunder Over the Reich** Wolfgang Wollenweber, 2014-06 This is a vividly told story and an important inside account not just of the revolutionary He162 but also the changing fortunes of the Luftwaffe **Heinkel He 162 "Volksjäger"** Heinz J. Nowarra, 2004-09 The jet powered Volksjäger actually saw combat during the late war months *Modelling Luftwaffe Jets and Wonder Weapons* Brett Green, 2012-11-20 While the Allies largely relied on mass production to help them win World War II Germany put a great deal of their limited resources into new technologies and wonder weapons In addition to these tangible assets which were used with varying degrees of success the drawing boards of Germany were littered with dozens of advanced designs that never reached the prototype or production stages Many of these operational and paper projects advanced the pace and influenced the direction of aircraft development in the decades following World War II with many of the German engineers responsible for these innovations seamlessly continuing their roles in the United States and the USSR Modellers have had a long fascination for the Luftwaffe's jet arsenal and secret weapons of fact and fiction and this new Osprey Masterclass will explore the Luftwaffe jets and rocket planes that saw service at the end of World War II *Captured Eagles* Frederick A. Johnsen, 2014-10-20 The growth in size lethality and technology of the German Luftwaffe was of concern to some defense planners in the United States before American entry into the war Learning about the Luftwaffe became a significant effort once the conflict broke out in Europe From defectors with German aircraft to battlefield trophies and combat crew reports the race to understand German aero technology took on sometimes heroic proportions After the war German technology infused American aerospace developments in many ways German ribbon parachutes were evaluated for high speed bailouts sweptwing leading edge slat technology benefited the F 86 Sabre overall comprehension of sweptwing benefits to fast jet aircraft was validated pulse jet V1s and supersonic V2 rockets boosted American drone weapon ballistic missile and space exploration efforts In this volume Frederick A Johnsen traces that path of discovery *Aircraft of the Luftwaffe, 1935-1945* Jean-Denis G.G. Lepage, 2009-03-23 One of the most significant innovations in modern warfare has been the appearance and development of air power a technology which demanded technical and financial investment on a whole new scale and which ultimately changed the fundamental nature of war itself This book covers the history and development of the German air force from 1935 to 1945 with descriptions and illustrations of almost all of the Luftwaffe's airplanes including fighters jet fighters dive bombers ground attackers medium and heavy bombers jet bombers seaplanes flying boats and carrier planes transport and gliders reconnaissance and training aircrafts helicopters and many futuristic projects and other rarities
