na Andreas Reichenbach, Andreas Bringmann, 2011-02-18 Müller cells make up just 0.005% of the cells in our central nervous system They do not belong to the more esteemed family of neuronal cells but to the glia a family of cells that until recently were seen as mere filling material between the neurons Now however all that has changed Sharing the insights of more than a quarter century of research into Müller cells Drs Andreas Reichenbach and Andreas Bringmann of Leipzig University make a compelling case for the central role Müller cells play Everyone agrees that the eye is a very special and versatile sense organ yet it has turned out in recent years that Müller cells are peculiar and multipotent glial cells In the retina of most vertebrates and even of many mammals Müller cells are the only type of macroglial cells thus they are responsible for a wealth of neuron supportive functions that in the brain rely upon a division of labour among astrocytes oligodendrocytes and ependymal cells Even beyond such a role in the central nervous system as model glia Müller cells are adapted to several exciting roles in support of vision They deliver the light stimuli to the photoreceptor cells in the inverted vertebrate retina aid the processing of visual information and are responsible for the homeostatic maintenance of the retinal extracellular milieu In Müller Cells in the Healthy and Diseased Retina aimed not just at neurobiologists but at anyone concerned with retinal degeneration every angle of Müller cells is covered from an introduction to their basic properties through their roles as light cables and shock absorbers to the part they play in diseases and disorders of the eye Once these have all been covered in detail the authors move on to discuss the future direction of research into these small but potent cellular phenomena About the Authors Dr Andreas Reichenbach was born in 1950 in Leipzig Germany He studied medicine and specialized as a physiologist working on the mammalian retina Since 1984 he has focused his efforts and those of a growing number of fellows in his team on Müller cell research He has held a professorship at Leipzig University since 1994 After studying biology Dr Andreas Bringmann 1960 worked in the field of systemic neurophysiology until he was inspired in 1996 by Andreas Reichenbach to research the most interesting cell the Müller cell He is now in the Department of Ophthalmology of the University of Leipzig where he is the head of the Basic Research Laboratory

Scharnhorst and Gneisenau Born in Newcastle upon Tyne in 1995, Daniel Knowles has been interested in history from a young age. The main focus of his historical interest is the Second World War. In July 2016, he graduated with an Honours degree in History and Politics from the University of Northumbria. His university dissertation was written on the changing perceptions to the wartime role played by RAF Bomber Command., 2023-08-04 In February 1942 six Swordfish armed with torpedoes encountered heavy anti aircraft fire in the English Channel and were shot down but not before two torpedoes were launched at a German battleship sailing at high speed This attack was part of a

wider British effort to stop the battleships Scharnhorst and Gneisenau from making their way back to Germany The Scharnhorst is one of the most famous capital ships to have served with the Kriegsmarine Yet she and her sister ship Gneisenau have been largely overshadowed by the Bismarck and Tirpitz despite the fact that they played a more proactive role in the Second World War and were Germany's most successful battleships This book provides an authoritative and informative look at the Scharnhorst and Gneisenau the first capital ships of the Kriegsmarine from their conception through the first successful years of the Second World War to their respective losses This is a detailed account of naval warfare against the Royal Navy off the coast of Norway and the war against Allied commerce from the German perspective

Historical Dictionary of German Intelligence Jefferson Adams, 2009-09-01 No country can rival the sheer diversity of intelligence organizations that Germany has experienced over the past 300 years Given its pivotal geographical and political position in Europe Germany was a magnet for foreign intelligence operatives especially during the Cold War As a result of this it is no wonder that during certain periods of history Germany was probably busier spying on its own citizens than on its enemies Because of the Gestapo and the SS of Nazi Germany to the Stasi of the German Democratic Republic the fear of domestic abuse by security agencies with police powers runs far deeper in German society than elsewhere in the West The Historical Dictionary of German Intelligence presents the turbulent history of German intelligence through a chronology a bibliography and hundreds of cross referenced dictionary entries on the agencies and agents the operations and equipment the tradecraft and jargon and many of the countries involved No military reference collection is complete without it

Orthodoxy and Reform Jonathan Strom, 1999 More than one hundred years after the introduction of the Reformation the clergy in Rostock set out to reform the spiritual and moral life of the city and fashion it into a new Zion Disappointed with the results of the Lutheran Reformation their reform efforts were less concerned with confessional purity than with the practice of Christian piety The resulting reform movement in Rostock became one of the most vigorous in 17th century Germany Jonathan Strom examines the consequences of the Reformation the clergy's social and economic status the career path of a typical pastor and the theological basis of the office of ministry He recounts the practical reforms sought by the clergy in Rostock after the Thirty Years War He further analyzes the theological proposals of the four principal reformers in Rostock Joachim Schroder Johannes Quistorp the Younger Theophil Grossgebauer and Heinrich Muller Against many of the major trends of the confessional age in which the state assumed ever greater control over the ecclesiastical apparatus and a bureaucratization of the clergy occurred the Rostock clergy sought to widen the scope of their authority within the city and assert their independence They had however only limited success in implementing their reforms The ideas of the Rostock reformers would decisively influence Pietist leaders such as Philipp Jakob Spener and August Hermann Francke Their history extends our understanding of the function of the Protestant clergy in the post Reformation era and offers a new estimation of Lutheran orthodoxy on the eve of the Pietist movement
