nineteenth century were portrayed in sentimental terms as afflicted beings whose sufferings afforded able-bodied people opportunities to practice empathy and compassion. In all kinds of representations of disability from popular fiction to the reports of institutions established for the education and rehabilitation of disabled people, the equation of disability and sentimentality served a variety of social functions from ensuring the continued existence of a sympathetic sensibility in a hard-hearted market-driven world to asserting the selfhood and equality of disabled adults. Unique in its focus on blindness and its examination of the interplay between institutional discourse and popular literature, *Woeful Afflictions* offers a detailed historical analysis of the types of cultural work performed by sentimental representations of disability in public reports and lectures, exhibitions, novels, stories, poems, autobiographical writings, and popular media portrayals from the 1830s through the 1890s in the United States. *Woeful Afflictions* combines contemporary scholarship on sentimentalism with the most recent works on the cultural meanings of disability to argue that sentimentalism, with its emphasis on creating emotional identifications between texts and readers, both reinforces existing associations between disability and otherness and works to rewrite those associations in portraying disabled people in their emotional capacities as no different from the able-bodied. This book will interest anyone concerned with disability studies and the social construction of the body with the history of education and of public institutional care in the United States and with autobiographical writings.

John Glenn: A Memoir John Glenn, Nick Taylor, 2000-10-03 He was the first astronaut to orbit the Earth. Nearly four decades later, as the world's oldest astronaut, his courage reinvigorated a nation. But these two historical events only bracketed a life that covers the sweep of an extraordinary century. John Glenn's autobiography spans the seminal events of the twentieth century. It is a story that begins with his childhood in Ohio, where he learned the importance of family, community, and patriotism. He took these values with him as a marine fighter pilot during World War II and into the skies over Korea, for which he would be decorated. Always a gifted flier, it was during the war that he contemplated the unlimited possibilities of aviation and its frontiers. We see the early days of NASA where he first served as a backup pilot for astronauts Alan Shepard and Gus Grissom. In 1962, Glenn piloted the
