Great Desert Explorers Andrew Goudie, 2016-12-01 Desert exploration like climbing Everest or polar expeditions is not for the faint hearted and many of the vivid tales within this fascinating biographical history end in tragedy However the informative and absorbing descriptions of the extraordinary journeys challenges and achievements of these intrepid figures are captivating They risked their lives variously for good old fashioned epic adventure solitude fame the answer to mythical questions and some were even spies They experienced fear excitement and hardship in their journeys into the unknown There are many books on exploration but remarkably few on desert exploration Moreover some of the great desert explorers of the last three hundred years are now very little remembered or appreciated in comparison say with those who ventured to the poles climbed Everest or sought the source of the Nile Yet crossing unknown deserts is no less challenging This volume finally brings these Great Desert Explorers into the limelight with short illustrated biographies of around 60 of the most interesting intrepid and important explorers of the world's greatest deserts There is also a brief introduction to each desert region The many original quotations illustrations and maps contemporary figures as well as plates of a range of desert landscapes make this a colourful lively and informative read

Ethiopia John Markakis, 2011 An historical overview of Ethiopia's transformation from a multicultural empire into a modern nation state Provides the gist of one scholar's knowledge of this country acquired over several decades The author of numerous works on Ethiopia Markakis presents here an overarching concise historical profile of a momentous effort to integrate a multicultural empire into a modern nation state The concept of nation state formation provides the analytical framework within which this process unfolds and the changes of direction it takes under different regimes as well as a standard for assessing its progress and shortcomings at each stage Over a century old the process is still far from completion and its ultimate success is far from certain In the author's view there are two major obstacles that need to be overcome two frontiers that need to be crossed to reach the desired goal The first is the monopoly of power inherited from the empire builders and zealously guarded ever since by a ruling class of Abyssinian origin The descendants of the people subjugated by the empire builders remain excluded from power a handicap that breeds political instability and violent conflict The second frontier is the arid lowlands on the margins of the state where the process of integration has not yet reached and where resistance to it is greatest Until this frontier is crossed the Ethiopian state will not have the secure borders that a mature nation state requires John Markakis is a political historian who has devoted a professional lifetime to the study of Ethiopia and its neighbours in the Horn of Africa He has published several books and many articles on this area
