Seven diverse papers written by ancient and medieval historians are collected in this volume These papers were presented at the academic conference Politics and Religion in Ancient and Medieval Europe and Asia organized by the Department of History and New Asia College of The Chinese University of Hong Kong in March 1996 Although the papers vary widely in the region and time span of coverage from ancient Egypt the early Roman Empire Norman England to medieval China they have in common their concern about the relationship between politics and different religions Christianity Buddhism Taoism and others in ancient and medieval Europe and Asia and the respective intellectual and cultural interactions Professor Mu chou Poo in his paper explores the ancient Egyptian attitudes toward foreigners and foreign culture as an effort to understand Egyptian culture from a new perspective and as a preliminary attempt to probe into the issues concerning the nature of ancient ethnicity and cultural consciousness Professor Yen zen Tsai s paper looks into the way the early Roman Empire treated mystery cults under its rule Professor Ming chiu Lai discusses the impact of a Buddhist ritual on Chinese religious culture between the second and sixth centuries Professor Chi tim Lai in his paper argues that some Taoist teachings advocated a new world order but they were not the real force that provoked the rebellions during the Eastern Jin Dynasty Professor Puay peng Ho exhibits the political meanings of the imperial buildings in the Tang period and sheds light on the research about legitimacy in medieval China Professor Warren Hollister s paper which is also the keynote speech points out that the high culture of twelfth century western Europe was largely the product of monastery Finally Professor Frederick Hok ming Cheung examines the role of the Church in Anglo Norman politics The book will furnish a basis for further investigation on politics and religion in the ancient and medieval world and inspire scholarly inquiries into the comparative dimensions of these important historical phenomena This volume is distributed by Brill for The Chinese University Press

Jewish Worship in Philo of Alexandria Jutta Leonhardt,Jutta Leonhardt-Balzer,2001 As a knowledgeable contemporary of the later Second Temple Philo of Alexandria s approach to worship and his view of the essence of Jewish worship are of particular interest to the study of that period Jutta Leonhardt discusses his views on the Jewish festivals especially the Sabbath on prayer psalms hymns praise and thanksgiving and on Temple offerings sacrifices and purification rites These aspects are presented with their parallels in Jewish and pagan traditions and in Greek and Hellenistic philosophy Jewish worship in Philo has never been studied as a coherent whole before Only individual aspects of worship such as prayer of petition or thanksgiving or Philo has been used in studies on Second Temple Judaism as a quarry for general examples of acts of worship Philo accepted and participated in Jewish worship and even knew about details of various Jewish traditions of his time His writings however do not refer to them directly and cannot easily be used to reconstruct Jewish rituals of his time His main aim is to discuss the rites as collected in the Mosaic Torah since these are binding for all Jews These laws are frequently presented using the terminology of pagan cults and interpreted with recourse to Greek philosophy In this philosophical description of actual rites there are parallels to Plato s references to religion in the ideal state in the *Nomoi* Philo presents Judaism as the ultimate Hellenistic cult which combines the various aspects of the different pagan cults in a sublime and perfect form to represent mankind and the universe in the worship of the one God who created the world

The Bible and Western Culture Dr. Sam Armato,2014-04-22

Ancient Mediterranean Religions John C. Stephens,2016-06-22 This book offers a clear and concise historical overview of the major religious movements of the ancient Mediterranean world existing from the time of the second millennium BCE up until the fourth century CE including both the Judeo Christian and pagan religious traditions Recognizing the significant role of

religious institutions in human history and acknowledging the diversity of religious ideas and practices in the ancient Mediterranean world religion is defined as a collection of myths beliefs rituals ethical practices social institutions and experiences related to the realm of the sacred cosmos Without focusing too much attention on technicalities and complex vocabulary the book provides an introductory road map for exploring the vast array of religious data permeating the ancient Mediterranean world Through an examination of literary and archeological evidence the book summarizes the fundamental religious beliefs and practices of the ancient Near Eastern world including the religious traditions of ancient Mesopotamia Egypt and Israel Turning westward the fascinating world of ancient Greek and Roman religion is considered next The discussion begins with a description of Minoan Mycenaean religion followed by a consideration of classical Roman and Greek religion Next the numerous religious movements that blossomed during Hellenistic Roman times are discussed In addition the fundamental theological contributions of various Greco Roman philosophical schools of thought including Orphism Stoicism Pythagoreanism Platonism and Neo Platonism are described Greco Roman philosophy functioned as a quasi religious outlook for many and played a decisive role in the evolution of religion in the classical and Hellenistic period The theological speculations of the philosophers regarding the nature of God and the soul made a huge impact in religious circles during the classical and Hellenistic era Moving forward in history from archaic and classical times to the later Hellenistic Roman period the old religious order of the past falls by the wayside and a new updated religious paradigm begins to develop throughout the Mediterranean world with a greater emphasis being placed upon the religious individual and the expression of personal religious feelings There are several important social and historical reasons for this shift in perspective and these factors are explained in the chapter focusing upon personal religion in Hellenistic times Since the entire religious topography of the ancient Mediterranean world is rarely outlined in a single volume this book will be a welcome addition to anyone s library

Gods and the One God Robert McQueen Grant, 1988-01-01 Compares early Christian beliefs about God with the religious beliefs of others in the Roman Empire and traces the development of Christian theology

The Divine Verdict John Gwyn Griffiths, 1991 The theme of divine judgement has often been treated but usually with a concentration on one of its two main aspects either that which is seen in the present life and in history or that which is believed to occur only after death This new study seeks to combine the two aspects It also

tries to cover the whole spectrum of the ancient religions Special attention is given to Israel Greece and Egypt Israel s neighbours are also considered and there are discussions of Judaism Christianity and Zoroastrianism In several areas notably in Egypt and Israel it is shown that punishment in this life is sometimes presented as a fate that man brings upon himself rather than as one imposed by God though always against a moral background derived from religion The origins of judgement after death in the Judaeo Christian tradition are examined in some detail and elements are traced to Egyptian Zoroastrian and Judaic sources
