Helmut Striffler, Architekt, Fotograf, Robert Häusser Helmut Striffler, Robert Häusser, Ingeborg Flagge, 2002

Modern Architecture Through Case Studies 1945 to 1990 Peter Blundell Jones, Eamonn Canniffe, 2012-08-21 Once again new interpretations are presented of some of the most famous architecture of the period. Work by lesser known architects whose influence and role have been overlooked by conventional histories of the subject is discussed. The case study structure allows each example to be discussed and used as a springboard to explore different theoretical approaches. Filled with beautiful photographs, plans and architect's drawings, this is a clear and accessible discussion on a period of architecture that engages many questions still under debate in architecture today. **Sacred Buildings** Rudolf Stegers, 2008-05-16 The building of religious structures represents a rare opportunity for the architect to concentrate on the creation of volume, space and form. Sacred architecture is far less determined than other building tasks by functional requirements, norms and standards. As a rule, it is free to unfold as pure architecture. Thus, in design terms, this building task offers enormous freedoms to the architect. At the same time, however, the special atmospherics of sacred spaces call on the part of the architect for a highly sensitive treatment of religion and the relevant cultural and architectural traditions. In a systematic section, this volume introduces the design, technical and planning fundamentals of building churches, synagogues and mosques. In its project section, it also presents about seventy realized structures from the last three decades. Drawing upon his in-depth knowledge of the subject and his many years of publishing experience, the author offers a valuable analysis of the conceptual and formal aspects that combine to create the religious impact of spaces, e.g. the ground plan, the shapes of the spaces, the incidence of light and materiality. **Concrete Construction Manual** Friedbert Kind-Barkauskas, Bruno Kauhsen, Stefan Polónyi, Jörg Brandt, 2013-01-07 No detailed description available for Concrete Construction Manual. **Avery Index to Architectural Periodicals. 2d Ed., Rev. and Enl.** Avery Library, 1993. *Avery Index to Architectural Periodicals* Avery Library, 1973. **Modern Architecture in Europe** Dennis J. De Witt, Elizabeth R. De Witt, 1987. **Design and Planning of Retail Systems** David Gosling, Barry Maitland, 1976. **A Field Guide to Landmarks of Modern Architecture in Europe** Miriam F. Stimpson, 1985. **The Book of Consciousness** Dr. Bara H. Loveland, 2011-01-19 The Book of Consciousness by Dr. Bara H. Loveland. Have you ever wondered what Consciousness is or the mind, the unconscious or Archetypes and Symbols, how they work and how to define these? Without arriving at the reach of Consciousness, there are numerous books on consciousness; there are conferences held and groups searching for consciousness with dictionaries attempting to define it. Why have they not found the ultimate definition of Consciousness to this day of the publication of The Book of Consciousness in January 2011? Could Bara's new book The Book of Consciousness hold the answer? Can it deliver the ultimate in Consciousness? There are many other questions which science has not positively answered yet. Why is it that our brain, cerebrum, seat of the mind, has to be calmed from 40 Hertz to 8 Hertz or less, literally put to sleep, in order to reach highest

states of awareness although the cerebrum is supposed to be the seat of the world's highest intelligence Why is this seat of highest intelligence polluting the earth to the brink of dying of life Why is the unconscious called unconscious when it is able to construct meaningful dreams and is there a difference between an Archetype and a Symbol appearing in dreams and myths Could a neurosis not be a disease And what is it the mind really knows Profound contemplation of Consciousness must lead to further questions about the origins of Archetypes and Symbols about wisdom and similarities of ancient Stone Age Symbols East Indian and Egyptian scriptures Runes Mayan glyphs and biblical Symbols or world religions in general One may wonder why an Egyptian god is frequently named in Christian churches and is mentioned in both the Old and the New Testaments Is God He and could He exist Could there be a different world behind our visible one and could we have Bio Modulators to sense the other world What can we learn from a Germanic king Is it possible that we have more than five senses and how many diseases could naturally exist Can the DNA communicate and how many laws exist in the universe What is the meaning of certain Bible verses and what could have been the message Jesus gave the world on the cross Is New Age wisdom contained in the Bible and could it be that common science limits itself when excluding miracles it could perform with ease protecting the animals from harm Are there more levels of logic than one How could we realize or activate them What is the role our belief plays in our life and in science The Book of Consciousness begins where common science ends Be surprised by the innovative answers with some published about 30 years ago by this author Be captivated by the author's authentic new style by the insights humor and vivid experiences enjoy the 40 figures and tables as well as exercises to reach altered states of awareness naturally and at will May The Book of Consciousness raise into Oneness the conscious of all those who read its 640 pages may they be the igniters inspiring divine Oneness and Love in the perception of all Genre Specialty Books

Avery Index to Architectural Periodicals, 1992 Avery Library, 1993 Nuevas Iglesias de Europa George Everard Kidder Smith, 1964 The New Churches of Europe is primarily concerned with that one room in each religious complex which constitutes the rationale of its being the room for worship Ancillary adjuncts provided for educational and social activities offices quarters for priest or minister etc generally are omitted as being peripheral to the far more trying task of the design of the nave Moreover the book does not explore in detail except where pertinent building techniques or construction nor does it go into costs either on an overall or cubic basis Such factors though admittedly important vary so much from country to country and can be so misleading that it was thought wiser given limited space to concentrate on the message of the forest and only nod to the trees The author's original intent was to include at least twenty more churches and to call on parts of many others in substantially illustrated analytical sections of the introduction However the severe economics of today's publishing prohibited this Deep apologies are sincerely extended to those kind architects who generously sent requested material yet whose churches at the last minute and for reasons that had little to do with quality could not be included
