Tansey,Anthony Worsley,2014-03-18 Food is a massive industry and the many key players involved have very different interests In wealthy nations those interests can range from corporate survival and maintaining profitability in a market with limited demand to promoting a healthy diet and ensuring food safety For the poor the emphasis is all too often on simply getting enough to eat As information technology and biotechnology are set to revolutionize the food system it is essential to understand the broad context in which the different actors operate so that all the world s people can enjoy a safe secure sufficient and sustainable food supply This text provides an overview of today s dominant food system one developed in and controlled by northern industrialized countries and one that is becoming increasingly globalized **Changing the Food Game** Lucas Simons,2017-09-08 By 2050 the world s population is estimated to grow to 10 billion To feed everyone we will have to double our food production to produce more food in the next 40 years than in the whole of the last 6 000 Changing the Food Game shows how our unsustainable food production system cannot support this growth In this prescient book Lucas Simons argues that the biggest challenge for our generation can only be solved by effective market transformation to achieve sustainable agriculture and food production Lucas Simons explains clearly how we have created a production and trading system that is inherently unsustainable But he also demonstrates that we have reason to be hopeful from a sustainability race

in the cocoa industry to examples of market transformation taking place in palm oil timber and sugarcane production He also poses the question where next Provocative and eye opening Changing the Food Game uncovers the real story of how our food makes it on to our plates and presents a game changing solution to revolutionize the industry **Field and Stream** ,1928
