Diabetes without Drugs Suzy Cohen, 2010-11-09 Based on breakthrough studies Cohen's program reveals how people with diabetes can reduce their need for prescription medication and minimize the disease's effect on the body Most doctors consider diabetes a one way street once you have it your only option is to manage the symptoms with a restricted diet close monitoring of blood sugar and expensive medications Pharmacist Suzy Cohen shows that diabetes can be treated instead through safe natural means like food and vitamins rather than strictly relying on prescription drugs She shifts the focus away from glucose management to a whole body approach using supplements minerals and dietary changes to lose weight repair cell damage improve insulin function and reduce the side effects from prescription drugs many of which rob nutrients from the body and cause additional symptoms This 5 step program uses natural alternatives such as drinking nutrition packed green drinks adding vitamin D and anti inflammatory supplements increasing fiber intake and including minerals in the diet to help restore the body's own supply of insulin *Diabetes without Drugs* explains how patients can protect their heart kidneys eyesight and limbs from the damage often caused by diabetes and shows the impact that the right foods and the right supplements can make in reducing blood sugar levels aiding weight loss and restoring vibrant health to everyone with diabetes

High Cholesterol: Natural Cure Without Drugs, 2024-04-20 As a clinician working in my clinical practice for the last 35 years I have seen many cases of

patients with high cholesterol levels and more importantly high LDL lipoproteins It appears that the number of patients seems to be increasing yearly and most of them have already started taking Statin drugs in order to control their cholesterol levels When I tell them that it is possible to come off these drugs and stabilize their cholesterol and LDL levels naturally while also optimizing their overall health and wellbeing they look at me like I m from another planet I understand why this is the case I really do If these patients who have usually seen a few medical doctors before sitting in front of me have been told that the only answer to their cholesterol problem is to take pills then who am I to disagree with the mainstream This is one of the reasons why I wrote this book in order to give people the information that they need to empower them to take responsibility for their health and become drug free and healthier in the meantime If you KNOW what to do then it s not difficult I have witnessed hundreds of patients stabilizing their blood fats and getting better by making the changes that I am recommending in this book The beauty is that it does not take very long to achieve the desired results if everything I recommend in this book is implemented then you should see permanent results in 90 days I sincerely hope that you become one of the lucky ones who follows through on the recommendations I give and optimizes your health when you get there please write to me and let me know what you achieved Let s begin our health journey by answering some of the basic questions like what is cholesterol Is there bad and good cholesterol What is the normal range Why do we need cholesterol and more

7 Keys to Bring Your Blood Pressure Under Control Dr Bruce Miller,2010 You may not have it now but you probably will People as young as 20 have blood pressure that is high enough to require treatment If you live long enough you will most likely get high blood pressure Only a small minority of Americans escape this condition High blood pressure is a silent killer as it offers no signs no symptoms and no warnings but it is one of the easiest to prevent and one of the most responsive to lifestyle changes but deadly if you do not know how to tame it If your blood pressure reading is 120/80 you are already suffering from pre hypertension a sign that you are losing control of your blood pressure You are now at risk of a heart attack by as much as 5 times and your risk for stroke by about 10 times You are also increasing your risk of heart failure and renal failure At this stage you can take preventive steps to say no to high blood pressure This book gives you seven crucial keys to lower your blood pressure and keep it under control or prevent it in the first place Start using these keys today to avoid becoming a candidate for a heart attack or stroke
