**B-52 Stratofortress vs SA-2 "Guideline" SAM** Peter E. Davies,2018-10-18 Ever since its introduction in the late 1950s the B 52 Stratofortress has been the United States primary heavy bomber and a powerful symbol of its immense military might Its powerful electronic countermeasures equipment ECM was thought to make the B 52 immune to ground to air missile attack but in Vietnam and later conflicts such as Operation Desert Storm in 1991 it came up against the Soviet designed SA 2 SAM which used heavy salvoes of missiles to bring down the bombers The losses of several of its most feared powerful and supposedly invincible bombers per night to a torrent of Soviet missiles during the closing stages of the Vietnam War was sobering to Americans but the B 52s crushing attacks virtually eliminated North Vietnam s defences and forced a peace settlement This fascinating book analyses the roles of the SA 2 operators and the B 52 Electronic Warfare Officers EWOs using specially commissioned artwork as well as first hand accounts and traces the cat and mouse tactics that each side employed

**Boeing B-52 Stratofortress** Ben Skipper,2024-08-30 Skipper has an open narrative style and has conducted thorough research on B 52 evolution His book provides an excellent overview of this aircraft valuable to aviation enthusiasts military historians and general readers interested in the role of strategic airpower in modern conflict The Journal of the Air Force Historical Foundation First flown in 1952 the Boeing B 52 Stratofortress became the ultimate expression of Cold War very heavy bomber design The last of the famous Fortress series of aircraft produced by the legendary Seattle based company the B 52 was created over a weekend in a hotel suite in Ohio resulting in a design that gave America s post war Strategic Air Command led by General Curtis Le May an additional nuclear capable edge The B 52 was almost as big as Convair s B 36 Peacemaker the largest serial produced piston powered aircraft ever built The B 52 could carry a very similar bomb load but flew it further higher and faster The turbojet powered B 52 utilized techniques Boeing had learned from the Model 450 B 47 Stratojet and was designed to meet the Strategic Air Command s ever changing needs in the nuclear age Like its predecessors Boeing s B 52 proved to be a highly flexible aircraft capable of carrying increasing payloads meaning it has remained in service well beyond its expected lifespan Over the decades the B 52 gradually become a strategic and tactical airborne platform capable of delivering evermore deadly attacks against targets in various environments from jungle to arid mountains The B 52 had become the universal tool for commanders on the ground and a symbol of American military power capable of striking a target anywhere in the world as evidenced by its deployment in for example the Vietnam War and the Gulf War Such was its potency that the USAF and Boeing had developed an aeroplane of such importance that it now seems
