

LMS class 'D' 0-6-0 No. 2220 takes coal from Buxley brought with a Down train of coal empties on August 23, 1926. This engine was rebuilt from a class 'K' compound in May 1926 and was further rebuilt as LMS No. 2024 to class 'GJ' in September 1927. It was 'upgraded' to 'Gda' in September 1944, and was withdrawn in November 1944 from Wigton Springs Branch. In one form or another it had given almost 60 years of service, having first been built at Crewe in February 1895. **R.A. HARRISON/RAIL ARCHIVE STEPHENSON**

An LMS Fowler 'H' No. 4060 is seen at the head of a heavy road train near Bowdley Bridge. Built in May 1932, this engine was withdrawn from Newton Heath shed in May 1950, but was 'road' up by the Central Motor Co., at Ilkeston, near Wigton, until September 1962. **J.M. BARNETT/RAIL ARCHIVE HARRISON**

were rebuilt from what were, or had become, 'GJ' class locomotives, but the total at any given point was something of a moving target. 222 'Gda' class 0-6-0s ultimately made it into BR stock at Nottingham.

making them the largest class of ex-LMS locomotives in BR stock. They were all numbered in the range 48993-48994, but some numbers in the same range were given to 'GJ' locomotives.

LMS class 'C' 0-6-0 No. 3824 at Millhouse shed, Muddersfield in 1923. It was converted from a class 'K' compound in August 1925, one of 22 such conversions carried out between November 1924 and March 1926. It was withdrawn in 1935. **R.A. HARRISON/RAIL ARCHIVE STEPHENSON**

An LMS class 'H' (Gda) 0-6-0 No. 48993 passes Biggle Junction with a coal train to Leeds mixed goods in the mid 1930s. Built as a class 'K' compound in 1925, it was rebuilt as a class 'C' 0-6-0 in 1926, to a 'GJ' 0-6-0 in 1930 and finally as a 'Gda' in 1940. **BENNETT/RAIL ARCHIVE STEPHENSON**

The actual term 'Super D' goes back to the Class 'D' George White rebuilds of 42 earlier Webb K class three-cylinder compound 0-6-0s carried out between 1906-9 that were superseded by the LMS between 1925

and 1934 and became part of the 'GJ' class (and subsequently 'Gda's). Suffice to say that there is much confusion and therefore 'Super D' can be viewed as a general term referencing an 'improved' or 'supercharged' former

A new study of LMS class 'GJ' 0-6-0 No. 2242 heading a Down train of 'Private Owner' coal empties past Hatch End in 1923. Built in 1923 & became a 'Gda' in 1940. **R.A. HARRISON/RAIL ARCHIVE STEPHENSON**

Heavy Freight Locomotives Of Britain:

Heavy Freight Locomotives of Britain Denis Griffiths, 1993 The heavy freight locomotive has always been an important part of Britain's railway operations This book is a history of the development of the freight locomotive from the steam era to the high powered and technologically advanced diesel electrics of today [The Locomotives of Robert Riddles](#) Colin Boocock, 2023-11-09 The Locomotives of Robert Riddles guides the reader in the quest to understand how Robert Riddles career on the LMS and in war service shaped his knowledge and character and led to him becoming the obvious choice for leading the locomotive engineering function within the newly formed Railway Executive The book outlines the substantial impact Riddles had on the design and supply of locomotives that were to support the Allied military campaigns in the second world war including useful analysis of the types of locomotives specifically designed for that work The bulk of the book outlines the decision making processes that led to the twelve designs of standard steam locomotives that were intended to be the future stop gap before electrification and the political and practical reasons for successive policy changes that led to their unexpectedly short lives Those events include the 1955 Modernization Plan with its emphasis on dieselization and the subsequent railway rationalizations that reduced the need not only for new steam locomotives but also made relatively new diesels redundant Each BR standard locomotive type is described in its own chapter The performance of each class is given its rightful emphasis The book is comprehensively illustrated with largely unpublished pictures that cover a wide range of locations and locomotive duties **British Rail Class 60 Locomotives** Edward Gleed, 2016-07-15 During the mid 1980s in a drive for greater efficiency British Rail required another heavy freight locomotive some of the earlier Type 5 freight locomotives being outdated and no longer regarded as suitable for heavy freight duties The new Class 60 locomotive was to be constructed using lessons learned from the Classes 56 and 58 Six organisations were invited to tender but only three did so The contract was awarded to Brush Electrical Machines today Brush Traction part of the Wabtec Rail Group for a powerful 60mph Type 5 Co Co design which resulted in an order being placed for one hundred Class 60 diesel electric locomotives Using original research from the National Archives *British Rail Class 60 Locomotives* is a high illustrated guide that explores the commissioning of the Class 60s and their construction testing and running It undertakes an in depth technical appraisal of the class and details names liveries modifications and preservation and includes the Super 60 refurbishment programme and acquisition of ten Class 60s for Colas Rail UK bringing the timeline to the present day Of interest to all diesel loco enthusiasts and railway modellers this book is lavishly illustrated with 280 colour and black white photographs many previously unpublished **Classic British Steam Locos** compiled from Wikipedia entries and published by DrGoogelberg, 2012-06-11 do you want to know everything on steam locos how they work Read about the technology and lots of steam locos like the flying Scotsman Compiled from Wikipedia pages and published by Dr Googelberg **British Diesel Locomotives of the 1950s and '60s** Greg Morse, 2016-07-28 After the Second World War the drive for the modernisation of

Britain's railways ushered in a new breed of locomotive the Diesel Diesel powered trains had been around for some time but faced with a coal crisis and the Clean Air Act in the 1950s it was seen as a part of the solution for British Rail This beautifully illustrated book written by an expert on rail history charts the rise and decline of Britain's diesel powered locomotives It covers a period of great change and experimentation where the iconic steam engines that had dominated for a century were replaced by a series of modern diesels including the ill fated Westerns and the more successful Deltics British Steam: BR Standard Locomotives Keith Langston,2012-11-19 A history of post second world war steam locomotive design and construction in Great Britain the perfect gift for railroad history buffs After WWII the existing railway companies were all put into the control of the newly formed British Transport Commission and that government organization spawned British Railways which came into being on January 1st 1948 The railway infrastructure had suffered badly during the war years and most of the steam locomotives were tired and badly maintained and or life expired Although the management of British Railways was already planning to replace steam power with diesel and electric engines they still decided to build more steam locomotives as a stop gap Some 999 Standard locomotives were built in twelve classes ranging from super powerful express and freight engines to suburban tank locomotives The locomotives were mainly in good order when the directive came in 1968 to end steam some trains were only eight years old There still exists a fleet of forty six preserved Standards of which 75% are in working order in and around the UK's preserved railways furthermore three new build standard locomotives are proposed Steam fans who were around in the 1960s all remember the Standards *British Rail Class 20 Locomotives* Pip Dunn,2016-05-31 The first of the English Electric Type 1 design what we now know as the Class 20s appeared in June 1957 With their distinctive chopper engine sound these single cabbed locomotives soon gained a reputation for rugged reliability brought about by their simplicity and use of tried and tested components British Rail Class 20 Locomotives looks back at the operations of these fine locomotives since 1957 covering their varied workings and duties regional use and railtour operations The book also covers the technical aspects and specifications of the locomotives including liveries and detailing British Steam Locomotives Before Preservation Malcolm Clegg,2020-07-30 A pictorial history of the British locomotives now part of the national collection detailing their working lives and their preservation British Steam Locomotives Before Preservation covers the history in pictorial form of steam locomotives that are now preserved as part of the national collection Those which can be found in private collections and the ones which adorn the various heritage railways which operate throughout Britain The book looks at each subject both in its working life and during its subsequent preservation The pictorial content covers a wide swathe of Britain during the years before the heritage locomotives were earmarked for preservation Praise for British Steam Locomotives Before Preservation The book does exactly what it says on the cover and is recommended for anyone with an interest in UK standard gauge steam The photographs include not only locomotives but also trains in some very interesting settings which adds to the enjoyment of a well researched offering Recommended Next
